**091223569** 560ml

## 9 Prossage™

The intent of Prossage™ Heat, through hands on therapy, is to help restore pain free movement and structural balance throughout the body with minimal effort.

For best results, apply a moderate amount of Prossage™ Heat to the soft tissues leading to a painful area such as the muscle bell leading to the painful tendons of the elbow. Brief circular, cross fibre of palmer friction will enhance the warming effects. Work the tissues from superficial to deep to increase blood flow to the area. The result will help melt the connective tissue adhesions, and reduce ischemia to more effectively reduce chronic pain.
