1 Otter Bath Chair

This versatile and supportive bathing system has many adjustable features for positional support in a wide range of seating positions. The durable plastic frame has slip resistant legs and can also be adjusted easily whilst the child is in the chair.

The seat fabric can be slipped off to bathe a child sitting on the floor of the bath tub, supported by the bath chair back. The head cushions are height and width adjustable and provide support and comfort for the child. The head supports can also be used as lateral supports. The seat fabric is machine washable and easy to remove.

Features

- Seat and back are angle adjustable and have five angle adjustments at 0°, 22°, 45°, 67½° and 90°
- Adjustable slip resistant legs raise the chair up to 178mm (7") and can be adjusted with the child in the chair
- Uni-Bars allow the seat and back angle to be adjusted with one hand
- Leg straps control abduction and adduction
- Two positioning straps secure the child
- Head cushions are height and width adjustable and provide support and comfort. They can also be used as lateral supports.
- Folds flat for easy storage

PICTURED WITH OPTIONAL BASE EXTENSION

ADJUSTS TO 12 POSITIONS

1 Reclining Shower/Bath Chair

A versatile bath and shower chair that fits in all standard baths and showers. Three tilt adjustments of the seat between 30° and 70° allow carers to place the user in a safe and comfortable position. An optional head bolster provides additional support for the head and neck when needed. The optional 230mm (9") base height extension allows carers to raise the chair when needed to accommodate for beds, baths and shower heights and facilitates safer transfers. Adjustable safety belts provide stability once the user is comfortably positioned. Four standard 80mm (3") heavy-duty castors (2 locking) are ideal for roll-in showers, allowing users to be safely transferred outside the shower. This chair has a waterproof PVC frame and an anti-bacterial royal blue mesh fabric seat and seat back. Available in three sizes to accommodate children and adolescents. Seat to floor height 457mm (18").

1 Tumble Forms Starfish Bath Chair

Sammons Preston

Makes bath time more enjoyable for caregiver and child.

The Starfish Bath Chair is designed for simple functionality and adjustability. Height adjustable chair legs with angle adjustable back and leg supports offer a range of height and angle positions so the child and caregiver are more comfortable. Only one hand is needed to release the leg and seat locks located on both sides of the chair making bath time adjustments quick and simple. The padded support bars give added positioning comfort. The aluminium frame is easy to lift and carry, and the chair folds flat for convenient storage or transportation. Non-slip foam pads provide secure bath placement for stability and security. The seat features extra soft, breathable mesh material that is removable for machine washing and is available in a choice of four colours. An adjustable Hip Belt and Chest Belt are included to provide secure positioning and optional abduction straps and head laterals are available as accessories. Available in four sizes to accommodate the youngest child through to adolescence.

2 Sub Bath Support

The Sub is a supportive seating system for children, to be used in the bath and around the home. It has been designed to assist in the bathing of children and is particularly suitable for children with limited upper body stability. The backrest is adjustable with three incline settings and the option to lay flat in the bath. The thin cross section of the base board means that the lowest part of the baseboard is only 5mm above the bottom of the bath allowing for shallow water bathing.

Specifications

Spares are available for these products, making them suitable for refurbishment. For full spares listing, please see pages 1353 to 1360.

Surfer Bather Child's Bath Lift

The Surfer Bather is a powered bath lift that is designed to aid the bathing of children. It is particularly suitable for children with limited upper body stability. The child is raised and lowered from the top level of a bath down into the water. This minimises moving and handling risks among carers of larger and heavier children. The Surfer Bather is operated by low air pressure providing a steady, gentle and stable ride. An adjustable backrest can be set to suit the user. The child can be positioned safely and comfortably by using protective strapping and an optional pommel. The bath lift can be dismantled into separate sections for easy storage and transportation. The Surfer Bather fits most standard baths. It can be operated by using the corded remote control, or by the controls on the Airflo battery compressor.

Specifications

Overall length	1170mm (46")
Overall width	410mm (16") min 685mm (27") max
Max user height	1350mm (4' 5")

INFORMATION
We recommend that all benches and tables are installed by a qualified tradesman.

1 Pressalit Nursing Bench 150

This height adjustable nursing bench helps with the safe moving and handling of children and adults when they are being changed or showered. The bench moves from wheelchair level (500mm) to a safe working height (900mm) (note these heights are dependent on fixing position). This movement is easily controlled by a simple, remote control hand unit. It folds upright when not in use to save space.

The bench has a nylon coated steel frame and practical and durable PVC canvas. A splash protection curtain is available as an accessory to protect the carer from water splashes as it passes through the drainage holes on the bench. A safety rail is also supplied as standard. Available in two lengths.

Width of bench 600mm (23¹/₂"). Total width (edge of bench to wall when fitted) 735mm (30"). Width of lifting unit 750mm (29¹/₂"). Depth of lifting unit 115mm (4¹/₂").

2 Pressalit Free Standing Nursing Table

This height adjustable nursing table enables carers, for example in a day nursery or daycare centre, to find the right working position and avoid having to lift children unnecessarily when attending to their needs. It is freestanding and is adjustable in height via an electric motor, with remote control. Height adjustable from 650 mm - 1000 mm. The tables all includes two wire baskets for storage and are available in versions with sanitary appliances including stainless steel sink, tap, showerhead and feed/waste system.

1 Pressalit Nursing/Shower Bench

This height adjustable nursing bench is designed to help with the safe moving and handling of children and adults while they are being changed or showered. The bench is slightly curved making it extremely comfortable and safe. The height adjustable bench can be adjusted from a suitable transfer height (300mm) to a safe caring height (1000mm) (note these heights are dependent upon fixing position). This movement is easily controlled by a simple, remote control hand unit. When the fixed height bench is mounted at the recommended height, the lying surface height is 865mm above the floor. The integrated gas cylinder also enables the bench to be folded easily against the wall when not in use to maximise floor space.

The nursing bench benefits from a water collection tray with an integrated water outlet that prevents water from splashing on carers or on the floor. The bench, end caps and safety rail are all covered with polyurethane foam so that there are no cold surfaces exposed. The bench also benefits from a manually adjustable back support at both ends for increased comfort for the user. The safety rail can be easily folded up or down using only one hand. Available in two adjustable height versions and two fixed height versions.

1 SKM Freestanding Easychange™ Changing Table

This extremely versatile platform has a staggering height range from 35 to 108cm and can carry a load of up to 100kg. Its attractive non-clinical design ensures it never looks out of place, wherever it is used. Safety is paramount and padded safety rails at the side and a steel back panel ensure containment on all sides when the operator is in front of the table. Mains powered with remote control and folds to easily save space when not in use. The legs are not folding. Total distance from wall when folded 52cm (20"). Length 120cm (47"). Width 70cm (27"). Height adjustment 35 - 108cm (13 - 42"). Note: Not intended for use in wet areas.

AA95091 Folding

Maximum user weight **100 kg** **15³/₄ st**

2 Shower Trolley

This range of shower trolleys is designed to allow washing or showering of patients in a supine position. Mobile and easy to manoeuvre, it makes transferring a patient to the bathing area simple, allowing the patient to be showered, dried and clothed whilst minimising the risk of back injury to the carer. Three locking castors prevent movement during patient transfer and the fourth castor has directional locking to assist manoeuvrability. The height adjustable models can be adjusted from either side, setting the trolley at a convenient height and avoiding the need for stretching or leaning. Drop down sides on both sides of the trolley enable transfer of the patient, whilst the padded liner and head support improve comfort.

Surface area 1930 x 750mm (76 x 29¹/₂"). Depth of sides 200mm (8"). Height of fixed model 960mm (37³/₄"). Height of adjustable models 580 to 960mm (23 to 37³/₄").

3 Changing/Shower Stretcher

A Changing/Shower Stretcher that is safe, sturdy and convenient. It is fixed to the wall and has two fold-down legs that provide extra support. The whole frame can be folded up against the wall to save space. The tough PVC cover has holes to allow water to drain away easily. Available with an integral back support option that can be adjusted to 7 positions, allowing the user to sit up if required (shown).

Stretcher width 750mm (29¹/₂"). Stretcher length 1900mm (75"). Leg length 900mm (35¹/₂"). Projection from wall (unfolded) 875mm (34¹/₂"). Projection from wall (folded) 110mm (4¹/₂").

1 Seahorse Sanichair

The design of the Seahorse Sanichair is based around two sizes of frame each accommodating two sizes of liners to provide four size options. This allows the liner to be replaced with the next size as the child grows. The frame allows the Seahorse to fit over the majority of toilets within the domestic or school setting whilst the high centre of gravity enables the child to be tilted for washing and showering.

Features

- Positive locking on the headrest, footrest and potty, adding extra security for the child and carer
- Contoured splashguard suitable for use by a wide range of children
- Plastic and aluminium construction for durability eliminates rusting and aids ease of cleaning
- Simple tilting mechanism to facilitate showering in a variety of positions
- Height adjustable headrest, footrest and frame to suit a variety of patients and settings
- Soft foam liners for comfort and hygiene
- Elongated aperture for easier personal cleaning
- Contoured seat to provide support and facilitate toileting
- Large braked castors for ease of movement
- Detachable splash guard aids abduction and may be removed for easier access
- Large capacity detachable potty is easy to remove and clean
- Soft foam headrest for comfort and support

Includes contoured seat, water and chip resistant metal frame, large castors, removable splash guard pommel, large capacity potty, adjustable footplate, body harness and foot straps.

FLAMINGO SEAT SHOWN WITH SIDE EXTENDERS, SWINGAWAY ARMREST AND TRAY, COMMODE PAN WITH HOLDER AND HEADREST

DELIVERY
 Delivery is approximately 2 to 3 weeks. Please contact Customer Services for more information.

1 Wheeled Shower Commode Chair

This comfortable chair will suit children who do not require high levels of postural support. It features armrests and footrests that swing away for easy side transfer and is brightly coloured to appeal to children. The padded seat has a removable centre allowing it to be used in the shower, over the toilet or as a commode using the pan supplied. The chair is highly durable and has an upholstered seat making it easy to clean and kind to the skin. It has four castors - the two rear castors are swivelling and braked to allow easy directional control and transfer.

3 PVC Shower Commode Chair

This three-in-one chair can be used as a commode, shower chair or as a safety frame over a junior toilet. The PVC frame permits safe client transfer and the safety-belt features side release buckles for quick removal. Snaps keep the belt with the chair when not in use. The removable back is made of durable vinyl coated polyester mesh. The commode pan can be removed when the patient is seated. The detachable footrest enhances comfort and the hinged seat allows easy cleaning. Four deluxe 76mm (3") locking zinc castors hold the chair in place. Height 940mm (37"). Width 470mm (18¹/₂"). Depth 553mm (21"). Floor to top of seat 457mm (18"). Weight 8.6kg.

**1 Tumble Forms 2™
Carrie™ Potty Seat**

Sammons
Preston

This potty seat is specially designed to meet the toileting needs of users with heights ranging from 1250mm (48 to 68") and weighing up to 59kg (9 1/4st). The seat is shaped to position legs in flexion and abduction to encourage bladder and bowel functions. It can be positioned over toilets or used as a free standing commode, so it's ideal for clinical, school or home use.

Features

- Lateral supports and tray to help provide trunk stability
- Flexible elastomer splash guard/seat ring protects seat and is removable for easy cleaning
- Built in anti-thrust seat helps maintain pelvic positioning
- Tumble Forms 2 brand high density foam has a washable, seamless coating that is urine and stain-resistant and nontoxic
- Lockable castor base facilitates safety with transfers

Carrie Potty Seat Includes

- Adjustable tray
- Height adjustable footrest
- Removable splash guard
- Adjustable headrest
- Hip and chest harness
- Removable footrest
- Removable bucket for use as a commode

1 Adjustable Paediatric Commode Homecraft

This brightly coloured commode has a durable powder coated steel frame and is supplied with a child's toilet seat, commode pan with lid and an adjustable strap. The plastic toilet seat has a front cut away aperture to allow personal hygiene. The commode is height adjustable and has a PU padded backrest for comfort and support. PU is a closed cell foam, which promotes hygiene and because there are no welded edges, fragile skin will not catch. Seat height adjusts from 280 to 355mm (11 to 14") with four height settings. Height of arms 420 to 496mm (16½ to 19½"). Overall width 430mm (17"). Overall depth 440mm (17¼"). Width between arms 380mm (15"). Toilet seat external width 324mm (12¾"). Internal seat width 171mm (6¾"). External seat depth 380mm (15"). Internal seat depth 325mm (12¾"). Aperture cut out 55mm (2¼"). Weight 5.5kg.

1 Svan Balance Toilet Frame

The Svan Balance Toilet Frame allows children and small adults to sit securely while going to the toilet. The frame provides support for children with limited mobility without getting in the way of other members of the family. It can switch quickly from a secure support to an easily accessible toilet for parents.

The toilet frame is made from coated stainless steel to withstand the bathroom environment without corrosion. Armrests are also padded for additional comfort. The armrests are height adjustable with three settings and the footrest can be adjusted to four different heights to ensure proper leg support. The height is easily adjusted using a simple handle, with no tools required.

1 Children's Portable Toilet Seat

This portable stable toilet seat has a reduced ring aperture with arms and a backrest to provide additional support for children when going to the toilet. The seat attaches easily to the toilet by clipping onto the existing seat and needs no extra adjustments or tools. Available with a standard or cut-out seat.

Total seat depth	340mm (13 1/2")
Total seat width	450mm (17 3/4")
Aperture depth	200mm (7 3/4")
Aperture width	170mm (6 3/4")
Weight	6.2kg

09 116 4664 Toilet Seat Standard

09 116 4672 Toilet Seat Cutout

2 High Back Children's Toilet Seat

A stable and safe toilet seat made of plastic. The seat allows the child to sit straight and a pair of easily adjustable shoulder straps offer additional support. The seat also features an armrest and splashguard. A hook and butterfly nut placed at the back of the backrest fixes the seat to the toilet. The hook is then adjusted and locked so you don't have to unscrew it when the toilet seat is lifted off. It can be cleaned in an autoclave at a maximum of 85°C for 3 minutes or washed using a mild detergent pH 5-9.

3 Low Back Children's Toilet Seat

This stable seat has a low back that supports the child helping them to sit up straight. It has a waist belt that is easy to adjust and the seat also features a splashguard. The small and large sizes are fixed with a nylon strap, which is tightened around the toilet. The medium size is fixed to the toilet with a hook and butterfly nut placed at the back of the backrest. It can be cleaned in an autoclave at a maximum of 85°C for 3 minutes or washed using a mild detergent pH 5-9.

3

1 Padded Toilet Seat Reducer

This contoured seat has a lifted back, which reduces the chance of the user sliding. A recessed slot allows the splash guard (89mm) to smoothly slide on and off the seat. The padded seat is vinyl covered and fits standard and elongated seats. Inner bowl 170 x 190mm (6¹/₂ x 7¹/₂" diameter). Overall 370 x 390mm (14¹/₂ x 15¹/₂").

09 116 0498

2 Family Toilet Seat

A durable white toilet seat made from tough polypropylene plastic. It combines a standard adult toilet seat with a fold down child size toilet seat to reduce the toilet seat size and provide secure seating for the child. It is designed to help to train children to use the toilet and is very easy to use. Fits easily onto most standard toilets, replacing the existing seat. Hygienic and easy to clean. Aperture size of child seat is 170 x 215mm (6³/₄ x 8¹/₂").

09 115 6256

£26.95

3 Toilet Seat Reducer Ring

Durable ivory plastic ring easily fits onto toilet bowl, reducing size of the toilet seat area and providing secure seating. Fits most standard toilets. Inner measurement: Length 205mm (8"). Width 150mm (6").

622801

4 Soft-Flex Splash Guard

Soft and flexible for comfort and safety. Installs quickly and easily onto standard toilet seats. Cleans easily in soapy water or autoclave. Height 140mm (5¹/₂"). Width 150mm (6"). Deflector is 110mm (4¹/₂") and has a 19mm (3/4") dip, to close gap between seat and bowl.

