To reinforce our genuine expertise, Patterson Medical are proud to provide you with a bespoke pharmaceutical service.

## Specialist knowledge, Personal Service

To discuss your pharmaceutical requirements further or to enquire about this fantastic service, please contact Customer Services for more information.

Orders for any medicines will not be supplied to the general public and will only be supplied to persons qualified to prescribe or supply.

### 1 Fungal

- Canesten \*P**  
Topical anti fungal cream.  
**001185** 20g  
**Daktarin Cream Dual Action \*GSL**  
For the treatment of athlete's foot.  
**006954** 15g  
**Daktarin Powder Spray Dual Action \*GSL**  
For the treatment of athlete's foot.  
**006956** 100g  
**Lamisil Cream \*POM**  
Lamisil is used to treat fungal infections of the skin.  
**002632** 15g  
**Lamisil Gel \*P**  
Lamisil is used to treat fungal infections of the skin.  
**013970** 15g  
**Lamisil Spray \*GSL**  
Lamisil is used to treat fungal infections of the skin.  
**013972** 15ml  
**Mycota Cream \*GSL**  
Treats and prevents athlete's foot.  
**000330** 25g  
**Mycota Foot Powder \*GSL**  
Treats and prevents athlete's foot.  
**000328** 70g  
**Phytex Paint \*P**  
Treatment of fungal and candida (yeast) infections of the nails and skin.  
**006797** 25ml  
**Scholl Athletes Foot Powder \*GSL**  
Used to treat skin infections caused by fungi.  
**007127** 75g  
\*P = Pharmacy only

**1 Antiseptic**

**Acriflex Cream \*GSL**

For minor burns and scalds, scratches, cuts and abrasions, sunburn blisters and infected cracked skin.

**006747** 30g

**Betadine Dry Powder Spray \*GSL**

For cleaning minor wounds.

**001559** 100ml

**Savlon Cream \*GSL**

For use on small cuts and grazes.

**009048** 15g

**001016** 100g

1

**2 Gastric Preparations**

**Dioralyte Citrus \*P**

Fast and effective replacement of lost water and body salts.

**001318** Pack of 20

**Dioralyte Blackcurrant \*P**

Fast and effective replacement of lost water and body salts.

**011316** Pack of 20

**Pepto Bismol Liquid \*P**

For the relief of upset stomach, indigestion, nausea and heartburn.

**010899** 240ml

2

**3 Repellents**

**Autan Active Spray \*GSL**

Protection for up to 8 hours from biting insects including mosquitoes, midges, horseflies and 4 hours for ticks.

**002259** 100ml

**Jungle Formula Spray \*GSL**

Jungle Formula Body Spray Home and Abroad effectively repels mosquitoes, midges and other biting insects for up to 8 hours application.

**010763** 125ml

3

**4 Decongestants**

**Olbas Oil \*GSL**

An inhalant decongestant for immediate relief of catarrh, colds and sinusitis.

**001189** 28ml

**Mackenzie Smelling Salts \*GSL**

For the relief of nasal congestion and headaches.

**011840**

**Strepsils \*GSL**

Formulated to fight infection and bring relief from sore throats.

**021876** Honey & Lemon Pack of 36

**022017** Orange & Vitamin C Pack of 36

**Vicks VapoRub \*GSL**

Symptomatic relief of nasal catarrh and congestion, sore throat, and cough due to colds.

**001023** 50g

4

1

**1 Caustic**

**Compound W \*P**

Treatment of common warts and verrucas.

**006749** 6.5ml

**Duofilm Paint \*P**

Treatment of warts.

**007902** 15ml

**Cuplex Gel \*P**

For the topical treatment of warts, verrucas, corns and calluses.

**007537** 5g

**Glutarol \*P**

Wart paint for the treatment of warts and verrucas.

**005426** 10ml

**Ocularsal \*P**

Cutaneous solution for the treatment and removal of warts and verrucas.

**005447** 10ml

**Phenol Crystals**

For partial or total nail avulsion, phenol crystals are used to destroy nail matrix cells.

**008764** 50g

**Potassium Hydroxide**

Suitable for treatment of warts, especially those on thin-skinned areas and mucous membranes.

**005700** 500ml

**Pyrogallic Acid Ointment**

A very penetrating and a powerful caustic ointment suitable for treatment of neuro-vascular corns or suspected verrucas.

**005697** 25g

**Salactol Wart Paint \*P**

Treatment of warts, verrucas, corns and calluses.

**005424** 10ml

**Salicylic Acid Paste**

Salicylic acid is used on the skin to remove warts, treat psoriasis and other skin conditions.

	Strength	Volume
<b>008757</b>	60%	15g
<b>010271</b>	70%	25g

**008757** 60% 15g

**010271** 70% 25g

**Silver Nitrate 75% Applicators \*GSL**

Unique plastic applicator adds flexibility.

**004264** Pack of 100

**Silver Nitrate Pencil 95% Blue \*GSL**

A pencil of 95% silver nitrate with a toughened agent. Direct application to moistened vascular corns produces a strong caustic solution.

**004265**

**Trichloroacetic Acid Crystals**

This usually has a slow action by precipitating protein and not penetrating tissues deeply.

**010148** 100g

**WP Ointment**

Pyrogallon is an oil-based ointment, suitable for treatment of fibrous and other types of corn.

**008760**

**2 Desloughing**

Not Illustrated

**Hydrogen Peroxide 6% \*GSL**

A desloughing agent which, when the hydrogen peroxide comes into contact with blood, separates and by doing so foams to brings any loose particles up the surface.

**009973** 200ml

**3 Lubricants**

**K-Y Jelly**

K-Y jelly safely replaces personal moisture.

**004552** 42g

**Petroleum Jelly \*GSL**

Softens dry skin, ideal addition to a first aid kit for a variety of uses.

**001504** 225g

**001516** 5kg

3

Patterson Medical can supply you with all your pharmaceutical needs. If the items you require are not listed here, please call our Sales Line where we will be happy to help!

Please Note: All prescriptions and pharmacy only items will be supplied to authorised persons only.

**1 Emollient****Aqueous Cream BP \*GSL**

For topical use as an external skin cleansing agent and as an emollient for softening and soothing skin.

**003969** 500g

**Calmurid Cream \*P**

Calmurid cream is used for dry and hyperkeratotic skin conditions.

**009086** 100g

**E45 Cream With Pump \*GSL**

An effective, non-greasy emollient that's been clinically proven to treat and soothe dry, itchy, flakey, rough or chapped skin.

**000397** 500g

**E45 Cream Tube \*GSL**

**002649** 50g

**E45 Cream \*GSL**

**000396** 125g

**Morhulin Ointment \*GSL**

Treatment of minor wounds, minor excoriations, pressure sores, varicose ulcers and eczema.

