1 Leukotape® P

Leukotape® P is a high strength, non stretch rigid tape. It has excellent adhesion qualities making it ideal for rigid joint immobilisation.

091246818 3.8cm x 13.7m

2 Mueller® P Tape

High Strength rigid tape. Rayon material with serrated edge for easy tearing.

091552983 3.8cm x 13.7m

3 Leukotape P Combi Pack

This combi pack contains 1 x heavy duty strapping tape (Leukotape P) and 1 x 5cm fixation tape for use as a protective layer under the strapping tape.

091247535 Twin Pack

4 Leukotape K

Leukotape K is constructed from a highly elastic cotton substrate coated with a wavelike pattern of adhesive which works with the skins natural elasticity. The tape is applied using specific techniques, whereby tape is applied over and around muscles to give support, without affecting circulation around muscles to give support, without affecting circulation or range of motion. In this way Leukotape K promotes the body's own healing process whilst allowing complete freedom of movement.

KINESIO UK

The Kinesio Taping® Method has taken the Rehabilitation and Sports Medicine world by storm. Developed by Dr. Kenzo Kase over 30 years ago, Kinesio Taping has become the gold standard for therapeutic rehabilitative taping. This proprietary method of taping uses a uniquely designed and patented tape for treatment of muscular disorders and lymphoedema reduction.

Since the introduction of Kinesio Taping into the UK, medical practitioners (Physios, Sports Therapists, Osteopaths, Chiropractors, Nurses) have recognised This effective, safe, and easy-to-use modality. worn for several days per application, The method and tape allow the individual to receive the therapeutic benefits 24 hours a day. With over 2,000 practitioners trained in Kinesio Taping in the UK, it has become a popular taping technique used in many hospitals, clinics, universities and by professional sports teams.

KINESIO® TEX GOLD FP™

Developed For Kinesio Professionals, Dr. Kase and Kinesio bring you the latest design in Kinesio® Tex tape. With over 30 years of research and development, Advancements in technology have enabled Kinesio to design a tape that represents Dr Kase's original vision. This new enhanced and patented tape with fingerprint technology is Kinesio® Tex Gold FP

- Brings Nano-touch stimulation to epidermis and layers beneath
- Mimics gentle human touch, yet provides more effective hold
- Micro-grip deep set adhesive manufacturing process provides better grip and hold with less adhesive surface area
- Features a new protected weave process for improved comfort
- Higher grade cotton with more breathability
- Core properties remain for all Kinesio Taping® specifications
- Hypoallergenic and latex free for all patient populations
- Exclusively available to Medical Care Professionals only
- Enhanced EDF™ (Epidermis, Dermis, Fascia) Application Performance

THE Original KINESIO® TAPE

ROCKTAPE®

Go stronger, longer

ROCKTAPE is a natural-hybrid product that consists of 97% cotton and 3% nylon. The adhesive is a hypo-allergenic acrylic based adhesive and contains no latex.

ROCKTAPE is engineered to mimic the human skin. This stretchiness is the secret behind ROCKTAPE. ROCKTAPE stretches up to 180% of its original length but has amazing 'snap-back' or recovery. This is what gives ROCKTAPE its performance advantage over other tapes.

Tapes & Strapping

1 Mueller® Kinesiology Tape

Mueller® Kinesiology Tape features a revolutionary adhesive design that lifts the skin to help maintain flexibility, improve circulation, and relieve pain. Designed to aid in the treatment of ligament injuries, muscle conditioning, fascia repositioning, and even carpal tunnel syndrome, it is applied to the skin in patterns to mimic your muscles. Patterned adhesive is mild and hypoallergenic.

The Biomechanical Tape

Dynamic Tape is a unique, strongly elastic tape designed by an Australian Musculoskeletal Physiotherapist and is used by professional athletes and physios as a supportive and rehabilitative taping technique applied over muscle.

It is not like kinesiology tape. It is made from a different material, has completely different physical properties and is used very differently with a completely different aim in mind.

4 Way Stretch – Gives You Springs!

Its properties:

- **Enhance biomechanical efficiency** by supporting and reinforcing muscles, tendons and ligaments alike
- **Enhance biomechanical efficiency** by assisting co-ordination, proprioception, balance and timing of activation
- **Generate and transfer energy** back into the kinetic chain
- **Improve circulation** (blood and lymph) to assist rate of recovery and repair
- **Reduce perception of pain**

The tape's striated adhesive backing allows unrestricted motion whilst facilitating the responses above which can help you stay 'on the field' or get back on it sooner. Dynamic tape can be applied in a variety of methods which are flexible and adjustable to suit your needs.

Dynamic Tape has enabled us to manage a wide range of injuries much more effectively than in the past. The quality of the tape, specifically the multi-directional elasticity, ensures it is highly beneficial for a multitude of pathologies.

Joe Collins, Head of Medical Saracens

1 Dynamic Tape

- Single Roll
- 091441906 Tattoo Tan 5cm x 5m
 - 091441914 Black Tattoo 5cm x 5m
- Wide Roll
- 091520881 Tattoo Tan 7.5cm x 5m
 - 091520899 Black Tattoo 7.5cm x 5m

 - 091544956 Dynamic Tape™ Glue 400ml

2 Dynamic Tape Eco

New Dynamic Tape Eco is made from recycled plastic bottles using Patent Pending technology. These unique properties create a higher modulus of elasticity meaning that the tape creates stronger resistance much sooner in range making it ideal for a variety of taping applications.

- Features:
- Ideal for joint and ligamentous applications
 - Strong recoil provides firm compression to augment force closure
- 091558394 Black with Grey Tattoo 5cm x 5m