6232

5 Savanah Splash™ Sentry

Homecraft

Simple to fit, the Savanah Splash Sentry clips to a toilet bowl, a raised toilet seat or a toilet frame with a peg-like action. Prevents embarrassing and unhygienic accidents that can happen, for example, when children sit down to use the toilet. From a seated position the guard deflects urine down into the toilet. Simple to remove for cleaning and for getting on and off the toilet. Height 210mm (8¹/₄"). Width 140mm (5¹/₂"). Deflector is 185mm (7¹/₄").

2 Variheight Table

The Variheight Table is manufactured to an optimum size for most environments, whether for single use or in a group. It is fully adjustable in height, enabling it to suit users of differing ages and circumstances. Low gearing and a detachable handle make height adjustment easy without removing any article from the tabletop. The table frame is made from heavy duty steel with a grey nylon epoxy coating. The tabletop is covered in a yellow melamine coating for added protection. The table is available in two models, the standard version or the lowline version.

Both models are available with a plain flat surface or a tilt top version.

2 Special Tomato™ Soft-Touch™ Booster

Special Tomato® Soft-Touch® Cushions are also available in a child booster seat available in two colour choices: Cherry & Lilac/Pink.

The Special Tomato Soft-Touch Booster Seat was designed for children who have good head strength and can sit unassisted. It is intended to elevate the seating surface of children who have minimal seating needs. The comfortable, supportive, and portable seat is made from soft-to-touch material that is latex-free and anti-microbial. It has a contoured seat surface with an integratedommel promoting proper sitting posture, and the attachment strap can secure the seat to a standard dining room, restaurant, or classroom chair, as well as a carry strap.

09 120 6119 Cherry
09 120 6135 Lilac

INFORMATION
The Special Tomato Soft-Touch Booster has not been crash-tested and CANNOT be used as a car seat booster.

1 Breezi High Chair

The Breezi High Chair is designed to promote independence and integration. It is easily adjusted to suit all requirements simply by loosening the retaining screws and moving the seat and footplates to the required height and depth. The Breezi Chair is supplied flat packed and some self assembly is required. Height 780mm (31"). Width 470mm (19"). Depth 570mm (23").

AA75324

2 Teezi Breezi Low Chair

As with the Breezi High Chair, the Teezi Breezi Low Chair is easily adjusted to suit different requirements and has the added advantage of fitting under standard school tables. It is the perfect height for using computers and the support given helps with eating and drinking. The Teezi Breezi Low Chair is supplied flat packed and some self assembly is required. Height 550mm (22"). Width 430mm (17"). Depth 540mm (21 1/2").

AA75325

3 Breezi Max High Chair

A larger version of the Breezi High Chair suitable for adolescents and small adults. The chair is height adjustable and accommodates up to a breakfast bar height. Seat: Width 450mm (17 3/4"), Depth 350mm (13 3/4"), Height 750mm (29 1/2") max.

1 Special Tomato® Height Right™ Chair

The Height Right™ Chair provides stylish, comfortable seating at home or school. The design encourages interaction with peers, while providing minimal to moderate support for the child. The Height Right™ chair has a solid adjustable footrest that gives the child a safe and secure platform for proper positioning of the legs and feet. The seat and footrest adjust in height and depth, allowing the chair to "grow" with the child throughout the years. For mealtimes and tabletop activities, the Height Right™ chair is the perfect seating solution for children of all ages. Optional Padded Cushions and a contoured backrest for the seat are made from a wipe-clean Soft-Touch™, seamless material. For children that need more lateral support, the Soft-Touch™ cushions attach easily to the Height Right™ chair. The Optional Wooden Tray offers a stable surface for children that use their arms to help stabilise their trunk, as well as a suitable feeding solution.

1 PAL Classroom Seating System

Designed by a team of experienced therapists and engineers, Pal is an attractive, robust and easy to use classroom and nursery seating system for kids of 1-8 years of age, with mild to moderate postural needs. It is designed to give improved stability, which helps reduce fatigue and allows the child longer periods of concentration and fine motor activity. Available in three sizes and four colours it will help kids up to 8 years of age to participate, learn and give their full attention in the classroom.

Created for self assessment

The simplicity of Pal enables the therapist to assess the child's needs, instantly order their Pal Classroom Seat and quickly and easily set up the product when it arrives. Pal really is the simple, fast way to help kids join in with learning.

Pal is a self assessment product where you assess the size required by 3 simple measurements:

- 1. Seat depth 2. Seat width 3. Seat height**

Available in 3 sizes and in 4 colours: green, orange, blue and pink.

Tumble Forms 2™
With Anti-Microbial Protection

1 Tumble Forms 2™ Universal Corner Chair Sammons Preston

This positioning alternative keeps the child's shoulders flexed to help better focus on fine motor activities. The Corner Chair also helps maintain leg extension and reduces extensor thrust. Chair padding allows child to maintain sitting position for longer periods. One size fits children to adolescents with a maximum height of 1520mm (60"). Back height 480mm (19"), base 500 x 710mm (20 x 28").

Universal Corner Chair Features

- Broad base helps prevent tipping
- Integral abductor block supports the removable tray
- Tray is removable and adjustable to 30°
- Includes hip positioning belt and height adjustable H-harness
- Washable, stain and urine-resistant and non-toxic

2 Corner Chair Homecraft

This simple corner chair keeps the child's shoulders flexed in a long sitting position and helps maintain leg extension. It provides support at the back and sides of the child and is useful for children that are developing sitting balance. The adjustable and removable pommel helps keep the legs abducted which is useful for children who find it difficult to sit with their legs out in front of them. Includes a hip positioning belt and adjustable H-harness. The padded vinyl cushions are comfortable and easy to clean with an anti-microbial coating. Seat Depth 290mm (11 1/2"). Seat Width 430mm (17"). Seat Back Height 450mm (17 3/4"). Overall Dimensions 550 x 600mm (21 3/4 x 23 3/4").

3 Seat-2-Go Positioning Seat

This lightweight soft padded positioning seat is ideal for children that need support while sitting on the floor or on a chair. It is simple to use in a home, school or when travelling. The contoured seat prevents the child from sliding forward and improves seating posture. It has a 95° seat to back angle and double strap trunk support and belt. The fastening straps secure the seat to any chair and can be stored in the back pocket when not in use. It can also be used as an insert for a pushchair. The Seat-2-Go also has a height adjustable headrest and a depth adjustable abductor available as accessories.

1 First Class Chair

This adjustable chair is designed to provide good seating posture and support for children in the classroom, clinic or at home. It is suitable for children with mild to moderate seating requirements and has multiple adjustments and accessories to meet the needs of the child as they grow and develop. The chair is available in two sizes and its standard features include:

- Height and depth adjustable seat with a 15° anterior or posterior tilt
- Height and width adjustable armrests
- Adjustable pelvic belt to maintain proper seat position

Optional Accessories include

- Support Kit that includes an H-belt, height and depth adjustable abductor wedge and height and width adjustable lateral supports
- Adjustable height tray
- Height and depth adjustable two-piece flip up footplate with heel loop
- Height, depth and angle adjustable headrest that rotates and can be placed off centre
- Width adjustable Hip Guides
- Anti-tippers that provide additional stability when the child is seated with posterior tilt
- Four wheel Mobility Base to safely transport the child

1 Nandu Chair

Nandu is a small seat for active children. Nandu will support active children who need a little help to join in the fun whether at school or at home. It is easier to stay alert if you are comfortable, which is why the Nandu seat is padded and adjustable for a perfect fit. The Nandu is available in four sizes each with up to 17cm continuous height adjustment and up to 8 degrees of forward tilt. The backrest can be reversed to provide chest support when in the forward leaning position. This design will help children sit up to work without having to work to sit up.

Features

- Compact seating for home or classroom
- Smooth and accurate height adjustment
- Dual use chest or back support
- Forward tilt for functional seating position
- Full range of accessories available

2 Straddler Bolster Chair

The Straddler Bolster Chair was designed as a seating choice for individuals whose legs tend to adduct. It promotes sitting in an upright position, increases the hip to back angle and permits the pelvis to tilt anteriorly. It assists with sit to stand activities and encourages independence in getting on and off the chair.

Features

- Height and angle adjustable seat – height adjustable in 5 increments
- Pelvic stabilizer – width and depth adjustable
- Pelvic belt
- Knee pads
- Foot rails – provide feet and lower leg alignment. Can be lifted up if not needed

Specifications

- Seat depth 343 - 483mm (13¹/₂" - 19")
 Seat height 241 - 419mm (9¹/₂" - 16¹/₂")
 Distance between laterals on pelvic stabilizer 127 - 229mm (5" - 9")
 Product weight 5³/₄kg

1 Zebra Positioning Chair

The Zebra chair was designed for children who are unable to sit independently and it can be used at home, in hospitals, schools and rehabilitation centres. The brightly coloured upholstery and attractive design make the chair very appealing to children encouraging them to think of the chair as a toy rather than a rehabilitation device. The chair can be positioned either in the sitting or lying position to suit the child's positioning needs. It includes a wide range of accessories as standard, including; head support, back support, chest strap, side supports, pommel, arm rests, footrests and activity tray.

Features

- Height and width adjustable head support
- Width adjustable side pads support the chest and pelvis
- Adjustable chest and pelvic straps
- Depth adjustable seat allows for growth and change of posture
- Adjustable angle back support
- Removable abductor
- Footrests can be independently adjusted in height and angle
- When the backrest is completely reclined and the seat angle and footrest are adjusted the child can be comfortably positioned in the lying position
- Armrests are angle adjustable

2 Elephant Positioning Chair

The Elephant Positioning Chair is simple, functional and colourful with an attractive child friendly wood design. Adjustable side pads help to correct postural problems and the chair can be very useful for orthopaedic patients. The safety vest is equipped with an innovative "hold & pull" system which enables the carer to secure the child in the chair quickly and easily.

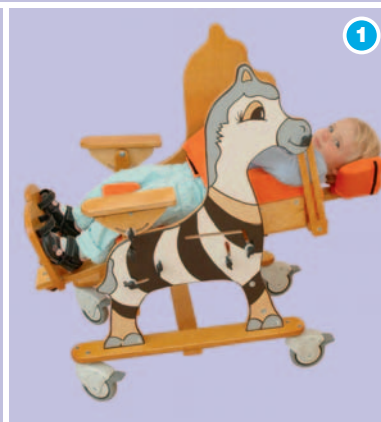

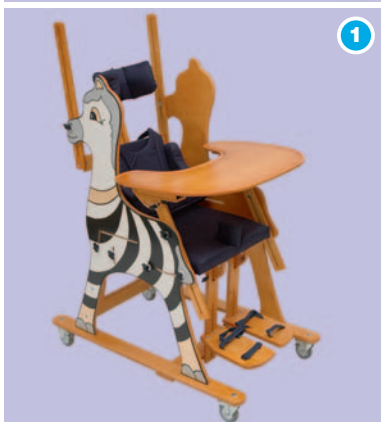

- Angle adjustable back support pad
- Adjustable side pads support the chest and pelvis
- "Hold & Pull" vest
- Adjustable and removable pommel
- Height adjustable foot rest with feet stabilising straps
- Optional adjustable headrest and activity tray available as accessories

1 The Wombat Functional Activity Chair

The Wombat is a Functional Activity Chair designed especially for children with disabilities. It is available in three sizes and is suitable for children from the age of one through to small adults. It provides outstanding levels of comfort and functionality, combined with exceptional design.

The Wombat has the following features:

- Tilt in space
- Back recline and prone angle
- Adjustable seat depth
- Adjustable back height
- Height and angle adjustable footrest

The Wombat has a fast height adjustment that is accomplished with either a gas spring or power option. Both chairs are available in four cover colours: Red, Blue, Green and Yellow for Small and Medium sizes. For Large, Black and Grey upholstery is available only. The chair is made from powder painted steel, ABS plastic and flameproof foam.

1 Strato Classroom Chair

During school years, most children are likely to spend around 15,000 hours sitting down so encouraging good sitting posture from an early age is vital. It's the key to skeletal and muscular development, boosts concentration and gives children more confidence where they often need it most – in the classroom.

Strato is an innovative classroom chair designed for children and young people from 2 years to 19 years who are able to get in and out of their chair independently but require minimal to moderate postural support while seated. The chair is fully adjustable to suit the child and varying desks and tables. The seat lumbar prompt, armrests and footrests all have a wide range of adjustment without the need for tools. It also has an easy to read adjustment indicator to record user settings.

The Strato has been designed with a slimline footprint to ensure it slides under desks and tables saving space both in the classroom and at home.

Accessories

- Height, width and angle adjustable armrests accommodate each child's needs
- 4 point dynamic pelvic strap provides additional control of the pelvis without compromising hip flexion
- Height adjustable footrest provides even distribution and support for the feet
- Personal pocket for storing small items
- Handy hook for hanging personal items

BeSafe Car Seats

The BeSafe range of child car seats combine stylish design with comfort and unrivalled levels of safety testing. The seats are thoroughly crash tested, with accessories mounted on the seat, in accordance with ECE 4403.

1 BeSafe iZi Kid Car Seat

BeSafe iZi Kid is a Group 0/1 rear facing car seat and is suitable for children from birth to approximately four years of age. It is easy to install properly reducing the risk of incorrect fitting. The seat benefits from an integrated safety foot (patented), which means the seat is capable of absorbing enormous stress. The side protection is made of a patented mix of seven different energy-absorbing soft materials and protects the child's head, neck and internal organs.

The patented integrated belt-tightener, safely tightens the belt around the seat and the shoulder belt height can be easily adjusted using a simple handle. The seat benefits from a tilt-in-space function allowing five different sleeping and sitting positions and is constructed with ventilation slits in the back.

Colour may vary from catalogue image.

The seat is supplied complete with adjustable side supports,ommel, 5 point vest harness and headrest.

09 117 5181

2 BeSafe iZi Comfort Car Seat

The iZi Comfort Car Seat is a Group 1 forward facing car seat suitable for children aged 9 months to 4 years. The seat is fastened in from the front and all clips for the car's safety belt are smooth and operable from the front. The unique iZi-Tension-Plus System allows the car's safety belt to be tightened after fastening over the child seat, without strenuous effort.

The core of the seat is a break resistant plastic covered with an extremely strong 40mm thick upholstered polypropylene foam cover. Polypropylene is soft and absorbs impact energy helping to provide maximum side impact protecting the vulnerable head and pelvis areas. The shoulder belt height can be easily adjusted and the side belts clip comfortably on the left and right sides.

Colour may vary from catalogue image.

The seat is supplied complete with adjustable side supports,ommel, 5 point vest harness and headrest.

Width between Side Supports	210mm	210mm
Approved Weight Class	0-18kg	9-18kg

1 BeSafe iZi Up Car Seat

The BeSafe iZi Up car seat is suitable for children aged 5 to 12 years (up to 135cm tall approximately) and is especially helpful for keeping children with special needs secure while travelling. This modern car seat has a handy swivel base addition which makes it extremely easy for parents to get their child in and out of the car seat, reducing manual handling risks.

The seat has been tested with adjustable side wings, pommel, adjustable headrest, vest, crotch strap, turntable and extra thigh support. All tested in accordance with ECE4404. The seat is supplied with a 5 point seat belt to hold your child securely and the option of a vest retainer to keep more active children safely in their car seat.

The optional turntable allows you to turn the seat out towards the car door and put the user in the seat, before turning it in again. You can hear a click when the turntable has locked in the direction of travel. It may be necessary for larger users to have the back supported while the seat is turned.

Both the angle and height of the back can be adjusted. The back angle can be adjusted by around 15 degrees by the lever at the side of the seat. The back returns automatically to the upright position when the child is removed from the seat.

The iZi Up car seat is also very lightweight and weighs just 8kg, making it even easier for the seat to be moved between cars or from the house to the car.