**006748** 50g

**2 Cryo Surgery****Cryospray 59**

Cryospray 59 is designed to freeze tissue to around -50°C to achieve an effective result.

**009497**

**Histofreezer Cryo 2mm**

Histofreezer cryo 2mm (50) highly targeted spray freezes tissue to -57°C in seconds.

**011455** Pack of 50

**Histofreezer Cryo 5mm**

Histofreezer cryo 5mm (40) highly targeted spray freezes tissue to -57°C in seconds.

**004673** Pack of 40

**Cryofunnel's (Disposable)**

**017603** Pack of 26

**Dermafreeze™**

Dermafreeze™ is a portable cryosurgery unit conveniently packed for easy storage and use by healthcare professionals. It is the only aerosol based cryosurgery unit which demonstrably freezes down to -50°C.

**09 142 1288** Kit A with 200ml canister, 30 Cryofunnels

**09 142 1247** Kit B with 200ml canister, 30 Cryofunnels  
20 x 2mm & 5mm Cryotips

**09 142 1312** Refil Canister (200ml)

**09 142 1353** Cryofunnel x 30

**09 142 1361** Cryotips 2mm x 20

**09 142 1387** Cryotips 5mm x 20

**3 Antihistamines****Anthisan Cream 2% \*P**

Used for insect bites, stings, and nettle rash.

**003307** 25g

**Clarityn 10mg \*P**

Relieve allergic symptoms due to hayfever and other airborne allergies.

**002684** Pack of 30

**Piriton Allergy Tablets \*P**

To treat the allergic symptoms caused by hayfever and other allergies.

**001190** Pack of 30

**Waspeze 60ml \*P**

Waspeze spray provides rapid relief from pain or itching and helps to protect you from the after-effects stings.

**001038**

\*P = Pharmacy only

## 1 Podiatry Supplies

### Acriflex Cream \*GSL

For minor burns and scalds, scratches, cuts and abrasions, sunburn blisters and infected cracked skin.

**006747** 30g

### Betadine DryPowder Spray \*GSL

For cleaning minor wounds.

**001559** 100ml

### Benzoin Compound Tincture

A mild antiseptic dressing

**09 122 4039** 500ml

### Ferric Chloride Solution 5% 20ml

Used by some practitioners as a styptic

**09 124 2247** 5% 20ml

### Compound W

Treatment of common warts and verrucae.

**006749** 6.5ml

### Silver Nitrate 75% Applicators \*GSL

Unique plastic applicator adds flexibility.

**004264** Pack of 100

### Silver Nitrate Pencil 95% Blue \*GSL

A pencil of 95% silver nitrate with a toughened agent. Direct application to moistened vascular corns produces a strong caustic solution.

**004265**

### Hydrogen Peroxide \*GSL

Mild anti-bacterial and skin disinfectant.

Active ingredient: Hydrogen Peroxide 6%

**09 124 1678**

### Phytex Paint \*P

Treatment of fungal and candida (yeast) infections of the nails and skin.

**006797** 25ml

### Loceryl Nail Solution \*POM

An antifungal for the treatment of onychomycosis.

Active ingredient: Amorolfine 5%

**09 124 4755** 5ml bottle

### Scandonest (plain) \*POM

Solution for injection

Active Ingredient: Mepivacaine Hydrochloride

**09 131 6330** 3% (50 x 2.2ml)

### Phenol Crystals

For partial or total nail avulsion, phenol crystals are used to destroy nail matrix cells.

**008764** 50g

### Phenol Liquified

**09 132 4060** 80% (500ml)

### Amoxicilin Caps \*POM

**09 124 1876** 250g (21)

**09 124 1702** 500g (21)

### Erythromycin Tab \*POM

**09 124 1793** 250mg (28)

### Flucloxacillin Caps \*POM

**09 124 1868** 250mg (28)

**09 124 2726** 500mg (28)

### Hydrocortisone 1% Ointment \*POM

**09 131 7668** 30g

### Hydrocortisone 1% Cream\*POM

**09 124 3039** 30g

### Adrenaline Injection\*POM

N.B Podiatrists must have successfully completed an appropriate course in injection techniques.

**09 124 3823** 1mg/10ml 1:10,000 Syringe Aulum

# Education

- 424 - 433 Anatomical Models
- 434 - 442 Books
- 443 DVDs
- 444 - 447 Charts
- 448 Physio Tools

**1 Classic Hand Painted Skeleton**

This model depicts hand painted muscle origins (red) and insertions (blue) on the left hand side. Height: 185cm. Weight: 7.6kg  
**CHT265C**

**2 Super Deluxe Hand Painted Skeleton with Muscles and Ligaments**

All skull movements at the neck joints can be demonstrated. The skull, left arm and leg are detachable. The right half of the model features elastic shoulder, elbow, hip and knee joint ligaments. Muscle origins (red) and insertions (blue) are displayed. Different colours for lumbar, thoracic and cervical spine. Includes profound hip muscle. Height: 185cm. Weight: 8.3kg.  
**CHT272C**

### 1 Miniature Skeleton

Economical teaching skeleton is only 84cm tall. Ideal for educating patients about the skeletal system. Key card and metal stand included. Removable calvarium. Made of PVC plastic, wipes clean

**928193**

### 2 Life Size Skeleton

- Full Skeleton complete with stand and dust cover
- Heavy-duty base
- The skull, arms and legs are detachable
- Skull is composed of 22 bones, transversely cut Calvarium and moveable mandible. 3 lower teeth - incisor, cuspid and molar are removable.
- 170cm tall
- Made of PVC plastic, wipes clean

**221598**

### 3 Life Size Skeleton Deluxe

This model helps students to understand the relationship between the human body figure and the skeleton. It can also be used for studying the morphology of bones and the construction of joints. Set in a standing posture, the joints of the upper and lower extremities are moveable. Skull is composed of 22 bones, transversely cut Calvarium and moveable mandible. 3 lower teeth - incisor, cuspid and molar are removable. Red painted parts represent muscle origins and blue painted areas represent muscle insertions. Made of PVC plastic, wipes clean.

**09 131 7528**

1

**1 Super Deluxe Lumbar Spine**

With Muscles and Painted Muscle Origins (red) and Insertions (blue).

CHT315C

2

**2 Lumbar Spinal Column with Movable Femur Heads**

CHT330C

**3 Lumbar Spine with Pelvis and Spinal Nerve Exits**

CHT335C

**4 Half Size Lumbar Spine and Pelvis**

CHT340C

**5 Lumbar Spinal with Dorso Lateral Disc Prolapse**

CHT218C

3

**6 Classic Painted Cervical Spinal Column**

Consists of the 7 cervical vertebral discs + occipital plate, spinal nerve exits and painted muscle origins (red) and insertions (blue).

CHT216C

4

5

6

**1 Deluxe Flexible Spine with Femur Heads and Painted Muscles**

Muscle origins (red) and insertions (blue) are painted on left innominate, femur and vertebrae. Height 83cm. Weight 2.3kg. **CHT201C**

**2 High Value Flexible Spine**

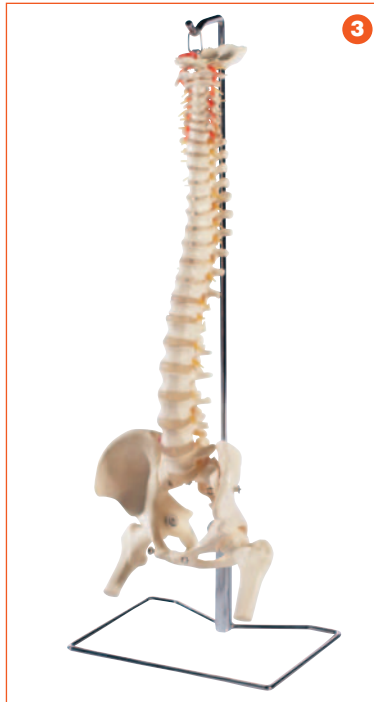

Height 83cm. Weight 2kg. **CHT205C**

**3 Classic Flexible Spine with Femur Heads**

Height 83cm. Weight 2.1kg. **CHT200C**

**4 Lifting Manikin**

Demonstrates how the vertebrae of the human spinal column react when heavy objects are lifted correctly and incorrectly. The manikin will lift a weight from either of two positions. If the correct posture is used, the spine is undistorted (no spaces between the vertebrae). The incorrect posture causes obvious visible strain to the simulated vertebrae. The rugged base features anatomical illustrations of the effect on the spine. Designed by a physical therapist. Free booklet entitled "Safe Manual Handling" is included. (5½ x 3" base, 16½" tall when standing) **001867**

**5 4-Stage Vertebrae**

Set of four, full size two-piece vertebrae models - one each of the following conditions: normal, "bulging" herniated disc, bone and disc degeneration, and advanced osteoporosis with marked bone compression and bone spurs.

**018342** 3½ x 2¾ x 3"

These models are designed as visual aids for teaching physiology and hygiene courses. They help the students to understand the morphology and the construction of the skull and cervical vertebrae.

**1 Skull with Cervical Spine**

Skull flexibly mounted on a cervical spine. Includes hindbrain, spinal cord, cervical nerves, vertebral arteries, basilar artery and rear cerebral arteries. Comes with removable stand. Made of PVC plastic, wipes clean. Dimensions: 32 x 15 x 21cm.  
**09 142 0025**

**2 Life-Size Skull**

Comprises of 22 pieces of bone with serrated suture lines marked out. Transversely cut Calvarium shows the interior structures of the skull. Moveable mandible. Three removable lower teeth - incisor, cuspid and molar. Dissects into 3 parts. Made of PVC Plastic, wipes clean. Dimensions: 19 x 15 x 21cm.  
**09 142 0033**

**3 Life-Size Skull with Coloured Bones**

Bones painted in different colours for precise study. Comprises of 22 pieces of bone with serrated suture lines marked out. Transversely cut Calvarium shows the interior structures of the skull. Moveable mandible. Three removable lower teeth - incisor, cuspid and molar. Dissects into 3 parts. Made of PVC Plastic, wipes clean. Dimensions: 19 x 15 x 21cm.  
**09 142 0041**

**4 Deluxe Painted Skull on Cervical Spine**

**CHT310C**

**5 Classic Painted Skull 3-Part**

Disassembles into 3 parts for detailed studies, with painted muscle origins (red) and insertions (blue).  
**CHT300C**

These models are designed as visual aids for teaching physiology and hygiene courses. They help the students to understand the anatomical structure of the head, neck and internal organs of the human body. The models show the relative positions, morphological characters and anatomical structures of the head, neck and internal organs with special reference to respiratory, digestive, urinary and nervous systems.

**1 Unisex Torso**

Includes 40 parts:

Torso, female breast plate, head, eyeball, brain (8 parts), vertebra spinal nerves (4 parts), lung (4 parts), heart (2 parts), trachea, oesophagus and descending aorta, diaphragm, liver, kidney, stomach (2 parts), intestines (4 parts), male genitalia (4 parts), female genitalia with fetus (3 parts). Made of PVC plastic, wipes clean. Mounted on plastic base. Dimensions: 85cm tall.

09 142 0058

**2 Male and Female Torso**

Male model includes:

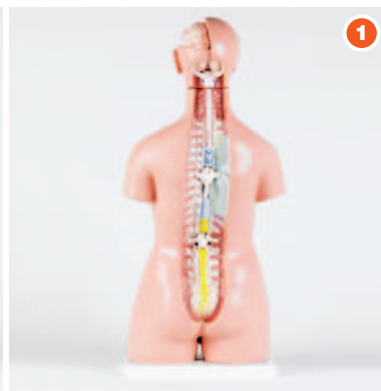

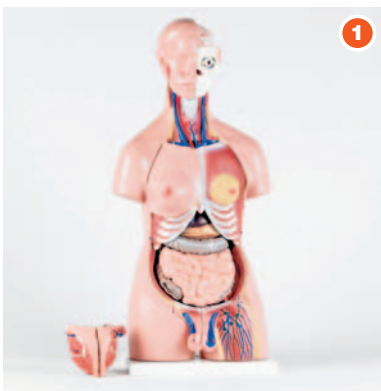

13 dissectible parts: torso, head (2 parts), brain, lung (2 parts), heart (2 parts), stomach, liver, kidney, pancreas and spleen, intestine. Made of PVC plastic, wipes clean. Mounted on plastic base. Dimensions: 42cm tall.