Standard features for BeSafe iZi Up:

- Crash tested with all accessories
- Special headrest, offering variable support
- Extra thigh support
- Side wings, adjustable in breadth and height
- Pommel
- Soft seat unit
- Soft back padding
- Adjustable seat depth and back height (the seat depth increases when the back height is adjusted)
- Adjustable back angle
- Ready for fitting turntable
- Ready for fitting vest
- Ready for crotch strap

MEDIUM FEEDER SEAT POSITIONER FITS CHILDREN UP TO 1220MM (48")

DELUXE FOOT SITTER INCLUDES FEEDER SEAT AND WEDGE

BEST SELLER

1

Tumble Forms 2™ Deluxe Floor Sitter

The Deluxe Floor Sitter is a combination of the Feeder Seat Positioner (item 2) and the Floor Sitter Wedge (item 3). The Floor Sitter can be used for any short term activity in the home, clinic or school as an alternative to a wheelchair or stander. It allows good basic positioning without complicated adjustments.

Features

- Shoulder harness slots allow 100mm (4") of vertical adjustment of the shoulder straps to accommodate children of different heights
- Contoured interior has a 90° seat to back relationship to provide posturally correct seating
- A 45° Hip Strap and quick release H-Belt help maintain child's position
- Seamless coverings are washable, odour, urine and stain resistant and non-toxic

3 Tumble Forms 2™ Mobile Floor Sitter

Sammons Preston

Allows the carer to move or transport a child without repositioning. Ideal for children with poor mobility but can still mobilise and build lower extremity strength by moving themselves around. The Mobile Floor Sitter includes both the Feeder Seat and the Mobile Base.

- 4444M Medium
- 4542M Large
- 4542P X-Large

4 Tumble Forms 2™ Mobile Base

Sammons Preston

The Mobile Base is available separately. The medium and large sizes are made of wood coated with Tumble Forms covering. The X-large size is made of steel tubing. All sizes have easy rolling locking rear castors.

- 4444MC Medium
- 4542N Large
- 4542S X-Large

5 Tumble Forms 2™ Feeder Seat Rover Stroller

Sammons Preston

Provides proper support and positioning for the adolescent. The stroller frame combined with the Feeder Seat is an all-terrain solution - large tyres allow transportation over uneven surfaces. Rear wheels fold for easy storage and transportation. Medium Feeder Seat fits children up to 1220mm (48"). Large Feeder Seat accommodates children up to 1500mm (60") tall and 330mm (13") wide at the hips. X-Large Feeder Seat fits adolescents up to 1830mm (72") and features front swivel wheels.

- 4585 Medium Feeder Seat Rover Stroller
- 4587 Large Feeder Seat Rover Stroller
- 4586 X-Large Feeder Seat Rover Stroller

The Rover Stroller Frame may be ordered separately.

- 4585M Rover Stroller Medium - frame only
- 4587F Rover Stroller Large - frame only
- 4586XL Rover Stroller X-Large - frame only
- Features front swivel wheels
- 458501 Tray for Medium Stroller only (Does not fit Large or X-Large)

Tumble Forms 2[®]

With Anti-Microbial Protection

1 Tumble Forms 2™ Carrie Seat

Sammons
Preston

The Carrie Seat is an extremely versatile seat that solves the positioning problems of day to day living. It has unique moulded contours that provide superior positioning compared to seats with upholstered pads. The anti-thrust seat shape helps maintain the proper pelvic position. Available in four sizes, with or without a tray and footrest (which are also available separately). It fits into most standard chairs in the home, at school or in a clinical setting.

Features

- Shock absorbing foam
- Seamless Tumble Forms 2 coating, impervious to fluid and easy to clean
- Lightweight seat, easy to remove and position
- Height adjustable neck stabiliser and four point adjustable harness
- The seat to back angle articulates 20° to help adjust to the user's upper body muscle tone

NEW
IMPROVED

1 Multi-Positioning Seat System

The Special Tomato Multi-Positioning Seat offers comfortable and proper positioning support virtually anywhere. The modular cushion seating surface allows for individualised adjustment and many years of growth. The seamless, latex free waterproof cushions are soft, yet durable and impermeable to fluids. They withstand cracking and clean easily with common disinfectants and household cleaners. Attachment straps can be used to attach the Special Tomato Multi-Positioning Seat to most standard chairs. A mobility base option is available (a tilt-in-space floor base). Thigh Depth Extension Seat Cushions allow for child growth. A five point adjustable belt system holds children comfortably in a proper seating position. The Hip flex adjustment on seat cushion provides up to 15° of flexion and 15° of extension without recline.

Internal Seat	Width	Depth
Small	228mm	203mm

1 Soft-Touch™ Sitters

These soft, supportive sitters provide a comfortable alternative type of seating. Made from a latex free seamless material, the Soft-Touch Sitters are peel and tear resistant, impermeable to fluids and withstand cracking. The soft, durable material is anti-microbial and cleans easily using household disinfectants. Available in five sizes, the Soft-Touch Sitters are suitable for very young children through to young adults. All sizes can be securely attached to standard chairs. The Soft-Touch Sitters are available in three options:

- As a sitter only
- A sitter with a tilt wedge
- A sitter with a mobile tilt wedge

All feature a soft contoured seat with an integral anti-thrust seating surface, contoured lateral and head supports, adjustable five point harness and attachment straps. The sitters with the tilt wedge and mobile tilt wedge are adjustable from upright to 25° of tilt. The mobile tilt wedge includes four swivel castors, the rear two of which can be locked.

1 Early Sitting System

The ESS is a dynamic and versatile early activity system for children from 2 years to 4 years. The system has a lightweight seat base which has a unique dynamic trunk support system that allows the child increased freedom to explore their environment and develop increased spatial awareness. The versatility of the design means it can be used for floor based activities or attached to a high chair for feeding or increased social interaction with family or peers. It can also be easily converted into a long sitter to enable extension, preventing hamstring tightening. With the attachment of the simple prone bar the product is transformed into a prone sitter which helps the pelvis into neutral alignment and assists in trunk extension to maximise function. This lightweight sitting solution is extremely portable and can be easily stored or transported for use in a wide range of environments such as home, pre-school or socially in places such as restaurants or at the cinema.

Early Sitting System

Includes Seat Base, Trunk Support, Pelvic Harness, Seat & Trunk Cushions and Chair Attachment Straps.

09 117 8318

Accessories

09 117 8326 Leg Support (includes Shell, Leg Cushion, Leg Support, Pommel and Positioning Strap)

09 117 8334 Activity Tray

09 117 8342 Abduction Pommel

09 117 8359 Flexion Roll

09 117 8367 Spacer Pads (pair)

09 117 8375 Prone Bar

All cushions are only available in one colour

2 Early Activity System

The EAS is a colourful set of flexible and versatile positional supports. It can be secured on to a hook and loop floor mat and used to deliver an effective early intervention programme for the infant in either the home or pre-school environments. The system comes with an easy to follow illustrated guide, which shows a range of best practice therapy activities. These can be used by the therapist to help develop key physical, sensory, cognitive and transitional developmental goals such as trunk control, head control, hand-eye coordination, spatial awareness, balance and strength. The Activity Development Programmes break tasks into manageable steps based on the individual's abilities and encourages progression through play.

Early Activity System

Includes Floor Mat, Sitting Support, Trunk Wedge, Head Support, 2 Positioning Straps, 2 Medium Rolls, 2 Small Rolls and Carrying Bag. The floor mat is machine washable and all other components are wipe clean.

09 117 8300

Soft-Touch™ Therapy Rolls and Wedges

These therapy rolls and wedges are very soft to the touch giving the maximum amount of comfort without sacrificing any durability. The latex free, seamless material makes the rolls and wedges peel and tear resistant and impermeable to fluids. The material also withstands cracking, includes an anti-microbial agent and cleans easily with common household disinfectant. The integrated Soft-Touch handle makes for easy handling and control. The stand-on-end design features a concave end that allows the rolls and wedges to be placed in a small area out of the way when not in use.

1 Special Tomato™ Soft-Touch™ Therapy Rolls

These rolls are designed for applications such as flexion and extension, balance, postural therapy and neuro-development activities. To provide a firm platform for therapeutic applications, there is a solid core on all rolls (except the 102mm diameter).

Tumble Forms 2[™]

With Anti-Microbial Protection

1 Tumble Forms 2[™] Rolls Sammons Preston

Adaptive shapes for rolling and rocking movements, for positioning and neuro-developmental training. Soft yet firm rolls have a solid core to prevent flattening at the bottom (except the 102mm diameter size).

	Length	Diameter
2794A	610mm (24")	102mm (4")
2794B	610mm (24")	152mm (6")
2794F	610mm (24")	203mm (8")
2794G	914mm (36")	203mm (8")
2794C	914mm (36")	254mm (10")
2794D	914mm (36")	305mm (12")
2794H	1219mm (48")	305mm (12")
2794E	1219mm (48")	356mm (14")
2794J	1219mm (48")	406mm (16")

2 Tumble Forms 2[™] Raised Rolls Sammons Preston

Offers the positioning options of conventional rolls with the stability of a wedge. Raised rolls provide a stable base for bolster sitting, side leaning or prone positioning. Smaller rolls can be used for knee or ankle flexion and cervical elongation. A hook and loop strip on the bottom of each roll holds it in place for active or static therapies.

	Length	Elevation	Width
2789A	457mm (18")	51mm (2")	102mm (4")
2789B	457mm (18")	76mm (3")	102mm (4")

2789D	762mm (30")	152mm (6")	203mm (8")

3 Tumble Forms 2[™] Rolls Rack Sammons Preston

This attractive, 1680mm (66") long, wall mounted rack holds up to 12, 150mm (6") or 205mm (8") diameter rolls or six of the larger sizes.

2797

4 Tumble Forms 2[™] Therapist Starter Kits Sammons Preston

These specially selected assortments of rolls and wedges are ideal for gross motor activities such as rolling, tumbling, and walking up or downhill. They also provide comfortable positioning for reading or fine motor activities. Rolls are adaptive shapes for rolling and rocking movements and for positioning and neuro-developmental training.

Therapist Starter Kit Pack 1

- 1 raised roll 610 x 115 x 152mm (24 x 4 1/2 x 6")
- 1 roll 610 x 203mm (24 x 8")
- 1 wedge 152 x 508 x 559mm (6 x 20 x 22") 12.5° incline

556800

Therapist Starter Kit Pack 2

- 1 raised roll 762 x 152 x 203mm (30 x 6 x 8")
- 1 roll 914 x 254mm (36 x 10")
- 1 wedge 305 x 610 x 711mm (12 x 24 x 28") 22.5° incline

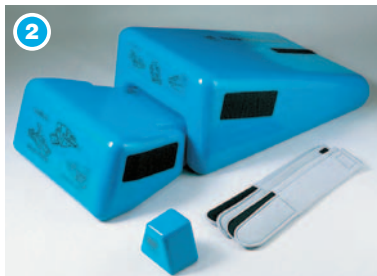

556801

Therapist Starter Kit Pack 3

- 1 raised roll 610 x 115 x 152mm (24 x 4 1/2 x 6")
- 1 roll 1219 x 406mm (48 x 16")
- 1 wedge 152 x 508 x 559mm (6 x 20 x 22") 12.5° incline
- 1 wedge 254 x 610 x 711mm (10 x 24 x 28") 20° incline

556802

Tumble Forms 2[™]

With Anti-Microbial Protection

1 Tumble Forms 2[™] Deluxe Strap Wedges Sammons Preston

This wedge includes two wrap straps, which provide added flexibility in positioning the child properly. The movable straps support the child gently, yet firmly, when and where needed to ensure the most comfortable position.

928266	Replacement Hook and Loop Pad Strips			

2 Tumble Forms 2[™] Adolescent Thera-Wedge Sammons Preston

Provides dynamic therapy and proper positioning. Specially designed to meet the needs of adolescents and small adults. This system consists of two wedges contoured on one side and flat on the other. Use together to help break extensor patterns and relax clients into a flexion pattern. Provides proper prone and supine positioning, whether used alone or together. Complete system includes one double sided 430mm (17") contoured wedge with ankle drop off, one double sided 305mm (12") contoured wedge, two wrap straps and one abductor module.

2799A
Spares Available

- 922799** Small Thera Wedge Half - no straps
- 92279901** Large Thera Wedge Half - no straps
- 92829901** Hook and Loop Strap - 660mm (26") long
- 928299** Thera Wedge Strap - hook half

3 Tumble Forms 2[™] Slotted Wedges Sammons Preston

These durable wedges offer a variety of positioning options for children and adults. Used in conjunction with a supine mat, or bed positioning, the wedges help alignment of the hip, preventing rotation and providing abduction of lower extremities. They promote comfort and optimal positioning during treatment sessions and the leg troughs offer a natural, comfortable support to lower extremities. Available in four sizes. Latex free.

	Height	Width	Depth
09 115 7759 Small	229mm (9")	610mm (24")	356mm (14")
	Floor to slot 140mm (5 1/2")

Tumble Forms 2[®]

With Anti-Microbial Protection

1 Tumble Forms 2™ Wedges Sammons Preston

Wedges are one of the most versatile therapy tools available. Ideal for gross motor activities such as rolling, tumbling, and walking on inclines. They also provide comfortable positioning for reading or fine motor activities. Can be used as an alternative to sitting when a child lacks head control, balance or trunk control.

Potential uses of wedges include

- Promoting weight bearing on upper extremities (such as shoulders, elbows and extended forearms)
- Facilitating head rising and controlled movement
- Promoting extension of hips and knees
- Facilitating rolling skills

	Height	Width	Length	Incline
2795A	102mm (4")	508mm (20")	559mm (22")	8°

1

2 Tumble Forms 2™ Biform Wedges Sammons Preston

Innovative wedges provide two wedge positions in one. Side walls provide lateral support while keeping child's arms flexed forward. Wedges can be nested together for more prone and supine positioning options. Hook and loop straps secure positioning. One side of the wedge is 50mm (2") deeper than the other side. Elevation measured from bottom of channel to top of side.

	Elevation	Base
2805A	100 or 150mm (4 or 6")	455 x 560mm (18 x 22")

Tumble Forms 2™ With Anti-Microbial Protection

1 Tumble Forms 2™ Universal Side Lyer

Sammons
Preston

Minimises the time a therapist, teacher or aide needs to monitor the positioning of neurologically impaired children. While decreasing abnormal extension, it provides a supportive learning environment enabling the child to focus on activities in front of them. Side positioning decreases abnormal extension, maintains shoulder protraction and allows the arms to be placed in midline position.

Uses Include

- Improved head control
- Improving forearm, hand function and hand-eye coordination
- Postural drainage

The 1065 x 585mm base is angled so that gravity helps position the child. Two soft easy to use straps permit infinite adjustment. Two accessory block modules 75 x 125 x 280mm (3 x 5 x 11") can be used as a headrest or for leg abduction (not included). The seamless soft upholstery is resistant to urine and is easy to clean. Measures 355mm (14") deep. Backrest 230mm (9") high.

2798 Universal Side Lyer

2796A Optional Block Modules

2

2 Tumble Forms 2™ Tadpole Paediatric Positioner

Sammons
Preston

Designed specifically for early intervention programs. Infants from birth to age three with cerebral palsy, motor delays or other motor dysfunctions benefit from this multi-use unit as an essential part of an effective therapy program. Ideal for clinic or home-based use. The latex-free Tadpole positioner includes a carrying bag to conveniently store all modules: 860 x 480mm (34 x 19") Base, Half Roll, Wedge, and Tray with Mirror for creative positioning. The therapist can create passive, active and developmental exercises for the user.

Uses Include

- Positioning (side lying, prone, supine or sitting)
- Weight bearing to particular body areas (e.g. pelvis, arms)
- Vestibular activity
- Postural drainage

The soft Tumble Forms 2 covering is easy to clean, non-toxic and latex free.

The Tadpole offers a range of positioning options:

- **Prone:** With the half roll and two lateral supports, the Tadpole Positioner facilitates active body extension, head flexion, chest elevation and forward propping of arms for midline hand touching. The mirrored unit encourages the child's curiosity. The log roll can be placed under the base for vestibular activities.
- **Seated:** The base and wedge modules can be used together for long leg or log roll sitting. Either side of wedge may be used depending on the desired degree of upright or reclined position. The attached tray provides additional support and a surface area for activities.
- **Side-lying:** The log roll can be attached to base for side-lying to facilitate control of lateral head and trunk movements. The base can be propped up to position the child for improved respiration.