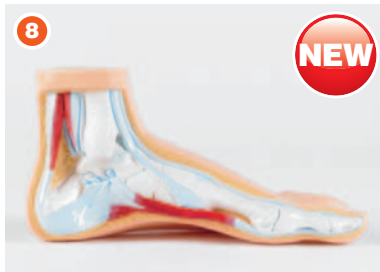

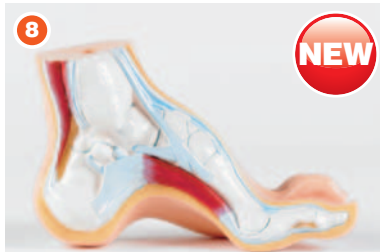

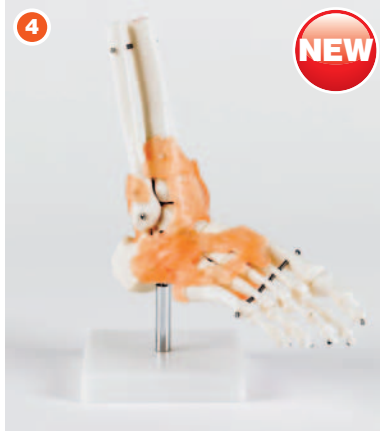

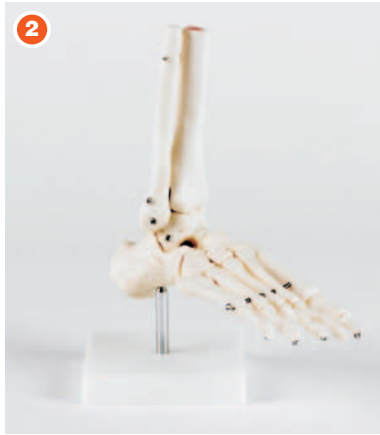

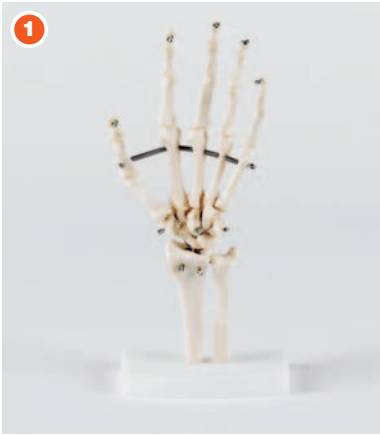

Female model includes:

15 dissectible parts: torso, head (2 parts), brain, lung (2 parts), heart (2 parts), stomach, liver, kidney, pancreas and spleen, intestine. Made of PVC plastic, wipes clean. Mounted on plastic base. Dimensions: 42cm tall.

09 142 0066 Male Torso

09 142 0074 Female Torso

These models are designed as visual aids for teaching physiology and hygiene courses. They help the students to understand the morphology and construction of the hand and foot joints.

**1 Life-Size Hand Joint**

Demonstrates all hand functionality and the external anatomical structures. Made of PVC plastic, wipes clean. **221600**

**2 Life-Size Foot Joint**

Demonstrates all foot functionality and the external anatomical structures. Made of PVC plastic, wipes clean. **221599**

**3 Life-Size Hand Joint with Ligaments**

Demonstrates all hand functionality and the external anatomical structures. Includes flexible artificial ligaments. Made of PVC plastic, wipes clean. Complete with base. **09 142 0082**

**4 Life-Size Foot Joint with Ligaments**

Demonstrates all foot functionality and the external anatomical structures. Includes flexible artificial ligaments. Made of PVC plastic, wipes clean. Complete with base. **09 142 0090**

**5 Articulated Leg & 1/2 Pelvis Including Foot**

Available in left or right. Wire mounted. Slightly flexible through toes and ankle joint. **003038**

**6 Foot Skeleton**

Wire mounted. Includes lower most portions of the tibia and fibula. Slightly flexible through toes. Ankle naturally flexible. **001854** 71.78mm

**7 Hand Skeleton With Portions of Ulna & Radius**

Flexibly mounted. Left or right available. **001051**

**8 Foot Anatomical Models**

These miniatures both show the superficial structures, and at the side, the bones, muscles and tendons in their correct anatomical position. Each model weighs 0.3kg.

**Set includes:**

Pronated Low Arch - 12 x 24 x 10cm

Normal Arch - 13 x 24 x 9cm

Supinated High Arch - 13 x 23 x 10cm

**09 142 0108**

**1 Life-Size Shoulder Joint**

An instructional model to illustrate abduction, adduction, anteversion, retroversion and internal/external rotation. Includes flexible, artificial ligaments. Made of PVC plastic, wipes clean. Life-size, on stand. Dimensions: 17.5 x 11.5 x 20cm.  
**09 142 0124**

**2 Life-Size Hip Joint**

Demonstrates anteversion, retroversion, abduction and internal/external rotation. Includes flexible, artificial ligaments. Made of PVC plastic, wipes clean. Life-size, on stand. Dimensions: 25 x 19 x 30cm.  
**09 142 0132**

**3 Life-Size Knee Joint**

Demonstrates flexion, extension and internal/external rotation. Includes flexible, artificial ligaments. Made of PVC plastic, wipes clean. Life-size, on stand. Dimensions: 17 x 14.5 x 29.5cm.  
**09 142 0140**

**4 Life-Size Elbow Joint**

Demonstrates flexion, extension and internal/external rotation. Includes flexible, artificial ligaments. Made of PVC plastic, wipes clean. Life-size, on stand. Dimensions: 17 x 14.5 x 24cm.  
**09 142 0157**

**Functional Joint Models**

These high quality functional joint models provide a graphic demonstration of the anatomy and mechanics of the joints, allowing better doctor-patient, or teacher-student understanding of the anatomy of joints. Use these life-size and fully flexible models to demonstrate abduction, anteversion, retroversion, internal/external rotation and much more.

**5 Functional Shoulder Joint**

This shoulder joint model consists of shoulder blade, collar bone, portion of humerus and joint ligaments. Complete with removable stand for easy study of the anatomy of the human shoulder. Dimensions: 16 x 12 x 20cm. Weight: 0.35kg.  
**09 123 1232**

**6 Functional Hip Joint**

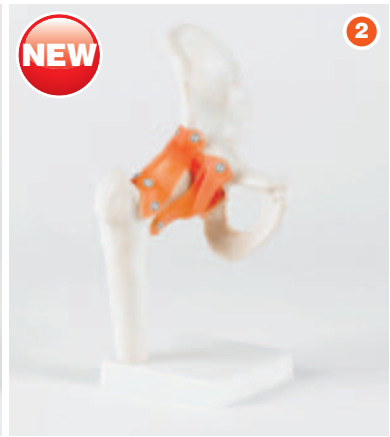

This hip joint consists of portion of femur, hip bone and joint ligaments. Complete with removable stand for easy display in the classroom or doctors office. Detailed study of the anatomy of the human hip bone is easy with this realistic high quality model. Dimensions: 17 x 12 x 33cm. Weight: 0.55kg.  
**09 123 1208**

**7 Functional Knee Joint**

This knee joint consists of portion of femur, tibia and portion of fibula; also includes meniscus, patella with quadriceps tendon and joint ligaments, including the ACL and PCL. Complete with removable stand for easy study of the anatomy of the human knee joint. Dimensions: 12 x 12 x 34cm. Weight: 0.4kg.  
**09 123 1216**

**8 Functional Elbow Joint**

This elbow joint consists of portion of humerus, complete ulna and radius as well as joint ligaments. Complete with removable stand allowing for easy display. Dimensions: 12 x 12 x 39cm. Weight: 0.35kg.  
**09 123 1190**

1

## 1 Dissectible Muscled Arm - 6 Part

This model illustrates both the superficial and deeper muscles, five of which are removable. Tendons, blood vessels, nerves and bone components of the left arm and shoulder are shown in great detail. Parts numbered. Delivered on removable stand.

**M10**

## 2 Dissectible Muscled Leg - 9 Part

This model illustrates both the superficial and deeper muscles, eight of which are removable. Tendons, blood vessels, nerves and bone components of the left leg and foot are shown in great detail. Parts numbered. Delivered on removable stand.

**M20**

## 3 Internal Hand Structure Model, 3-Part

This full-size model shows the superficial structures of the back of the hand and also the internal hand structures, including bones, muscles, tendons, ligaments, arteries (superficial and deep palmar arches) and nerves. Palmar aponeurosis and plate of the superficial flexor tendons are removable. Parts numbered.

**M18**

2

3

## 1 Muscled Knee Joint

Full size normal right knee includes: rectus femoris, vastus lateralis and vastus medialis muscles; femur, fibula, patella and tibia bones; anterior cruciate ligament, quadriceps femoris tendon plus 6 more ligaments and tendons.

Model Size: 7.6cm-1.2cm x 7.6cm x 25.4cm.

**221036**

## 2 Muscled Hip Joint

Full size normal right hip with femur portion includes: gluteus medius, gluteus minimus, iliacus, inferior and superior gemellus, obturator internus, piriformis and psoas muscles; and articular capsule ligaments.

Model Size: 12.7cm x 10.1cm-1.9cm x 20.3cm-0.6cm.

**221039**

## 3 Muscled Elbow Joint

Full size normal right elbow (humerus to hand) includes: biceps brachii, brachialis, pronator teres and supinator muscles; distal, middle and proximal phalanges, humerus, metacarpal, thumb distal phalanx, radius and ulna bones; extensor carpi radialis brevis, extensor carpi radialis longus, flexor carpi radialis, flexor retinaculum and palmar carpal ligaments; radial, median and ulnar nerves.

Model Size: 48.3cm x 7.6cm x 15.2cm.

**221044**

## 4 Muscled Shoulder Joint

Full size normal right shoulder includes: infraspinatus, subscapularis, supraspinatus, and teres major and minor muscles; acromion, clavicle, humerus and scapula bones; plus 8 ligaments and tendons.

Model Size: 12.7cm-1.3cm x 15.2cm x 15.2cm.

**221042**

## 5 Demonstration Model Knee

With removeable functional knee joint.

**CHT420B/C**

## 6 Pelvis With Ligaments Nerves & Floor Muscles

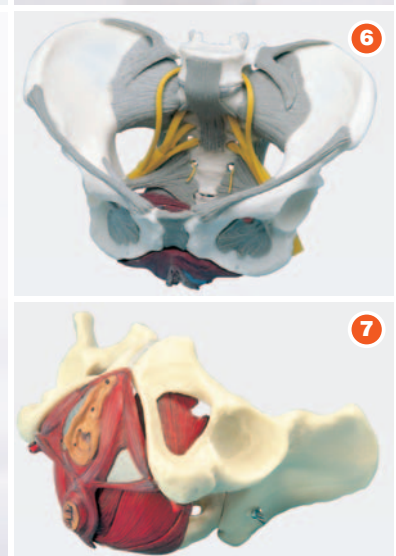

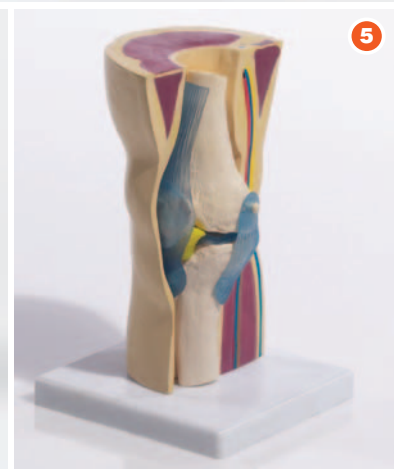

A pelvis of synthetic bone-like material with a highly detailed and dissectible pelvic floor in carefully coloured flexible material, comprising genitalia and associated muscles. Weight 1kg.

**018397** 27 x 20 x 18cm

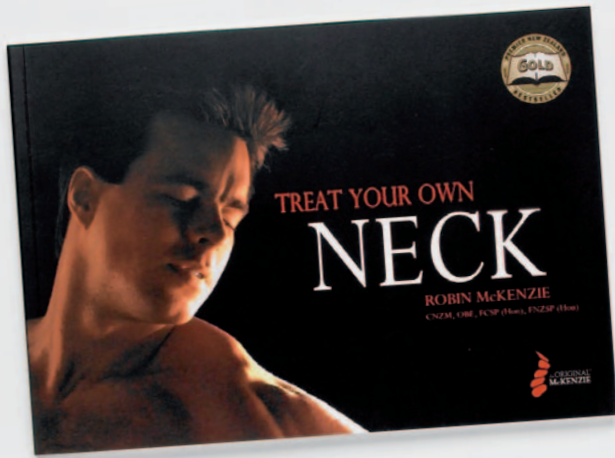

## 7 Female Pelvis & Pelvic Floor

A pelvis of synthetic bone-like material with a highly detailed and dissectible pelvic floor in carefully coloured flexible material, comprising genitalia and associated muscles. Weight 1kg.

**018398** 27 x 16 x 19cm

1

**The Original McKenzie®  
Treat Your Own... Book Series**

These easy-to-read patient handbooks provide the reader with an active self treatment plan to quickly and effectively treat and prevent the return of pain. Written by Robin McKenzie an Honorary Life Member of the American Physical Therapy Association, these books contain his own personal findings and rehabilitation exercise programs.