Tumble Forms 2[™] With Anti-Microbial Protection

1 Tumble Forms 2[™] Universal Grasshopper System Sammons Preston

This modular system can be used to position children and adults. The seventeen different positioning modules allow the therapist to creatively position the child in an infinite number of ways.

Uses Include

- Vestibular activities
- Prone or supine positioning
- Side lying positioning
- Long leg and roll sitting positioning

The mobile base allows easy transportation of the child, while maintaining adaptive support. It has locking castors that are 63mm (2½") in diameter. With the mounting plates the Grasshopper is 76mm (3") off the floor. The soft covering is easy to clean and is non-toxic.

2 Tumble Forms 2[™] Deluxe Square Module Seating System Sammons Preston

Supports and positions children with neurological impairments. The seat comes complete with two long rectangles, two short rectangles and two triangles, as well as one ring and one disk. Base measures: 508 x 508 x 279mm (20 x 20 x 11").

2797 Deluxe Square Module Seating System

SPARES
Spares are available for these products, making them suitable for refurbishment. For full spares listing, please see pages 1353 to 1360.

1 Diana

This unit is used extensively with the care of the terminally sick child. Professionals, parents and especially the children respond to this very simple lightweight and aesthetically pleasing unit.

It has been especially designed for night positioning for abduction and adduction. The unit is placed as close to the crutch as possible to reduce hip rotation.

Reduced night tone can be observed, therefore it copes with strong extensor spasm and the unit acts as an inhibitor.

Good body symmetry is achieved just by using this unit.

Length 483mm (19"). Width 610mm (24"). Depth 229mm (5").

Weight 1.5kg.

AA75411

2 Jeffery

For night positioning, this unit copes with clients having reduced activity, eg. muscular dystrophy. It gives effective abduction and adduction. A corrective midline position is achieved and reduction of the lumbar curve has been observed. The unit is positioned as close to the crutch as possible to reduce hip rotation.

Length 686mm (27"). Width 610mm (24"). Depth 254mm (10").

Weight 2.5kg.

AA75412

3 Gustav

The Gustav unit is designed for a range of conditions.

It is extremely good for prone positioning as side rotation and slipping down are eliminated due to the unique support it provides.

Visible reduction of high tone and the reduction of muscle spasm are soon observed. Whilst prone, good shoulder rotation can be achieved. Supine and side lying are also possible,

as is secure, comfortable postural drainage.

Length 965mm (38"). Width 584mm (23"). Depth 635mm (25").

Weight 5kg.

AA75409

4 Timor

Designed for postural drainage. When placed face downwards, a child is held securely and comfortably, which is an important factor when children need long and frequent treatment sessions. When placed face up, it creates an effective pillow that gives good trunk, neck and head support. This application caters for patients with respiratory problems. It is also useful for kyphosis and scoliosis.

Length 483mm (19"). Width 571mm (22¹/₂"). Depth 356mm (14").

Weight 1.8kg.

AA75410

1 Versa Form™ Positioning Pillows (White)

Versa Form pillows provide customised, semi-permanent positioning, when standard positioners won't do or when temporary positioning is needed. Pillows are filled with small polystyrene beads which mould to the individual's body shape when air is extracted. When the valve is released, allowing air into the pillow, Versa Form regains its flexibility and is ready to be shaped again. Forms a firm support for all parts of the body uniformly, reducing the risk of pressure points. Can be used to accommodate structural deformities and help control posture. Retain their shape for up to one month. They can be used for a wheelchair seat and back positioning, in bed positioning and extremity positioning. Easily shaped and reshaped in seconds, the density and firmness can be effortlessly moulded.

The durable, polyvinyl shell is easy to clean and disinfect for multiple client use. **Vacuum pump sold separately below.**

2823	410 x 510mm (16 x 20")
2820	560 x 305mm (22 x 12")
2821	560 x 660mm (22 x 26")
2822	560 x 860mm (22 x 34")
2805	810 x 1015mm (32 x 40") - Half Mattress
2820V	Spare Valve

2 Versa Form™ Plus Positioning Pillows (Blue)

The Versa Form Plus offers all the advantages of the Versa Form in a more durable package. The high grade vinyl used in the Versa Form Plus allows it to retain its shape for up to three times longer than the standard Versa Form. It is also even easier to clean.

2833	410 x 510mm (16 x 20")
2830	560 x 305mm (22 x 12")
2831	560 x 660mm (22 x 26")
2832	560 x 860mm (22 x 34")
2834	810 x 1015mm (32 x 40") - Half Mattress

Tumble Forms 2® Three-In-One TriStander® Sammons Preston

The TriStander positioner does the job of three conventional standers. Its unique design allows prone, supine and vertical standing. A floor operated pneumatic tilt mechanism makes it easy to adjust the stander from 15° to 90°. The wide range of adjustability in the TriStander allows it to grow with the child. The adjustable module cushions can be mounted on either size frame to accommodate the unique positioning needs of the client. Each cushion is shaped to position the child securely and they are also easy to wash and disinfect. Latex free.

Tumble Forms 2®
With Anti-Microbial Protection

TriStander Features

- Adjustable, soft, cushioned pads
- Pads are seamless, impervious to body fluids and wipe clean
- Module cushions are interchangeable
- 75mm (3") double locking castors prevent roll and swivel

The module cushions and frame included with each model are also available separately. They are sized larger for the TriStander 58 and smaller for the TriStander 45. The adjustable module cushions can be mounted on either size frame to accommodate the unique positioning needs of the child. Each cushion is shaped to position the child securely. They are also easy to wash and disinfect. Latex Free.

All of the components, including the frame can be ordered separately as accessories.

1 Marvel Free Stander

Simple and effective, the Marvel vertical stander provides vertical alignment and upright support. It is easy to assemble, adjust and reposition. The Marvel offers four points of support at the foot, knee, pelvic and trunk level. It is available in two sizes.

Features:

- Foot restraint and heel cups
- Trunk support
- Lateral and front to back adjustments provide feet and ankle alignment
- Knee blocks
- Tray
- Four 4" wheels with locking casters
- Lateral and height adjustment and two positions of depth maintain hip-knee-foot alignment and assist in abduction
- Curved rigid posterior pelvic stabilizer
- Swings open for easy transfer of child. Adjustable for an exact fit
- Height adjustable. Secured with hook and loop strap and a secondary buckle for safety
- Horizontal positioning device is angle and height adjustable

2 Tugs Paediatric Supine Stander with Tray

Supports children 760 to 1270mm (30 to 50") tall at the head, trunk, pelvis, knees and feet. Simply use the hand crank to tilt the board vertically and horizontally at any angle. For those with sufficient head control, the top 356mm (14") of the board easily folds away. Armrests fold down as well for easy entry and adjust for tray tilt. Telescoping legs extend for stability while in use and retract for convenient storage. The footboard also folds flat for storage. 75mm (3") double locking castors prevent roll and swivel. The board is 1295mm (51") and includes padding, footboards, adjustable armrests, two 102mm (4") leg straps, one 102mm (4") chest strap and two pairs of support blocks. Tray is included.

3 Tumble Forms 2™ Prone Mobile Stander

Sammons Preston

The Prone Mobile Stander gives the child who cannot stand independently the freedom to mobilise at peer level. The dynamic design combines comfortable prone support with easy mobility. Wheels are slanted inward so they're easy to reach and encourage increased range of motion. The stander features padded lateral supports which adjust in both depth and length to provide flexibility in positioning. It also features a split footplate that can accommodate leg length discrepancies. User height range: 760-940mm (30-37"). Wheel diameter: 510mm (20").

1 Mini-Standy

This vertical standing frame helps the child to achieve a posturally correct and safe position. The frame is attached to a support surface allowing the child to interact and participate actively with their physical and social environment. The Mini-Standy can be used in a range of settings such as the home, school or clinic. A range of accessories are available to offer additional support to the child. The standing frame includes pelvic and chest support, knee pads, table and heel rest.

Features Include

- Smooth contoured frame to allow trunk rotation and sideways arm movement
- Slightly flexible wooden base to stimulate hypotonus
- Heel rests adjustable in width and depth
- Knee pads with adjustable width, depth and height
- Removable activity table adjustable in height and depth
- Braked rear castors

1

BIRILLO SMALL

1 Birillo™

The Birillo was conceived and designed to allow children to be able to move independently when in the sitting position. Recommended for children between the ages of 2 and 8. The triangular sitting position prevents extreme hip and trunk extension and encourages correct head and trunk posture. The abduction block supports correct posture for the pelvis. This stimulates the movement of the arms and the rotation of the trunk. The colourful and friendly appearance of Birillo encourages a child to think of it as a toy and stimulates them to safely explore their environment. This aids the development of their perceptual awareness and motor visual functions. Birillo is available in four sizes and has a range of accessories that extend its use. The height adjustable frame is made from epoxy-coated steel and the upholstery is made from fire resistant material. The padded seat has a plastic coating for extra protection from wear and tear and to aid cleaning and hygiene. The wheels have bumpers on for added protection. The handlebar is both height and depth adjustable.

1 **Dynamico™**

The Dynamico Walker is designed to give independence to children and adults. It aids the development of balance and aids in the training and development of unassisted walking. It enables a child to walk without help when independent walking is not yet possible. Five sizes of Dynamico Walkers are available for indoor use and four sizes that are suitable for outdoor use. Features include:

- A non-toxic epoxy varnished chrome plated frame
- All the castors have brakes and bumpers for added protection
- A height adjustable, padded axillary support for greater comfort and stability
- A height and depth adjustable, padded pelvic support for greater comfort and stability
- Includes an adjustable, removable and washable padded harness that provides extra support

1 Trekker Gait Trainer

The Trekker Gait trainer is a versatile walker designed to help children with the development of balance and unassisted walking. The walker provides a large amount of support and requires very little weight bearing by the child. It can be used in either the anterior (forward facing) or posterior (rear facing) position to suit the child's needs.

Features:

- Height adjustable in 25mm (1") increments
- Can be used in the anterior and posterior position
- Swivel casters have swivel locks, variable resistance, brakes and one-direction locks
- Accessories mount tool-free onto the frame and can be removed or added according to the individual user's need and abilities
- Junior & Youth Trekkers fold easily

Maximum User Weight

09 142 1874	Small	34kg (5 ¹ / ₄ st)
09 142 1890	Medium	68kg (10 ¹ / ₂ st)
09 142 1908	Large	90kg (14 ¹ / ₂ st)

Accessories

Forearm Platforms

The optional forearm platforms are height and depth adjustable. The platforms can rotate and be angled forwards or backwards to accommodate a variety of positioning requirements. The platforms can be mounted anywhere on the handlebar and the contoured armrest has arm and wrist straps.

09 142 1924	Small
09 142 1932	Large

Handgrips

Handgrips can be mounted anywhere on the handlebar and they are height adjustable and rotate.

09 142 1940

Ankle Prompts

Length adjustable, padded ankle straps maintain legs and/or feet in abduction and prevent scissoring. The spring clips control stride length. Can be used for patients with, poor motor control, ataxia and excessive adduction.

09 142 1957	Small
09 142 1965	Medium
09 142 1973	Large

Hip Positioner & Pad

These length adjustable straps assist in weight bearing allow the child to concentrate on their walking motion. The posterior straps clip onto the set of handgrips included and the anterior straps can be mounted either on the handlebar, trunk support crossbar or the forearm platform or crossbar mounting post. The removable pad provides cushioned comfort.

09 142 1981	Small
09 142 1999	Large

Trunk Support

The trunk support holds the torso at the desired angle. The support is height, depth, width and angle adjustable and padded for cushioned comfort. It stays open for easy transfers and can be mounted towards the inside or outside of handlebar. Straps adjust the fit and the angle of the user

09 142 2005	Small
09 142 2013	Medium
09 142 2021	Large

Thigh Prompts

The optional thigh prompts move with the child's gait pattern allowing weight shifting from one leg to the other, whilst preventing leg scissoring. The prompts are height adjustable and can be positioned further from or closer to the user to limit adduction/abduction.

09 142 2039	Small

1 Nimbo Posture Walker

This lightweight safety walker supports the user from behind to promote a more upright posture and trunk extension. A ratchet mechanism on the rear wheels prevents the walker from rolling backwards while soft rubber wheels adhere to a variety of surfaces and will not allow the walker to slide backwards. An anti-reverse override bracket disengages the one directional rear wheels to allow forward and backward mobility. Folds easily for transportation and storage.

Features

- Front swivel wheels enhance manoeuvrability and ease of turning
- A locking mechanism easily switches front wheels from swivel to non-swivel
- Skid resistant, non-marking and easy rolling wheels are ideal for indoor and outdoor use
- Latex free hand grips have flanged ends and place the users arms at their side

1 Crocodile Reverse Walker

The Crocodile reverse walker is designed to facilitate postural alignment, balance and phases of walking. It encourages a more upright posture, improves upper extremity position, helps develop balance and encourage the correct walking posture. Optimal support is given whilst at the same time allowing freedom of movement. The Crocodile is manoeuvrable and very sturdy, suitable for indoor and outdoor use and folds for easy transportation and storage. It is available in two sizes and has a full range of optional extras. As standard it comes with adjustable (height and width) handles, anti-reverse wheel stops and swivel front wheels with directional stabilisers.

2 Pluto Reverse Walker

The Pluto Walker helps children to move independently while providing support from behind to promote an upright posture when standing and walking. It is designed to train natural walking movements and develop the child's sense of balance. The back wheels have a braking system, which prevents the walker from rolling back. The powder coated aluminium frame is lightweight and brightly coloured to appeal to children. The walker has height and width adjustable handgrips, steerable front wheels (front-wheels with a steerlock available separately) and folds easily for storage and transportation. Available in two sizes.

1 Troja X Rollator

Small adults and children require a light, easy to manoeuvre product which supports their mobility. From this the Troja X has been born. The Troja X is a lightweight aluminium rollator that allows the user to be more active and provides support while offering freedom of movement. With only a few hand movements the Troja X can be folded compactly and then be ready to transport. The Troja X allows the user to be mobile and adding accessories such as the drink bottle holder and using the standard fitted multi use net bag to carry toys, etc makes it extremely user friendly.

Features

- The built in memory function, always remembers the user's set handle height. Put down the handles during transport, open and pull up and they stop at your settings again.
- Due to the fantastic design the rollator can tackle obstacles such as kerbs. Tread on the left or right kerblifter to raise the Troja at the front then keep on walking forward until the obstacle has been passed
- The Troja can be folded with one hand and very little effort. Just pull lightly on the grey strap in the middle of the seat and the rollator seems to fold itself in your hands.
- In the folded position the Troja X takes very little space. It stands secure and safely on all four wheels. Ideal for small rooms or can also be stored behind a door.
- The net seat and the excellent parking brakes allow the user to sit safely and take a break

2 Atila Posture Walker

The bright yellow frame makes this rollator walker popular with children. Double castor wheels in front make steering easy, and rear wheels allow smooth rolling with no need for lifting. Hand brakes, adjustable to child's ability, provide safety and control. Generous space between wheels accommodates wide or uncoordinated gaits. A great walker for children with cerebral palsy, spina bifida, and other disorders who have good upper body strength and control, but limited endurance. Folds for convenient transportation and storage. Maximum user height 1100mm (3'8"). Walker weight 6kg (13lbs). Handle height adjusts 570 to 800mm (22½ to 32"). Overall walker width 570mm (22½"). Overall walker length 570mm (22½"). Diameter of wheels 150mm (22½")

1 Fixi Aluminium Rollator

This children's rollator is exceptionally lightweight due to its powder coated aluminium construction and the brightly coloured frame makes it very appealing to children. The lightweight design allows the child to move more easily and is suitable for children with limited endurance. The airless tyres allow smooth rolling with no need for lifting and dual action brakes provide both safety and control for the child. Folds easily for storage and transportation. Seat and back supports are available as accessories. The Fixi has 5 height adjustments from 600-690mm (23¹/₂-21¹/₄") and is suitable for users up to 100kg (15³/₄st).

1 Children's Double Adjustable Elbow Crutches

These lightweight aluminium children's crutches have standard hand grips and are adjustable in height between the elbow and hand, and the hand and the ground. The angled neck reduces strain on wrists and the closed armband means that the user can retain the crutch on their arm, even if handle is released. Each crutch has a non-marking, slip resistant ferrule. Handle to armband: 170mm (6¾") to 220mm (8¾"). Handle to Ground: 560mm (21½") to 800mm (31½"). Sold in pairs.

121JDA
Maximum user weight **100 kg** **15¾ st**

2 Rebotec Children's Crutches

Strong, lightweight aluminium crutches finished in bright coloured plastic, designed specifically for children. The handle height is adjustable by 225mm and there are three settings for the forearm half cuffs. The crutches have 10 height settings. Each crutch comes with a large, non-slip ferrule and the handle incorporates a reflector for extra safety. The crutch's height range is 490 to 715mm (19¼ to 28¼"). Sold in pairs.

AA75898
Maximum user weight **100 kg** **15¾ st**

3 Rebotec Children's Quad Crutch

Strong, lightweight aluminium crutch finished in bright coloured plastic, designed specifically for children. This tetrapod design has four high-grip feet that give a stable and firm platform. The crutch provides a choice of 10 height settings. The handle height is adjustable by 220mm. The handle end incorporates reflectors for extra safety. The crutch's height range is 630 to 855mm (24¾ to 33¾"). Sold individually.

AA75899
Maximum user weight **100 kg** **15¾ st**

4 Tumble Forms 2™ Scooter Board Sammons Preston

Covered with special Tumble Forms 2™ coating, this child-friendly padded scooter board helps develop children's neuro-motor control as they propel themselves in any direction. The scooter board has two handles for the child to hold and the covering is both washable and waterproof. Benefits from hard-wearing 51mm (2") castors. Measures 610mm (24") in diameter.

4814B
Maximum user weight **45 kg** **7 st**

5 Height Adjustable Crawler Sammons Preston

Aids elementary crawling when body support is required and encourages crawling without regard for specific patterns. The waterproof leatherette body support tilts forwards or backwards for correct positioning and encourages vestibular responses. Height adjusts from 295 to 385mm (11½ to 15¼"). Suitable for children aged 3 to 9 years.

8192
Maximum user weight **40 kg** **6¼ st**

6 Plastic Scooter Boards

Used in a sitting, kneeling, or prone position, the scooter board can help develop co-ordination and gross motor skills of the upper and lower extremities. The 300 x 300mm (12 x 12"), heavy-duty polypropylene scooter has safety-grip handles and non-marring rubber swivel castors.

4841 Scooter Board
Maximum user weight **79 kg** **12¼ st**

2 Tumble Forms 2[™] Ready Racer

Sammons Preston

This is a pre-wheelchair mobility aid that combines wheelchair handling with fun, sports car styling. It helps to improve motor skills, strengthens the arms and upper trunk and allows the child to play at peer level. Designed for indoor use, the Ready Racer is easily manoeuvred in tight spaces and moves easily over carpet and rough surfaces. It requires minimal arm strength to move it. The chassis is made from high density foam and covered with a moisture proof, easy to clean covering.

The rear tyres are pneumatic. The ergonomic seat has 15° flexion at the knee and a 90° seat-back angle. It has a safety hip strap set at 45°. The low front allows easy self-transfer.

It is recommended for children aged 18 months to 5 years.

A handle that adjusts from 600 to 914mm (24 to 36") is available as an accessory.

Overall size: Length 890mm (35"). Width 560mm (22").

Depth 510mm (20").

Inner seat size: Length 584mm (23"). Width 241mm (9 1/2").

Depth 342mm (13 1/2"). Weight 13.2kg.

1 Special Tomato® EIO Pushchair

The Special Tomato® EIO Pushchair is intended to be used with children in early intervention all the way through to 8 years of age. With the EIO Pushchair, standard features include the padded hip and back laterals that help to decrease the overall width of the stroller. As the child grows, these can be removed. Special Tomato® Liners or the Special Tomato® Sitters offer more support for smaller children. As they grow, they can be removed for instant increased seat width and depth. The pushchair offers seat back recline from 25° to 75°, footrest elevation, and 8 potential years of growth.

The EIO includes lots of storage as standard features: large shopping basket under the seat, two water bottle holders and a large pocket for keys, mobile phones etc on the back of the canopy.

Features

- Reclining seat and elevating footrest to support the child
- Locking large airless swivel wheels
- Lightweight design only 10kg
- Optional Special Tomato® Soft Touch Liners are available to allow the child to grow with the pushchair
- 5-Point Comfort Wrap harness with chest strap and shoulder pads
- One-touch rear brake
- Spring suspension
- Latch to keep the pushchair folded while transporting or storing it
- Folds compactly for transport
- Legrest angle adjustment from +15 degrees to -55 degrees
- Push handle angle adjustment from +60 degrees to -65 degrees

1 Special Tomato® Jogger

A lightweight, all terrain pushchair designed for children requiring minimal to moderate positioning. It has a lightweight aluminium frame with a swivelling front wheel that can also be locked in place if required. The comfortable padded seat reclines and the protective canopy has a window so that the child is visible at all times. The Soft-Touch™ Liner easily attaches to offer contoured body support for additional positioning and the pushchair still folds easily with the Soft-Touch Liner in place. Folds easily for storage of transportation. Latex free.

INFORMATION

This product is not suitable for use during transportation in a vehicle.

1 Maclaren Major Elite Pushchair

The Maclaren Major in stylish Charcoal and Scarlet is specially designed for disabled children.

The Major has been developed to meet the demand for an everyday buggy for children, who as a result of disability have a need for portable, parent-wheeled transport. Supplied in the basic format, the Major can also be customised with numerous accessories for added comfort.

The Major is sturdily built with a square-section, aluminium chassis and 178mm (7") wheels to withstand years of rugged service. It features front swivel wheels and ergonomically optimised handles. A three position detachable foot rest, brakes and a five-point safety harness all come as standard. The Major also has the unique Maclaren folding action for ease of handling and storage. To meet the everyday demands of children with special needs the Major features:

- Weight – 6.75kg (7.5kg with footplate)
- Sturdy lightweight frame
- Easily folded to 117 x 25 x 21 cm
- 5 point safety harness
- Adjustable leg rest and handles
- Detachable rigid footrest
- Swivel front wheels for easy manoeuvrability
- Brakes on each rear wheel

Accessories including, padded seat, lateral supports, chest pads, sunshade, boot and raincover are also available separately

1 Racер Buggy

This comfortable buggy has been designed for children, teenagers and adults who have difficulty sitting and standing independently. The positioning wedge system, side pads and harnesses provide postural support even with very flaccid patients, offering the child comfort and safety without restriction of movement. The upholstery is made of breathable washable fabrics and the buggy is collapsible for easy transportation. Pumped wheels with brakes make the Racер easy to manoeuvre inside or out.

Features

- Collapsible frame for storage and transportation
- Angle adjustable backrest
- Length and angle adjustable footrest with foot straps
- Removable pommel
- Support vest
- Adjustable side pads
- Adjustable head rest
- Removable support rail
- Optional folding sunshade with removable rain cover

1 Children's Handling Belts

These children's handling belts provide a snug fit and are designed to give the child a feeling of safety and security. The bright colourful pattern is fun for the child, aiding compliance. The belts feature horizontal and vertical handles for a variety of hand positions and a hook and loop overlap fastening ensures a good fit. Extra padding in the back provides added support and the inner fabric is breathable and resists slipping. All materials will wash at 74°C for 3 minutes. Can be safely tumble dried on a low heat. Available in small and standard.

	Size	Waist
09 117 9555	Small	457 to 559cm (18 to 22")
09 117 9563	Standard	559 to 660cm (22 to 26")

SMALL

STANDARD

2 Mini Belt

A narrow, simple handling belt with two vertical handholds and two lateral handholds. It can be used with children as well as adults. Suitable for waist sizes 508 to 1143mm (20 to 45").

AA8849

2

3 Children's Rota Pad

The Children's Rota Pad enables the child to place their feet centrally whilst the carer can stand much closer and more safely than with larger pads. It is especially useful when transferring across a transfer board as it prevents foot drag during the manoeuvre. Diameter 280mm (11").

09 117 9589

3

4 Dolphin Board

The Dolphin Board is designed for assisted and independent transfer from a wheelchair to the toilet. It has the additional benefit of remaining in position during toilet use. The wheelchair cut outs allow transfer from either side of the toilet. Strong and lightweight, the board is rigid with no flex during transfer. Length 690mm (27"). Width at widest point 380mm (15"). Weight 1.65kg.

AA8834

4

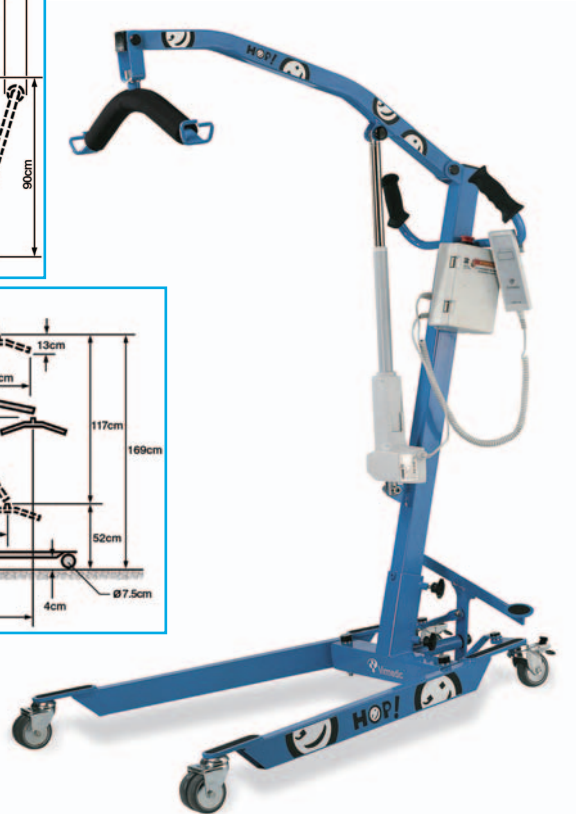

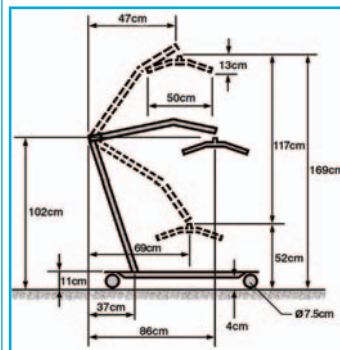

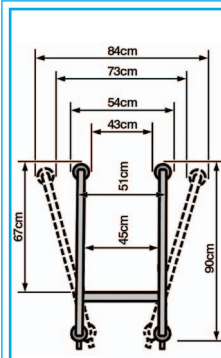

5 Hop! Lift

The reduced dimensions and friendly face design on this hoist make it the ideal choice for paediatrics. It is also excellent for use in small houses or where space is restricted. It is lightweight and dismantles into two parts for storage and transportation.

High stability, along with the correct sling choice, allows it to lift a person from the floor. A pedal system is used to open the legs of the base to facilitate use. Weight 29.3kg.

DELIVERY
Delivery is approximately 4 weeks. Please contact Customer Services for more information.

1 Aquaplast™ Watercolors™ Rolyan

Moderate resistance to stretch.

Handling Characteristics

- Bright and vibrant colours that encourage paediatric and adult compliance
- Features all the well loved benefits of Aquaplast-T
- Less likely to be lost in the laundry or in bedding

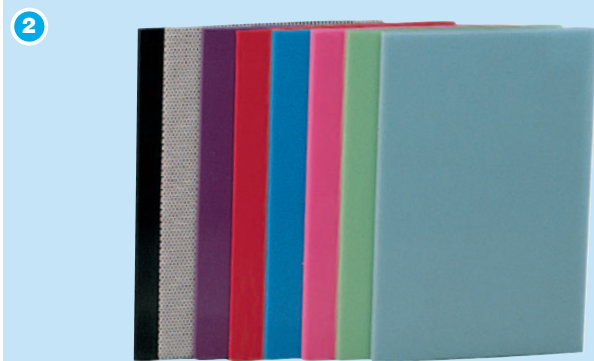

Heating and Working Times

- 1.6mm for 35 seconds at 70°C-75°C gives 1-2 minutes working time
- 2.4mm for 1 minute at 70°C-75°C gives 2-3 minutes working time
- 3.2mm for 1 minute at 70°C-75°C gives 4-6 minutes working time

Clinical Indications

- Hand and upper limb splinting
- Ideal for paediatrics
- Neurological visual and attentional deficits
- Occupational splints where conventional white materials can show stains

DID YOU KNOW...

...that all Rolyan thermoplastics are latex free, biodegradable and X-Ray translucent?

1 Junior Formthotics

Junior Formthotics are soft, flexible foot orthoses, especially developed for children. They are designed to help the child's foot assume its natural posture inside the shoe, thereby enhancing the development of the child's musculoskeletal system.

The most effective foot orthoses is the one that kids will wear. So with patient compliance in mind, Junior utilises some special features to provide gentle forgiving support and comfort.

Junior Medial Heel Skive:

The medial heel skive carefully increases the force the orthosis applies to the foot medial to the subtalar joint axis, reducing rearfoot eversion. This helps to manage rearfoot pronation without the need for excessive arch height in the orthosis, increasing patient compliance.

Junior Heel Cup:

The medial heel wedge carefully increases the force the orthosis applies to the foot medial to the subtalar joint axis, reducing rearfoot eversion.

Deep Heel Cup:

The deep heel cup increases the medial surface area of the orthoses next to the foot, making the heel wedge even more effective. The heel cup is also designed to wrap around the back of the foot providing additional rearfoot stability.

Wide Medial Flange:

The wide medial flange cradles the child's medial arch, providing long-term comfort and reducing fatigue by redistributing weight and pressure evenly.

Junior Formthotics are available in 4 sizes to suit children from about 3 to 9 years of age. They are suitable for use where careful management of the hypermobile or excessively pronated foot or encouragement of normal development and foot function is required in treatment of your paediatric patients. Each pair of Junior Formthotics contains a colouring book.

1 Tumble Forms 2[™] Deluxe Vestibulator[™] II System Sammons Preston

The free standing Vestibulator System offers your facility all the benefits of a ceiling suspension system without the installation costs and concerns. It has the capacity to accommodate a wide range of therapy modules for vestibular, neurodevelopmental, and sensory integration therapy. When used with various accessories, the Deluxe Vestibulator System provides vertical stimulation and direct flexion, linear acceleration, rotational experiences, and complete range of motion exercises. It also incorporates a 360° vertical rotation system for a smooth, unrestricted range of movement to create vertical and rotational stimulation at the same time. Height adjustment assembly allows quick changes to the proper position. The mechanism can be fixed in a stable position or set for swinging. Accessory pieces are lightweight and easy to manoeuvre. Legs are removable for portability and storage.

Deluxe Vestibulator II System Includes

Frame, net swing with positioning seat, flexidisk, prone net swing, mat, platform swing, roll swing, rope with ascenders.

Tumble Forms 2™

With Anti-Microbial Protection

1 Tumble Forms 2™ Tortoise Shell™ Therapy System Sammons Preston

Use this colourful, moulded polyethylene shell for vestibular therapy and sensory integration. Ideal for children 0 to 5 years of age in early intervention programme, either individually or in a group. Use the lid as a recessed base to prevent the shell from rocking, or on top as a flat surface for vestibular therapy. Shell is portable, easily cleaned and measures 860mm (34") wide x 460mm (18") high. The Deluxe Tortoise Shell Therapy System includes snug fitting net filled with 51mm (2") Bubble Balls for buoyancy and sensory feedback. Net fits on shell; balls remove easily for cleaning and storage.