**1 Treat Your Own Neck**

Designed to help patients with neck pain, this book contains the following chapters;

- The neck or cervical spine
- Understanding the spine
- Common causes of neck pain
- Understanding the McKenzie Method
- The exercise programme
- When to apply the exercises
- When acute neck pain strikes

This book consists of 80 pages. Paperback.  
**017807**

**2 Treat Your Own Back**

Designed to help patients with back pain, this book contains the following chapters;

- The low back or lumbar spine
- Understanding the spine
- Common causes of low back pain
- Understanding the McKenzie Method
- The exercise programme
- When acute low back pain strikes
- Common remedies
- Emergency panic

This book consists of 124 pages. Paperback.  
**000295**

**3 Treat Your Own Shoulder**

Designed to help patients with shoulder pain, this book contains the following chapters;

- Diagnosing your problem
- The shoulder and neck region
- Common causes of shoulder pain
- Understanding the McKenzie Method
- The exercise programme
- When to apply the exercises

This book consists of 100 pages. Paperback.  
**09 131 2172**

**1 The Human Extremities**

Designed for professional use, this book covers the following subjects;

- Musculoskeletal problems
- Soft tissue properties
- Mechanical Diagnosis
- Physical Examination
- Assessment of symptomatic and mechanical presentations and responses
- Patient management and self treatment
- Common disorders/Clinical reasoning

This book consists of 316 pages. Paperback.

**007346**

**2 The Cervical & Thoracic Spine (2nd Edition)**

Designed for professional use, this two volume set of books cover the following subjects;

**VOLUME ONE**

- Risk and prognostic factors in low back pain
- Pain and connective tissue properties
- The intervertebral disc
- Disc pathology - clinical features
- Biomechanics
- Diagnosis and classification/ Mechanical diagnosis
- Derangement syndrome - the conceptual model
- Centralisation
- Serious spinal pathology

**VOLUME TWO**

- Physical examination
- Evaluation of clinical presentations
- Procedures of mechanical therapy
- Patient management/ Follow-up evaluations/ Clinical reasoning
- Recurrences and prophylaxis
- Derangement syndrome
- Management of derangements
- Dysfunction syndrome
- Dysfunction of adherent nerve root (ANR)
- Postural syndrome

This book consists of 724 pages. Paperback.

**017400**

**3 The Lumbar Spine (2nd Edition)**

Designed for professional use, this two volume set of books covers the following subjects;

**VOLUME ONE**

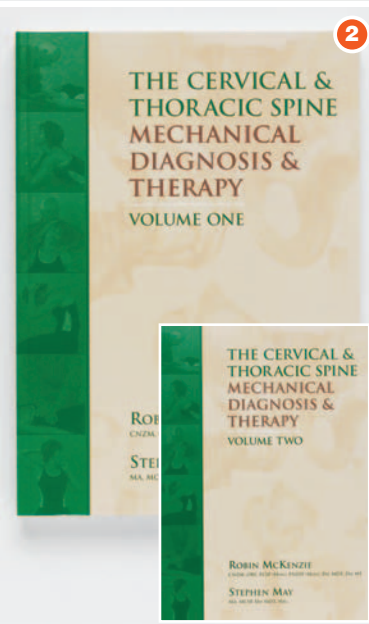

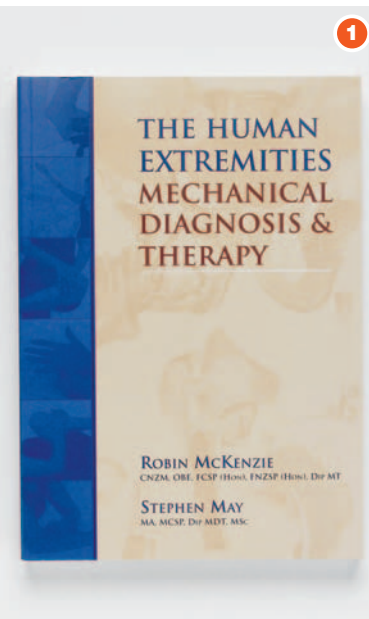

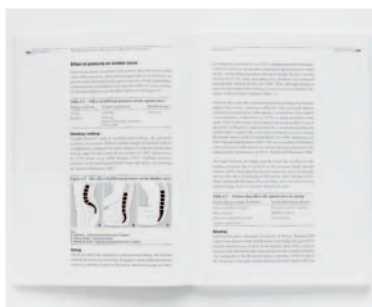

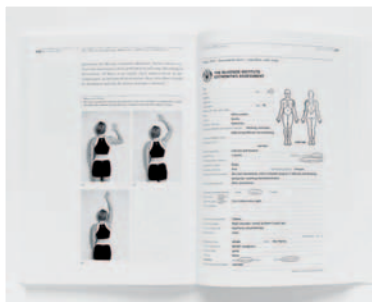

- Pain and connective tissue properties
- Cervical anatomy, ageing and degeneration
- Movement of biomechanics of the cervical spine
- Diagnosis and classification/ Mechanical diagnosis
- Serious spinal pathology
- Physical examination/ Evaluation of clinical presentations/ Follow-up evaluations
- Procedures of mechanical therapy for the cervical spine
- Clinical reasoning
- Recurrences and prophylaxis

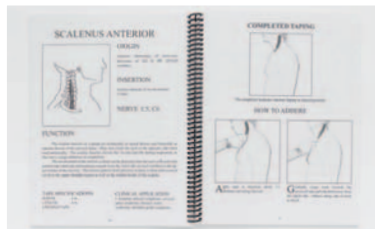

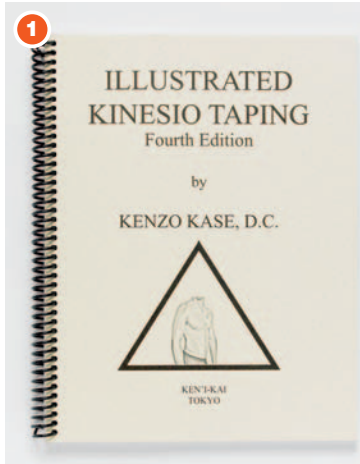

**VOLUME TWO**

- Management of derangement
- Cervical dysfunction syndrome
- Dysfunction of adherent nerve root (ANR)
- Postural syndrome
- Cervical trauma or whiplash associated disorders
- Thoracic spine

This book consists of 556 pages. Paperback.

**010454**

**1 Illustrated Kinesio Taping (4th Edition)**

A comprehensive, illustrated, step-by-step guide for kinesio taping coverage includes;

- Shoulder Girdle
- Trunk
- Pelvic girdle

This book consists of 112 pages. Paperback. **A840237**

**2 Kinesio Taping for Lymphoedema and Chronic Swelling**

This book will show you step-by-step, easy to read, full colour instruction for over 108 common and not so common kinesio tape applications associated with lymphoedema, chronic swelling and scar management. Chapters include;

- Understanding lymphoedema and chronic swelling
- Fundamentals of kinesio tex taping
- Kinesio taping for acute localised swelling
- Kinesio taping of the deep lymphatic pathways for chronic swelling
- Kinesio taping of the collector lymphatics for acute or chronic swelling
- Kinesio taping of the superficial lymphatic pathways for chronic swelling
- Kinesio taping for pitting odema, indurated tissue, scar tissue and chronic venous conditions

This book consists of 176 pages. Paperback. **09 117 2162**

**3 Kinesio Taping in Paediatrics: Fundamentals and Whole Body Taping**

This book is praised for its unprecedented user-friendly style and full-colour format. Covering conditions from infant to adolescent, focusing on the necessary foundation needed of Kinesio Taping applications that will enable your patients and children to live more productive lives.