- 2885** Shell with Lid
- 2886** Deluxe Tortoise Shell Therapy System includes Shell with Lid and Net with Balls
- 2885B** Replacement Net with Balls
- 2885C** Shell with Lid, Net with Balls and Suspension Kit

2 Tumble Forms 2™ Tortoise Shell™ Suspension Kit Sammons Preston

Suspends the shell from the Deluxe Vestibulator II, III or IV Therapy System. Kit includes all ropes and hooks necessary to attach the shell to the swing arm of the Deluxe Vestibulator II, III or IV Therapy Systems.

- 2885R** Tortoise Shell Suspension Kit

Maximum user weight **36 kg** **5 1/2 st**

3 Tumble Forms 2™ Deluxe Turtle™ Therapy System Sammons Preston

Ideal for any clinical program, the Deluxe Turtle is a complete therapy system designed for vestibular stimulation and sensory integration therapy.

System Includes

- Rocking Turtle Dome
- Padded Scooter
- T-Stool Attachment
- Net Swing with Rope and Ascender
- Therapy Record Booklet
- Complete Turtle Methods Manual

- 2882** Deluxe Turtle Therapy System

4 Tumble Forms 2™ Turtle Therapy System Sammons Preston

This system is an economical package designed for the travelling therapist. It includes everything in the Deluxe Turtle, except the Net with Rope and Ascender.

- 2880** Turtle

5 Tumble Forms 2™ T-Stool/Scooter Sammons Preston

Can be ordered separately. It features a padded Turtle System scooter and height adjustable T-Stool leg attachment. The T-Stool/Scooter is perfect for balancing and extension activities.

- 2883S** T-Stool/Scooter

SPARES
Spares are available for these products, making them suitable for refurbishment. For full spares listing, please see pages 1353 to 1360.

1 Thera-Band

I recently delivered a Healthy Schools Day in a local Primary School, where I performed a group upper limb strengthening session with a class of ten-year-old children using Thera-Band. All of the children thoroughly enjoyed using the Thera-Band and were hugely impressed with the fact that all of the major muscle groups can be easily exercised with just one piece of equipment.

Mark Leighton – Physiotherapist, North East Clinic

1 Thera-Band "Having Fun – Getting Fit" Kit

"Having Fun - Getting Fit" helps promote physical activity by offering pre-designed physical education programs for primary schools. The program is ideal for children between the ages of 3 and 10. The lessons in the program target developing children's musculoskeletal system. They offer a range of exercises that can be adapted according to the varying ages and ability levels of the children. The kit includes:

- Lesson Planner Book (12 Lessons)
- 1 x Cube/Dice
- Box of Stickers
- 1 Set of Flash Cards

Thera-Band Resistance Bands

- 6 Thera-Band Green Bands (2.5 m)
- 6 Thera-Band Blue Bands (2.5 m)

- 4 Thera-Band Red Bands (2.5 m)
- 4 Thera-Band Yellow Bands (2.5 m)
- 10 Thera-Band Red Bands (1.5 m)
- 10 Thera-Band Yellow Bands (1.5 m)

Thera-Band Exercise Balls

- 6 Yellow 45 cm
- 4 Red 55 cm

Thera-Band Stability Trainer

- 2 green (light)
- 6 blue (heavy)

Thera-Band Soft Weights

- 2 Tan 1.1 lb. / 0.5 kg
- 3 Yellow 2.2 lb. / 1.0 kg
- 1 Red 3.3 lb. / 1.5 kg

09 142 3540

2 Airex™ Balance Pad Elite

The Balance Pad Elite is designed to help co-ordinate and improve body movements and balance skills. The new waffle pattern on the top and underside of the pad, makes it non-slip.

Length	Width	Thickness	Colour	Weight
50cm	41cm	6cm	Blue	0.7kg

09 112 5566

3 Airex™ Balance Beam

The Balance Beam has multi functional therapy applications. Warm and comfortable to touch, the balance beam provides a base for an individual to work toe-to-toe improving lower and upper body stabilisation and co-ordination. Easy to clean, impervious to water, with a sanitised anti bacterial finish. Height 6cm. Length 160cm. Width 24cm. Weight 0.9kg. Applications: Physiotherapy, rehabilitation, neurology, elderly, orthopaedics, group training, and schools.

AA90002

1 Tumble Forms 2™ Barrel Crawl/Roll Sammons Preston

By gently rocking the barrel, the therapist can produce a rhythmic movement experience for the child. In time, the child can learn to shift his or her weight in order to roll the barrel. Inside diameter 305mm (12"), outside is 560mm (22").

4163B

2 Rainbow Barrel

Children love the sensation of rolling on their stomach or back. The Rainbow Barrel promotes spatial awareness and helps build confidence. In addition to crawling activities the barrel can be gently rocked with the child inside for vestibular motion. The tough, colourful PVC coated nylon covering is simple and easy to clean.

Dimensions: Length 1220mm (48"). Diameter 965mm (38").

AA75903

3 Tumble Forms 2™ Balance Beam Sammons Preston

This 6ft reversible balance beam is covered with durable, sturdy Tumble Forms 2 non-slip surface. The balance beam can be used to improve body stabilisation, co-ordination and posture. May be positioned so width is 75mm (3") or 150mm (6"). The beam is 180mm (7") high. Weight 12.7kg.

4807E

Maximum user weight

4 Tumble Forms 2™ Rocker Balance Board Sammons Preston

Provides vestibular stimulation, promotes balance and facilitates co-ordination. Made of solid wood covered with durable non-slip Tumble Forms 2 coating.

Measures: 483mm (19") square x 102mm (4") high.

819401

Maximum user weight

5 Vestibular Board

An extra large support surface makes vestibulator training easier and safer. The Vestibulator Board's broad surface accommodates larger clients and a wider variety of balance positions. Rocking the body on this board stimulates balance control and vestibular responses.

Heavy plywood top has a grey, removable, washable, nylon/tricot fabric cover and measures 1525mm (60") in length by 762mm (30") in width. Legs fold inward for easy storage.

4813D

Maximum user weight

6 Tumble Forms 2™ Soft-Top Rocker Balance Sammons Preston

The foam cushioned top is non-slip and non-abrasive, providing sure footing during rocker/balance exercises. Unit wipes clean and will not mark floors or walls. Recessed sides protect fingers against pinching. Dimensions: 455 x 610 x 152mm (18 x 24 x 6").

4811

STIMULATES BALANCE CONTROL, RUBBER SUCTION FEET ANCHOR BOARD TO COUNTER

1 Tactile Discs
 These tactile discs are designed to challenge a child's sense of touch and recognition. Each set of ten discs contains five small and five large, different structured discs, which are colour co-ordinated and are made from soft rubber. The discs offer numerous playing possibilities ranging from fundamental sensing of structures to blindfold games based on memory and recognition.
 Small Discs: 110mm diameter Large Discs: 210mm diameter
AA75615

MASTER SET

CURVED SENSORY BALANCE BEAMS

2 Sensory Balance Beams
 These tactile balance beams are designed to help develop balance and co-ordination as well as providing tactile stimulation and sensory experience for children.
Master Set
 A set of eight straight and eight curved balance beams with four square, connecting blocks that can be used to make the beams multi-directional. Assorted colours.
AA75611
Curved Sensory Balance Beams
 A set of eight curved pieces, which can be used to form a circle, 'S' shape, curved path or can be combined with straight sections to create almost any shape you desire. Each section is 490mm (19") long x 135mm (5 1/4") wide x 70mm (2 3/4") high. Assorted colours.
AA75612
Straight Sensory Balance Beams
 Set of eight straight pieces, which can be used to form a long straight path, shorter parallel paths or can be combined with curved pieces to create numerous shapes. Each section is 490mm (19") long x 135mm (5 1/4") wide x 70mm (2 3/4") high. Assorted colours.
AA75613

STRAIGHT SENSORY BALANCE BEAMS

3 Paediatric Steps
 These steps are brightly coloured to brighten any paediatric clinic and aid compliance. On one side there are four steps with a depth of 115mm (5 1/2") and on the other there are three steps with a depth of 150mm (5 7/8"). The handrails adjust from 330mm (13") to 750mm (25 1/2"). Length 1120cm. Width 940mm (37").
AA9567P
 Maximum user weight **64 kg** **10 st**

4 Nesting Steps
 This set of wooden stools is ideal for body mechanics and posture training when standing, to use at a desk or during seated mat activities. Non slip rubber surfaces prevents slipping. Nest for storage. Can be wiped clean. Set of four includes the following sizes:

Height	Width	Depth
200mm	500mm	450mm
150mm	450mm	400mm
100mm	400mm	350mm
50mm	350mm	300mm

AA9552

INFORMATION
 The maximum user weight refers to the steps only.
 The hand rails are not fully weight bearing and are for support only.

MADE TO ORDER
 This item is made to order and, therefore, is not refundable.

DELIVERY
 Delivery is approximately 4 weeks. Please contact Customer Services for more information.

1 Sens'o'Roll

This orange double physio roll has a textured bumpy surface to provide additional sensory and tactile stimulation. The double ball provides additional stability making it ideal for children or adults who have problems with balance and co-ordination. Can be used for postural relaxation or developing co-ordination and balance. Must be inflated. Dimensions: 900 x 500mm.

AA75610

Maximum user weight

**2 Gymnic™ Classic**

These exercise balls are used to improve flexibility, co-ordination and balance, also to strengthen and tone abdominals, trunk muscles, arms and legs. These inflatable vinyl balls provide excellent therapy for perceptual motor training activity, especially for children with abnormal reflex patterns or for general exercises and group activities. Seamless construction withstands rugged use by active children and adults. Distance from shoulder to finger tip equals diameter of ball required.

	Diameter	Colour

AA9080E	85cm	Red
AA9080F	95cm	Blue
AA9080G	120cm	Red

Maximum user weight

**3 Tumble Forms 2™ Neuro Balls**

Sammons Preston

Training balls for developing vestibular response and balance, and for exercise. The smallest ball is designed for rolling, pushing, throwing and kicking; the largest has a rigid core to prevent "bottoming out".

	Diameter
2769L	560mm (22")
2769M	405mm (16")
2769S	280mm (11")

4 Faster Blaster

Handy 175mm (7") long hand pump to inflate balls in a matter of seconds. Compact and lightweight, making it completely portable.

AA9055

5 Physio-Rolls

People unable to tolerate traditional ball therapy can be successful with Physio-Rolls. Motion is limited to forward and back and side to side, providing greater stability than a round ball.

Rated to 300kg. The therapist can sit on the ball and support the patients movements. Suitable for all ages, particularly good for children. Five sizes available.

	Diameter	Colour
AA9081A	300mm	Blue
AA9081B	400mm	Red
AA9081C	550mm	Yellow
AA9081D	700mm	Blue
AA9081E	850mm	Red

6 Rody

Rody is a jumping horse for therapy and play. Enjoyment and active play are assured with this fun inflatable. It can be inflated according to the size and age of the child and comes complete with one valve and two plugs.

Maximum circumference at the saddle is 72cm. Weight 1.6kg

AA9808Y	Yellow
AA9808R	Red

1 Slo-Mo Bump Balls

Made from a foam like material, these balls are soft, yet durable. They can be inflated by breath alone. No need for a pump. Can be inflated to any size between 180mm and 255mm. Comes as a set of six balls, one of each colour - Red, Yellow, Blue, Green, Violet and Orange.

AC1340

2 Spordas Success Ball

Success balls are ideal for younger children. They are easy to catch and hold because they are filled with foam pellets, which conform to the child's hand. The balls are also easy to track as air entering through the mesh panels provides a parachute-like slowdown. The balls do not hurt on impact.

The balls are 150mm in diameter and come in a set of six balls, one of each colour – Red, Yellow, Blue, Green, Orange and Violet.

AC1339

3 Access Switch

The Access switch comes with a clear screw on cover that screws onto the switch preventing the cover from coming loose or falling off. The screw on cap becomes an integral part of the switch allowing symbols or objects up to 2mm thick to be placed securely under the switch cap without fear of them popping out. Available in small (26mm diameter by 11mm high) and medium (65mm diameter x 23mm high). Both switches have a 1.4m long cable fitted with a standard 3.5mm jack plug.

	Diameter	Colour
AA75628B	26mm	Blue
AA75628F	26mm	Red
AA75628G	26mm	Green
AA75628I	26mm	Yellow
AA75629B	65mm	Blue

4 Soft Frame Bubble Mirror

Provides visual perceptual experiences, reflective learning, and aids sensory-motor integration. 230mm diameter bubbles provide multi-duplication of images that change in shape and size. The 860mm (34") square vinyl foam and acrylic mirror can sit on a table-top or mount on a wall. Mounting hardware not included. Shatterproof.

3623 Soft Frame Bubble Mirror
09 120 3991 Concave Bubble Mirror

5 Bubble Column

Equipped with a socket to enable switch operation, this beautiful bubble column is ideal for visual tracking and concentration skills. Operate the switch to see the bubbles and watch as the colour of the column slowly changes from red to green to yellow to blue. The bubbles rise and the column soothingly vibrates for tactile feedback. Height 813mm (32"), diameter 102mm (4").

AA75630

Soft Frame Bubble Mirror

Concave Bubble Mirror

1 Multi-Task Dressing Vest

Ideal for practicing dressing skills such as buttoning, zipping and snapping. For children or adults with compromised fine motor skills, apraxia, hemiplegia and cognitive deficits. Very durable cotton duck with 76mm (3") elastic on both sides for room. Hand or machine wash in cold water. Lay flat to dry. Available in four sizes. Latex on elastic side straps only.

Note: This product contains natural rubber latex.

Item	Description	Length	Width
929000	Child Vest	445mm	356mm
929001	Small Adult Vest	521mm	445mm
929002	Medium Adult Vest	584mm	533mm
929003	Large Adult Vest	635mm	584mm

2 Dressing Cube

A colourful cube, excellent for teaching children to improve their hand-eye co-ordination.

Includes six different skills - children can practice how to:

- Button
- Zip
- Buckle
- Snap
- Lace
- Hook & loop

Dimensions: 203 x 203 x 203mm (8 x 8 x 8")

Made of 100% cotton. Machine washable, dryer safe.

For ages 2 to 5.

4948

3 Parachute

Whether standing or sitting, groups of children or adults can enjoy the visually stimulating activity of raising or lowering this large parachute. Used to improve upper extremity range of movement, trunk strength and cardiovascular fitness. Perfect for co-operative activities. Made of multi-coloured, durable nylon with evenly spaced handles.

Soft balls can be bounced on the top having the participants attempt to keep them on the parachute. Available in three sizes.

928131 3.6m (12') Diameter

8152 1.83m (6') Diameter

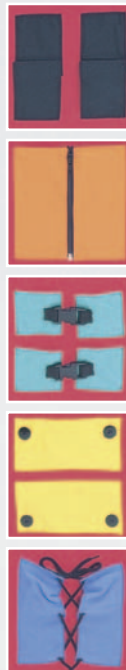

4 Foam Balls

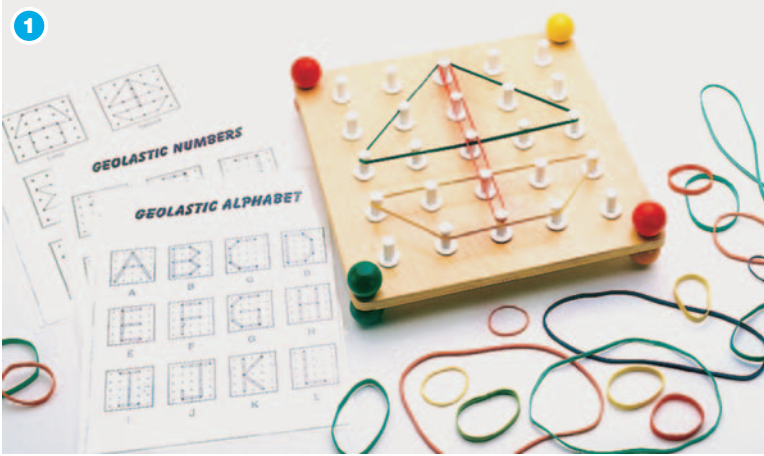

Safe and lightweight, 180mm foam balls come in packs of six. Excellent for gross motor skills and hand-eye co-ordination.