This book covers the following subjects;

- General introduction to kinesio taping
- Evaluation of the child for taping
- Paediatric specific taping guidelines
- Head and neck
- Upper extremity
- Trunk
- Lower extremity
- Case Studies

This book consists of 220 pages. Paperback. **09 117 2154**

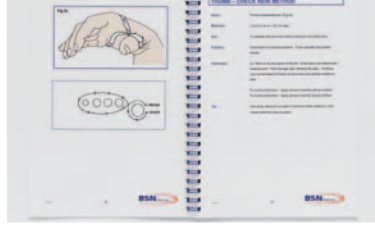

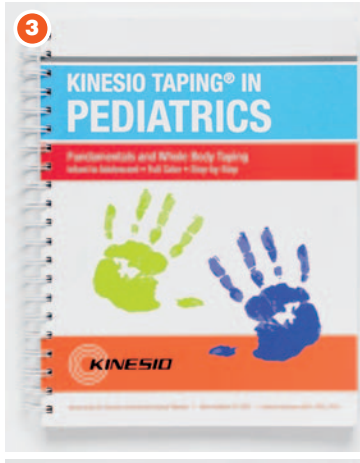

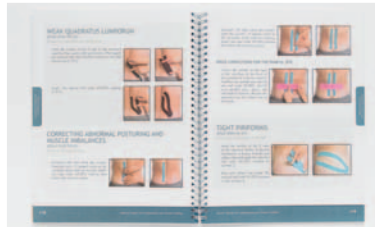

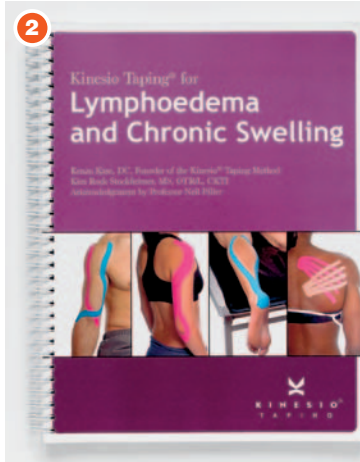

**4 Taping & Strapping: A Practical Guide**

This edition has new material on biomechanics, braces, sleeves, shoes, quick taping techniques for “on the pitch” treatment, taping for muscle imbalance, psychological aspects of taping and proprioceptive taping. Sections on first aid and the history of taping, together with rarely used techniques have been replaced with more up to date techniques.

Coverage Includes Taping procedures and techniques for;

- Finger
- Thumb
- Wrist
- Elbow
- Foot
- Ankle
- Achilles Tendon
- Shin
- Knee
- Thigh

This book consists of 220 pages. Paperback. **000298**

**1 Get On The Ball**

Lisa Westlake offers a fun, highly effective way to kick your workouts up a notch, with a step-by-step guide to training with an exercise ball. Based on the concept that working out on the "wobbly" ball forces the user to use extra muscles and cultivate new skills, Westlake has developed over 90 innovative exercise techniques which are great for athletes, regular gym goers, and determined beginners alike. Coverage includes;

- Warming up on the ball
- Seated on the ball
- Standing with the ball
- Supine on the ball
- Abs on the ball
- Sideways on the ball
- Prone on the ball
- Forward prone on the ball
- Mobility and flexibility
- Training programmes on the ball

This book consists of 184 pages. Paperback.

92922401

**2 Pilates On The Ball**

An innovative ball workout by Colleen Craig, certified Pilates Trainer. Learn how to use the exercise ball to add resistance, challenge, and variety to your workout, with no jarring of limbs or wear and tear of the joints. Designed to realign the body, maintain good posture, build long lean muscles, and establish abdominal and core strength.

Chapters include;

- Introduction
- A formidable partnership
- Breathing and breathers
- The postural exercises
- The abdominal exercises
- The extensions
- Pilates on the ball arm and footwork
- Restoration and rebuilding
- Stretching
- Stress management and cardiovascular exercises

This book consists of 180 pages. Supplied with DVD. Paperback.

AA98002

**3 Functional Training for Sports**

The key features of this text include: testing procedures to detect physical weaknesses and to pinpoint proper starting points in the athlete's training, sample training programmes for different sports, skills to analyse energy demand and develop specific programmes for endurance and more.

This book consists of 196 pages. Paperback.