8218

ONE SIDE OF VEST HAS BUTTONS, THE OTHER SIDE HAS SNAPS AND A ZIPPER

1 Geo-Lastic Art

This kit uses colourful rubber bands of various sizes to create geometric designs. The complexity of the pattern can be varied to help patients improve cognitive skills. Ideal tool to encourage tasks that cross midline. Kit includes wooden board, 15 smooth plastic pegs, soft and safe elastic bands and pattern book. Wooden base. Dimensions: 300 x 300 x 50mm (12 x 12 x 2"). **924970**

2 Complex Form Board

Rolyan

This complex board has 12 shapes for evaluation and training in form constancy, position in space, shape recognition and sequencing as well as teaching compensatory techniques for loss of visual field. Dimensions 620 x 410 x 13mm (24 1/2 x 16 x 1/2"). Shapes are 22mm (8 1/2") high. Colour of shapes may vary. **A4161** Set

3 Pegboards and Pegs

To improve hand-eye co-ordination, fine motor skills and cognitive skills. The tall, slim unbreakable pegs are easy to grasp and place. Each peg fits smoothly into the crepe rubber pegboard or into the top of another peg.

- 836701** 50 Tall Stacker Pegs
- 836702** 100 Tall Stacker Pegs
- 836703** Giant Pegboard (100 holes) 432mm
- 836704** Large Pegboard (100 holes) 292mm
- 836705** Big Little Pegboard (25 holes) 203mm

4 Pegboard with Round Pegs

Basic 30 hole pegboard that can be used easily regardless of age and user level. Consists of a 305 x 255mm (12 x 10") wooden board and 30 pegs in five colours. **8181**

5 Sensory Motor Kit

12 different tactile experiences all in one bag. Take it with you wherever you go. Smaller items help develop fine motor skills, while larger items help develop gross motor skills. Includes rings, tactile balls in various sizes and styles, water mat, koosh balls, and tangle. Great for kids of all ages! **09 116 3898**

1 Stereognosis Kit

Rolyan

The kit consists of 17 common items and matching cards for evaluation of stereognosis. The 80 x 130mm cards are laminated for long term use. Each card has a drawing and the name of the item in English (and Spanish). On the back of each card is the name of the item for use by the evaluator. This kit can be used in conjunction with the Rolyan Sensory Testing Shield.

A4542

2 Sensory Testing Shield

Rolyan

A moulded plastic shield that incorporates many features to assure totally occluded vision and patient comfort during administration of a test. The moulded ridge holds the cards for stereognosis and other types of testing. The legs are removable for convenient storage. All of its parts can be cleaned with a disinfectant.

A4541

3 Cognitoys Set

Helps cognitively and physically challenged children and adults improve reach, range of motion, midline crossing, co-ordination and upper extremity strength and endurance through graded, repetitive exercise. 16 brightly coloured wooden shapes and detachable wooden dowels in four heights up to 851mm (33 $\frac{1}{2}$ "") on base can be used for a variety of exercises and to promote colour and shape recognition. Exercises can be performed standing, sitting or from a wheelchair. Sturdy, wooden base measures 305 x 889 x 19mm (12 x 35 x $\frac{3}{4}$ "").

5152

1 LOTCA™ II Battery

Revised second edition of this standardised cognitive assessment battery. The test, which was designed especially for therapists by the Lowenstein O.T. Department, Israel, includes standardised testing procedures. Consists of four major areas and 20 subtests including orientation, perception, visual motor organisation and thinking operations. Can be used for evaluation of stroke patients, traumatic brain injury patients and patients with other neurological impairments. Can also be used with psychiatric or geriatric patients to determine cognitive dysfunction. Includes directions and test materials in a portable plastic case.

4910 Set

2 PDMS-2 (Peabody Development Motor Scales - 2nd Edition)

The second edition of this evaluation tool has been improved based on research and feedback from users. This package provides both in-depth assessment and training or remediation of gross and fine motor skills for children from birth through to six years. Six subtests (reflexes, stationary, locomotion, object manipulation, grasping and visual motor integration) reliably measure interrelated motor abilities and have been standardised on 2003 children. Allows users to determine a child's Gross Motor Quotient, Fine Motor Quotient and Total Motor Quotient. The new Profile/Summary Form records a child's scores - age equivalents, raw scores, percentiles, standard scores - and graphically displays the child's performance to determine strengths, weakness and progress. Kit includes 25 new Examiner Record Booklets, Illustrated Guide for Administering and Scoring, 25 Profile/Summary Forms, the Peabody Motor Activities Program Manual, the new black and white Peabody Motor Development Chart, manipulatives, and a sturdy storage box.

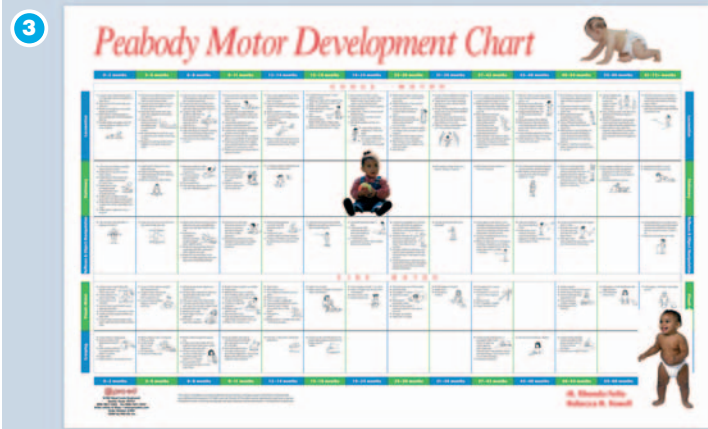

- 804302 PDMS-2 Complete Kit
- 804303 PDMS-2 Examiner Record Booklet (25)
- 804304 PDMS-2 Profile/Summary Form (25)

3 Peabody Motor Development Chart

Provides the examiner with a convenient reference for the motor skills measured by the PDMS-2 and the ages at which 50% of the normative sample performed the skill. Each of the subtests is represented, along with numerous illustrations of children demonstrating the behaviours described in the text. Measures 96.5 x 66cm. Latex free.

927035

4 DOTCA-CH™ Battery

Developed on the basis of the LOTCA™ battery, DOTCA-Ch provides a measure of cognitive assessment and learning potential for children ages 6-12 with special needs. It consists of 22 sub-tests in 5 cognitive areas: Orientation, Spatial Perception, Praxis, Visuomotor Construction and Thinking Operations. For each sub-test there is an option of a structured 5-step mediation. Measures of short-term memory and time of performance are included in the visuomotor organisation area. The goals of the assessment are to identify the strengths and deficits of the child in the different cognitive areas and measure learning potential, as well as to recognise the child's thinking strategies utilising dynamic procedures.

Data for typical children ages 6 to 12 years, groups of children with learning disabilities and brain injury was collected to establish the standardisation, reliability and validity properties of the test.

Administration time is approximately 1 1/2 hours. It is possible to administer the test in more than one session.

09 116 3658

1 Tar-Grip™ Floor Target Game

The Velcro hook target game allows the development of gross motor skills and hand-eye co-ordination. The target grips the special loop balls when they come into contact with it. Non-slip rubber feet keep the target in place. Includes four balls. Dimensions: 610mm (24") square.

8363

2 Giant Tumble Tower

A garden version of one of the most popular indoor games. Build a tower over four feet tall. A game of strategy and dexterity, providing hours of fun for two players or teams of players.

AC1154

3 Noughts and Crosses

Another classic game that promotes creative play and cognitive skills. Large easy to hold shapes for those with poor grasp. Wooden board is 292mm (11½") square. Pieces are 63mm (2½") high.

8188

4 Large Print Scrabble

Traditional Scrabble game but with a clearer board and larger letter tiles to aid recognition. Developed in association with the RNIB. Tile size: 25 x 25 x 5mm (1 x 1 x ¼").

AC1480

5 Shape Dominoes

A set of 21 plywood dominoes with raised, colour-coded wooden shapes. Ideal for shape and colour matching activities as well as traditional domino games.

AC1481

6 Bowling Set

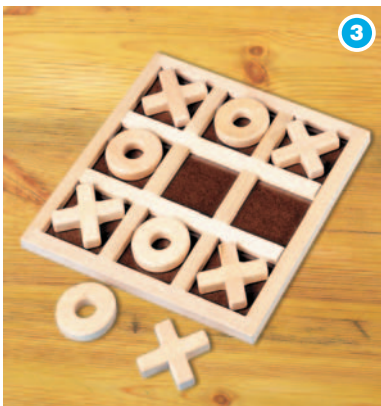

Both ambulatory and wheelchair-bound children over 3 years in age and adults will enjoy the game of bowling while improving gross motor skills, co-ordination and hand-eye co-ordination. Made of soft, dense foam, this set includes six 180mm (7") pins, one bowling ball and a placement mat. Can be used both indoors and outdoors. Wipes clean with a damp cloth. Colours may vary.

920210

7 Mega 4 in a Line

A classic game in a giant size! Lightweight yet tough construction, it is suitable for indoor and outdoor use. Size: 1340 x 570 x 1080mm (52¾ x 22½ x 42½").

AC1485

1 Paediatric Feeding Evaluation Kit Homecraft

Specifically designed for paediatrics, this kit contains a variety of special eating utensils selected to help explore and solve the problems that delay or prevent self feeding. The 30 items included represent most areas of need. The kit is packed in a handy carry case for convenient use and includes:

- AA5575 Junior Caring Cutlery Knife
- AA5576 Junior Caring Cutlery Fork
- AA5550 Lightweight Foam Handle Knife
- AA5556L Lightweight Foam Handle Left Fork
- AA5557R Lightweight Foam Handle Right Spoon
- AA5597Y Nelson Knife
- AA5595 Splayed Fork with Slim Handle
- 124001 Paediatric Spoon - Red
- 124008 Paediatric Built Up Spoon - Blue
- 1371 Paediatric Utensil Holder
- 109003 Flexible Tablespoon
- AA75504 Paediatric Easigrip Cutlery - 1 Set
- AA75505 Paediatric Easigrip Cutlery (Built Up)
- 1002 Child's Feeding Spoon
- 110101 Adjustable Weighted Teaspoon
- 920359 Rocking T Knife
- AA6110 Closed Cell Foam Tubing - Paed Pack
- AA5662W Incurve Plate Surround
- 1548 Suction Scooper Bowl
- AA5610 Manoy Plate
- AA75506 Doidy Cup
- AA5720 Two Handed Mug
- AA5710W Caring Mug - Bulk Pack
- AA5723 Non Spill Cup
- 1145 Nosey Cutout Cup - 236ml
- AA5759 Teapot Feeder
- AA6812F Dycem Anchorpad - 190mm Diameter - Red
- AA6830B Dycem Grippistrip - 2m
- A684403 Partitioned Scoop Dish with Lid
- AA75503 Paediatric Feeding Evaluation Kit**

2 Suction Scooper Bowl

This 110mm (4 1/2") dish has a suction base attached. The curved rim guides food onto the spoon whilst the slip-resistant base helps keep the bowl firmly in place. Once the suction ring has been removed, the bowl is dishwasher safe. Colours may vary.

1548

3 Closed Cell Foam Tubing

Use for building up tool and utensil handles to give greater control to people who lack co-ordination, strength or gripping ability. Tubing has a slip resistant outer layer and is dishwasher safe. Colour assortment, bright for paediatrics, includes two bright Yellow, two bright Orange and two bright Blue. The pieces can be cut to the required length. Length 300mm (12"). Inside diameter 6mm (1/4") to 20mm (4/5"). Outside diameter 25mm (1") to 29mm (1 1/8").

AA6110

DISHWASHER SAFE
This product is suitable for use in a dishwasher.

1 Junior Caring Cutlery

A range of knife, fork and spoon designed primarily for children. With small utensil heads, these are easy to clean and dishwasher safe. Stainless steel cutlery. Length of handle 102mm (4"). The knife and spoon weigh 24g. The fork weighs 22g.

- AA5575** Knife
- AA5576** Fork
- AA5577** Spoon

2 Maroon Spoon

A narrow, shallow bowl makes it ideal for feeding therapy. Tough and break resistant (do not use with clients with severe bite reflex). Dishwasher safe, no heated drying. Comes in packs of 10.

- 920273** Small 146 x 25mm
- 920274** Large 152 x 32mm

3 Paediatric Weighted Utensils

Child size utensils that are weighted to stabilise the hand. Shaped red plastic vinyl handles. Stainless steel utensils. Handles are 22mm in diameter and 82mm long. Each weighs approximately 110g. Dishwasher safe up to 80°C (180°F).

- 110201** Fork
- 110202** Teaspoon

4 Etac Feeding Cutlery

The feeding cutlery has soft round edges for a comfortable feel in the mouth, and a shape that makes it easy to give food to people who cannot open their mouths very much. The long handle means the person being fed can also hold the cutlery. The handle gives the feeder a comfortable grip and good balance. The spoon and fork are 220mm long and the small spoon is 200mm long. Dishwasher safe.

- 09 116 1967** Feeding Spoon Small
- 09 116 1959** Feeding Spoon Large
- 09 116 1975** Feeding Fork

5 Etac Feed Angled Spoon

The angled spoons make it easier to move the hand from plate to mouth, and are suitable for children and adults with small hands. The bowl is adjustable, and the handle has a combined support and stop peg. The spoon is suitable for a child's or small hand allowing the spoon to be held near the bowl head. The strap offers additional support for children with poor gripping ability. Total length 160mm. Weight 40g. Dishwasher safe.

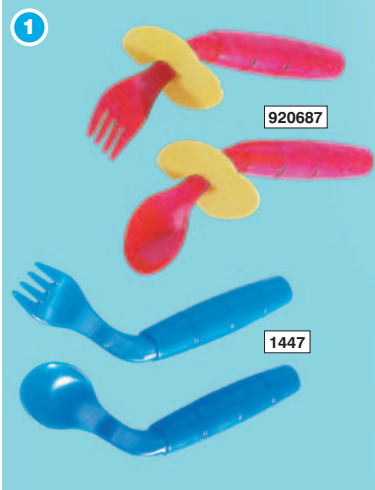

- 09 116 1983** Right Handed Spoon
- 09 116 1991** Left Handed Spoon

DISHWASHER SAFE
This product is suitable for use in a dishwasher.

RETAIL PACKAGED
This product is supplied in retail packaging.

1 EasieEaters™ Curved Utensils

Lightweight and easy to grip plastic utensils that are angled to promote greater success with hand to mouth feeding. Built up handles make them easier to hold and a safety shield prevents utensils from entering the mouth too deeply. Set includes fork and spoon. Dishwasher safe, colours may vary. Handle 76mm (3") long.

- 1447** Right Handed Utensils
- 144701** Left Handed Utensils
- 920686** Right Handed with Shield
- 920687** Left Handed with Shield

2 Flexible Paediatric Cutlery

These versatile utensils wrap easily around the hand and/or wrist to secure in the position required. The foam handle is 19mm (3/4") in diameter and may be customised to fit a user's grip. Includes a 250mm (10") Velcro brand hook and loop strap that further secures the utensil. 250mm (10") long. Weight 50g. Handwash with warm, soapy water.

- 109501** Flexible Fork
- 109502** Flexible Spoon

3 Paediatric Easigrip Cutlery

Curved spoons and forks give children a more natural grip on the handles. Moulded of sturdy plastic. Two options available, two sets (two forks, two spoons) in one package or one fork and one spoon with built up handles in the other.

- AA75504** Two Sets
- AA75505** Built Up Set

4 Paediatric Steady Spoon

Uniquely designed spoon allows those who could not ordinarily feed themselves to achieve independence. Five moving parts and counter weights keep the spoon bowl level no matter what the child's arm position or level of tremor preventing food spillage. A hook and loop strap on a built-up handle eliminates the need for a strong grasp. Ideal for users with Cerebral Palsy, head injury, Muscular Dystrophy and any type of tremor or lack of co-ordination. The spoon's 142g (5oz.) weight gives added proprioceptive input for children with PDD and SI problems. Black hook and loop strap included. The Bowl is a youth teaspoon size. Dishwasher safe up to 104°C (220°F). Latex free.

Dimensions

- Handle: 114mm (4 1/2") long x 29mm (1 1/8") in diameter
- Handle and bowl: 197mm (7 1/2") long
- Strap: 102mm (4") long

AA75502

5 Paediatric Plastic Base Utensil Holder

This half-cone shaped plastic base utensil holder angles the utensil away from the palm to make eating easier. The holder is made of washable nylon and plastic. Utensil not included. Latex free.

09 100 1452

DISHWASHER SAFE
This product is suitable for use in a dishwasher.

1 Caring Mug Homecraft

This mug has a wide stable base with two large contoured and angled handles, which enables it to be held in the correct position for drinking. The lid has a well designed spout, and matches the Caring Cutlery range. It is useful for those with tremor or who cannot sit upright. The mug is suitable for use in a microwave, but not recommended for dishwashers. Capacity 300ml (11fl.oz). Weight 176g.

		Aperture Size

EASY TO ADJUST HANDLE

3 Sure Grip Mug

This feeding cup has an angled spout to facilitate ease of use. Grooves in the cup ensure a better grip and the unique valve enables flow control and no spills. Also available in a variety of colours so the cups can be used to differentiate between users or contents, or simply to add interest. Weight 75g. Capacity 200ml (7fl.oz). Microwave and dishwasher safe up to 130°C.

AA5723	Clear
AA5723B	Blue
AA5723I	Yellow
AA5723E	Green
AA5723F	Pink

4 Cup with Temperature Controlled Lid

This version of the Sure Grip Mug above has a lid that changes colour when the contents are hotter than body temperature. If liquids hotter than 37¹/₂°C (96°F) are put into the beaker the lid will change colour from blue to pink, alerting the user to be careful when drinking. The lid is safe and easy to use and can also be used with a straw. Do not leave lid in direct sunlight.

AA5769

5 Kennedy™ Cup

This spill proof cup is perfect when sitting or reclining. The easy to grip handle can be picked up by weaker hands and is suitable for right or left handed persons. The lid screws on tightly to prevent leaks and accepts any standard disposable straw. This lightweight, durable cup holds 200ml (7fl.oz) of warm or cold liquid. Dishwasher safe to 80°C (180°F).

1249

6 Pat Saunders Straws

These straws have one-way valves which stay filled with fluid, even after removing the straw from a user's lips. This feature eliminates the possibility of sucking in too much air while drinking. The clip-on straw hooks onto the side of a glass or cup to prevent the straw from falling out. Each package includes one 254mm (10") and one 178mm (7") straw.

1110

1 Doidy Cup

This unique training cup is specially designed to encourage babies to drink from a rim rather than a spout. Babies as young as 6 months find the two handled cup easy to hold and to drink from as the natural action used is the same as in breast feeding. Helps prevent tooth decay and speech problems associated with weaning from the bottle. Colours may vary.

AA75506 192ml (6½ fl.oz) Capacity

2 Flexi Cups

These flexible cups with cut outs can be gently squeezed to change the shape of the cup lid. Liquid is visible through the plastic to aid with feeding. The green cup is stiffer and designed to be used independently. Dishwasher safe and latex free.

920270 Pink Flexi Cups 30ml (1 fl.oz.) - Set of 5

920271 Blue Flexi Cups 59ml (2 fl.oz.) - Set of 5

920272 Green Flexi Cups 207ml (7 fl.oz.) - Set of 5

3 Cup with Built-in Straw

These cups are ideal for children and adults who need to drink using a straw. The built-in straw eliminates the need to buy and keep track of additional straws as well as preventing straw movement to aid drinking. To prevent air ingestion, the straw has access to liquid at the bottom of the cup.

555671 Small, green cup 384ml (13 fl.oz)

555672 Large, yellow cup 473ml (16 fl.oz)

4 Provale™ Cup

Created to preserve the dignity of those who suffer from dysphagia or disorders associated with difficulty swallowing. The Provale Cup can be filled at the beginning of the meal and the diner can drink at will, on their own. The cup delivers a measured amount of liquid (5ml or 10ml) to the drinker to prevent choking. The cup also allows cleanup to be limited to one piece of dinnerware rather than the several parts of other feeders. Optional one or two easy-grip handle or no handle design.

551845 5ml Dispenser Blue

551846 10ml Dispenser Brown

5 Waterproof Bioprene Bib

This large bib is made of medical grade neoprene called "Bioprene" and has good shoulder and chest coverage. The Bioprene material is treated with an active antimicrobial, which kills most bacteria, fungi and yeasts, including MRSA, to ensure a sterile product at all times. The bib has a soft, rubber inner layer which is waterproof and repels all liquids, and a top nylon layer which is wipe clean and stain proof. It also has a unique, fold out pocket so it can be used with or without the pocket. Suitable for children aged 5 and over, teenagers and small adults. Neck diameter 110-125mm (4¼ to 5"). Shoulder width 290mm (11½"). Total length 500mm (9¾"). Machine washable at 40°C.

09 115 8161

DISHWASHER SAFE

This product is suitable for use in a dishwasher.

1 Easi-Grip Scissors

Easi-Grip Scissors are extremely lightweight with plastic handles and stainless steel blades. The continuous loop handle automatically reopens the scissors when pressure is released. As they require only a gentle squeeze to operate them, they can be used between fingers and thumb or fingers and the palm of the hand. Ideal for early scissor use, skill development or for those with weak hands. They are supplied with a blade guard and are available with round or pointed blades. They can be used either right or left-handed.

	Length	Style	Hand	Weight
AA6710	45mm	Round End	Right	30g
09 118 2617	45mm	Round End	Left	30g
AA6714	45mm	Pointed	Right	30g
AA6716	75mm	Pointed	Right	46g

Mini Easi-Grip Scissors

AA6711	24mm	Round End	Both	16g
---------------	------	-----------	------	-----

2 Self-Opening Scissors

Self-Opening Scissors look like conventional style scissors but have been fitted with a spring so that they automatically reopen after pressure is released. They are supplied with a blade guard and are available in either left handed (Green) or right handed (Blue) styles. Blades are round ended, stainless steel. Blade length 45mm. Weight 30g.

AA6740R Right Handed

AA6740L Left Handed

3 Dual-Control Training Scissors

A double set of handle loops allows the therapist and patient to simultaneously complete the cutting action. The patient uses the set of loops furthest from the blade whilst the therapist uses the loops closest to the blades. This allows the therapist to teach control, strength and guidance whilst the patient learns the action of opening and closing the blades. Available in either left handed (Green) or right handed (Blue) styles.

		Blade Length	Blade Style
AA6741R	Right Handed	45mm	Round End
AA6741L	Left Handed	45mm	Round End
AA6742R	Right Handed	75mm	Pointed
AA6742L	Left Handed	75mm	Pointed

4 Universal Art Tool Holder

These innovative art tools provide adaptive holding methods to paint with ease. The tools fit children aged six to 12. The Universal Art Tool Holder (cuff) fits right or left hand, and holds the art brush in palmar pocket using the plastic 'L' attachment. Made of soft nylon neoplus It has a Velcro brand hook and loop closure.

Measures: Length 65mm (2½"). Diameter 25mm (1"). Shaft 30mm (1¼").

954801 Universal Art Tool Holder

5 Mounted Table Top Scissors

This device has scissors mounted on a plastic base, with rubber non-slip feet. The scissors are operated by depressing the "T" shaped handle and the spring will automatically reopen the blades once the pressure is released. Suitable for use by those with only one functional hand.

09 116 3542 45mm Round Ended Blade

09 116 3559 75mm Pointed Blade

6 T-Bar Brush Holder

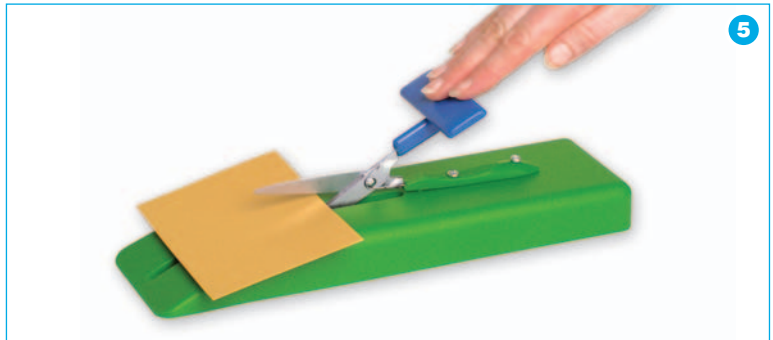

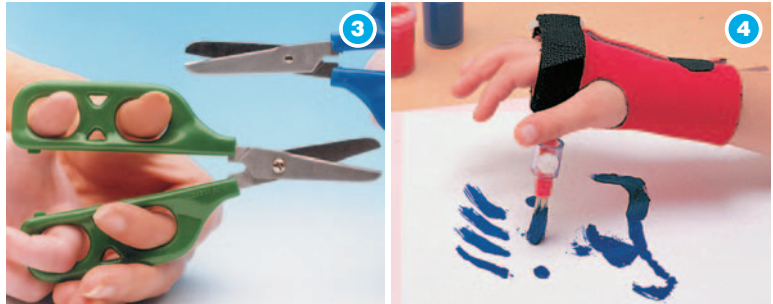

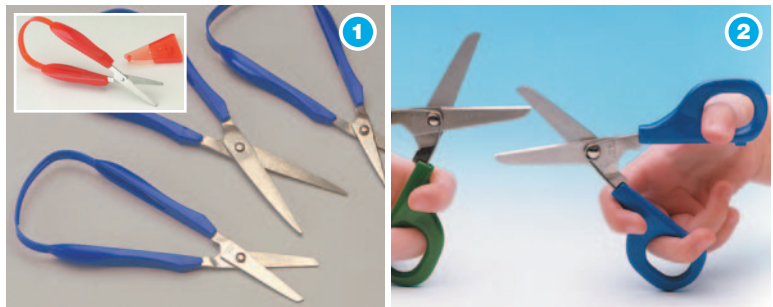

The T-Bar Brush Holder provides leverage and added stability for an art brush.

954803 T-Bar Holder

7 Scissor Assessment Kit

A kit designed specifically for Paediatric Occupational Therapists and other professionals working in the field of special education. The kit contains 15 different adapted scissors of 10 different styles together with guidance notes on their benefits and applications. Left handed versions of the scissors are included where available and all self-opening types are provided with blade guards for safety when not in use. The comprehensive kit allows the therapist to find the most appropriate scissors for their client. Supplied with a carry case to provide storage and easy transport.

09 116 3567

1 Etac Contour Rheumatic Pen

This ball point pen with lightweight plastic case is especially suitable for arthritics and rheumatics. The built-up contoured shape is easy to grip, and virtually no pressure is required when writing. It can be weighted with sand etc for those with a tremor. Length 150mm (6"). Diameter 18mm (3/4"). Weight 27g. Parker replacement refills are available at any good stationers.

AA7217

2 Steady Hand Magnetic Writing Instrument

A lightweight, ergonomically designed magnetic writing instrument. Includes a magnet located in the base, standard metal work surface (12 x 18"), and 3 buffer caps of varying thickness that accommodate all levels of tremors (mild, moderate, and severe). Suitable for children and adults.

920253

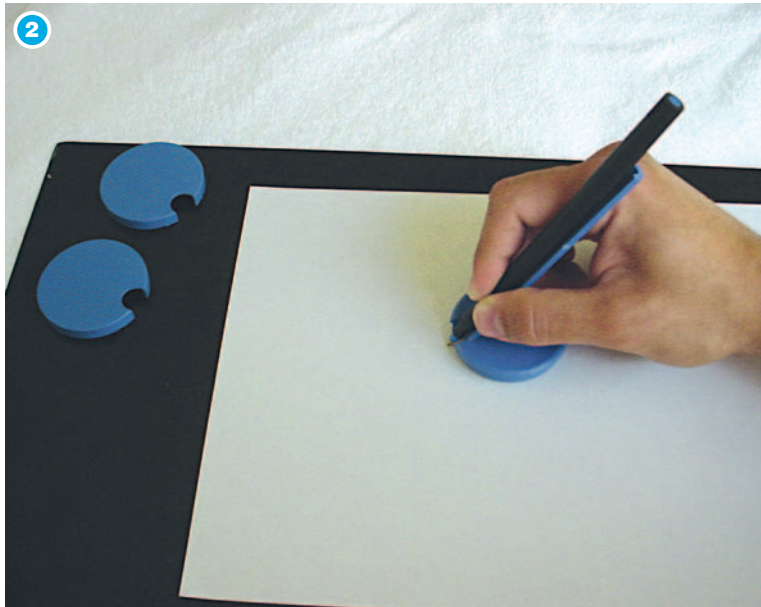

3 Ring Pen

Takes most of the tremor and muscle pain out of handling a pen. One finger goes through the ring creating a solid grip and the ergonomically designed barrel provides a natural resting place for the writing finger. The barrel fits snugly between two other fingers so there is no pressure and no pain.

Can also be used as a toe pen. The pen has blue ink and includes two refills.

AA7111

AA711101 Replacement Refills

1 Pen and Pencil Holder

This soft PVC moulding slides on to normal sized pens and pencils to make them easier to grip and control writing. Internal diameter 8mm. Available in packs of 3. Weight 22g.

AA7200SY Mixed - Retail Packed

AA7200SW Mixed - Non Retail

2 Weighted Universal Holders

These helpful holders have plastic vinyl contoured handles for improved grasp and control. They securely hold most round or irregularly shaped items by means of three adjustable set screws. Diameter 22mm (7/8"). Length 89mm (3 1/2").

Holds items 7mm (9/16") in diameter. Comes with No. 2 pencil and Allen key. Weight 112g.

402101 Adult Size

402102 Paediatric Size

555734 Standard Handle

3 Grippit

The Grippit's simple design enables those with poor grip to control and hold a range of implements - pens, pencils, toothbrushes, knives, forks, etc. The larger ring is placed on the thumb or finger and the item to be gripped is slotted into the smaller ring. Suitable for both left or right handed use. The design ensures that it is impossible for the user to drop the implement. Supplied in packs of 3.

AA7204A Small

AA7204B Medium

AA7204C Large

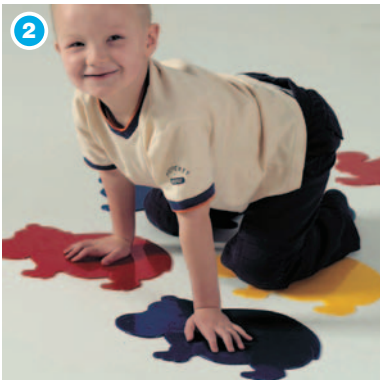

4 The Pencil Grip

Encourages writing with full hand/arm action. Pear shaped design promotes correct gripping and prevents finger cramping and user discomfort. Fits any standard pencil or pen. For right or left handed users.

4026 Pack of 3

402601 Pack of 12

1 Tortoise Play Mat
 Shaped mats designed specifically for paediatrics bring fun to the Dycem range. The tortoise shaped mat is ideal for use as a place mat or on top of writing boards for a safe and effective non-slip surface. Available in three colours.

4 Dycem® Reels
i INFORMATION
 For a wider range of Dycem products, please see pages 1160 to 1162 in the Household section.

Dycem coloured reels are made from a non-woven fabric coated with non-slip properties. They can be used to cover large areas or cut to shape and are especially suitable for moulding or wrapping around an object. The clear and check reels are made from a polythene base and are of a stiffer construction. They are more suitable for flat surfaces or when extra firmness is required.