012327

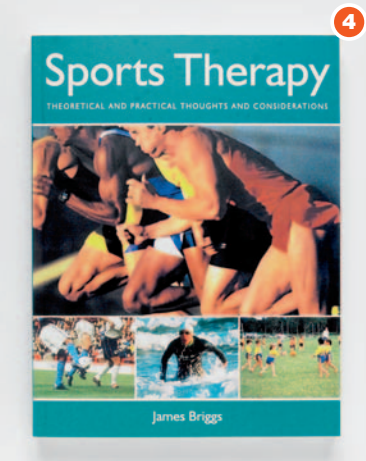

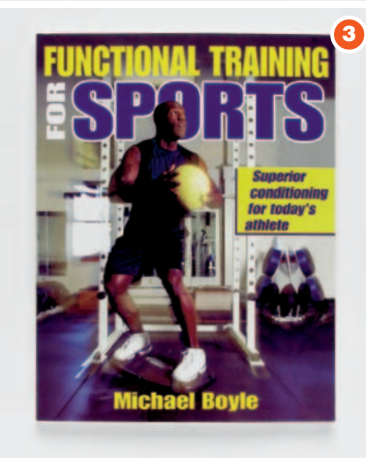

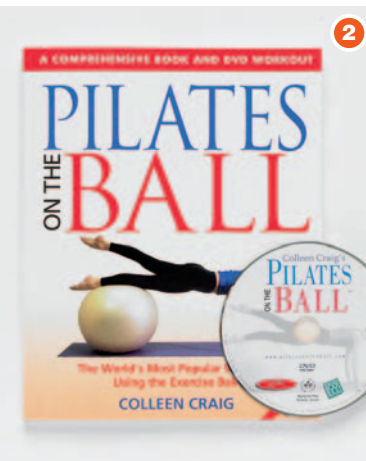

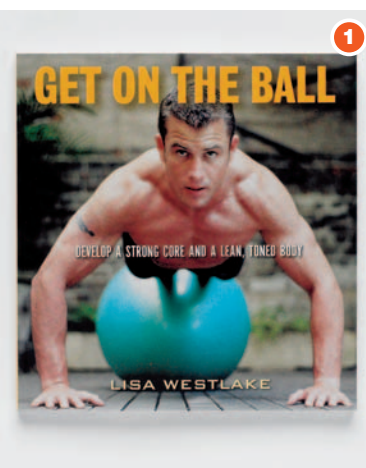

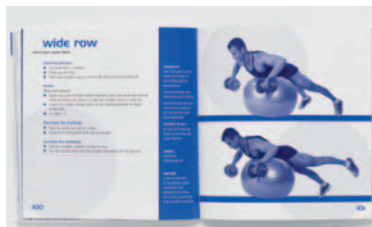

**4 Sports Therapy**

Written by an experienced sports therapy practitioner, this book is fully illustrated with photographs and line drawings which will prove an invaluable source of information for students as well as qualified therapists. The book looks at the different perspectives and definitions of the subject, then goes on to cover;

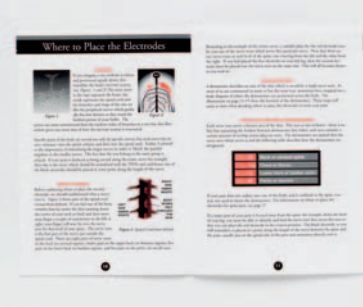

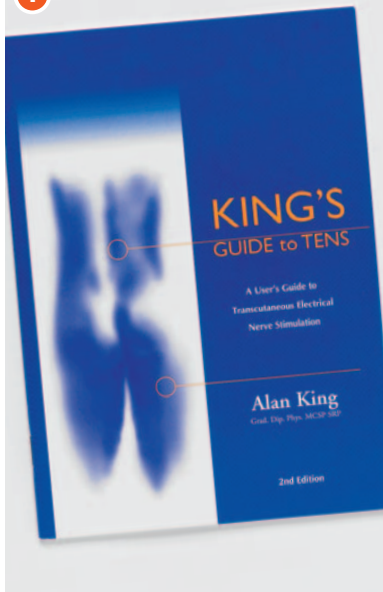

- Exercise, training, fitness and performance
- Injury, inflammation, healing and repair
- Examination, assessment and diagnosis
- Treatment
- Rehabilitation
- Legal, professional, ethical, moral and practise management issues
- Drugs/cheating
- The sports injury clinic
- Travelling with the teams

This book consists of 380 pages. Paperback.

010424

**1 King's Guide to TENS**

This informative guide to TENS covers the following subjects;

- What is pain and how can TENS affect it?
- The TENS machine
- Where to place the electrodes
- Dermatome Maps
- Using the TENS machine
- Some common problems
- Examples of electrode placement
- Electrode placement for nausea
- Electrode placement for migraine

This book consists of 36 pages. Paperback.

**221520**

**2 Electrotherapy Evidence-Based Practise (12th Edition)**

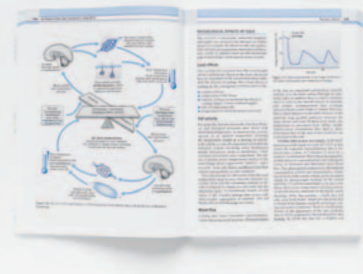

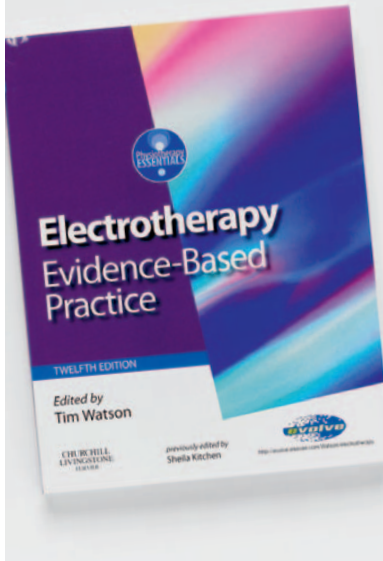

Designed for professional use and edited by Tim Watson, this informative book covers the following subjects;

- Introduction and scientific concepts
- Thermal and non-thermal modalities
- Electrical stimulation modalities
- Ultrasound imaging
- Contraindications, dangers and precautions

This book consists of 392 pages. Paperback.

**221527**

2

**3 Anatomy & Pathology (5th Edition)**

You will never need to buy another chart. This book contains 58 high quality charts, charts are as follows;

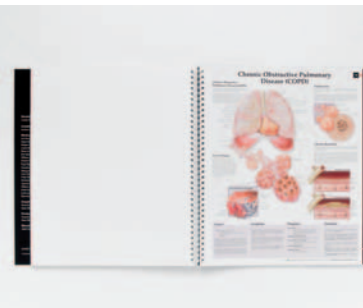

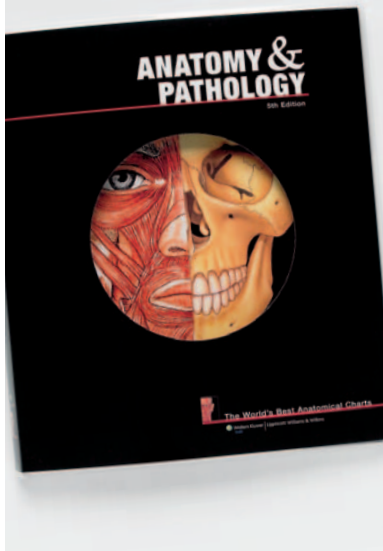

- Systems of the body (13 charts)
- Structures of the body (17 charts)
- Diseases and disorders (22 charts)
- Healthy lifestyle issues (6 charts)

This book consists of 64 pages. Laminated Paperback.

**221500**

### 1 Acupuncture Treatment of Musculoskeletal Conditions

This book is written primarily for musculoskeletal therapists of all types, and will appeal to those who use acupuncture to augment their current practise. It will also be of value to acupuncturists specialising in the treatment of musculoskeletal conditions, and may serve as an introduction to physical treatment methods such as joint mobilisation, therapeutic exercise and taping. This book covers the following subjects;

- Principles of traditional Chinese medicine
- The Zang Fu organs
- Meridians
- Acupuncture and pain relief
- Acupuncture points
- Patient questioning and point selection
- Acupuncture treatment methods
- Lower limb treatment protocols
- Back and trunk treatment protocols
- Upper limb treatment protocols

This book consists of 196 pages. Paperback.

221519

### 2 Acupuncture Pocketbook Point Location

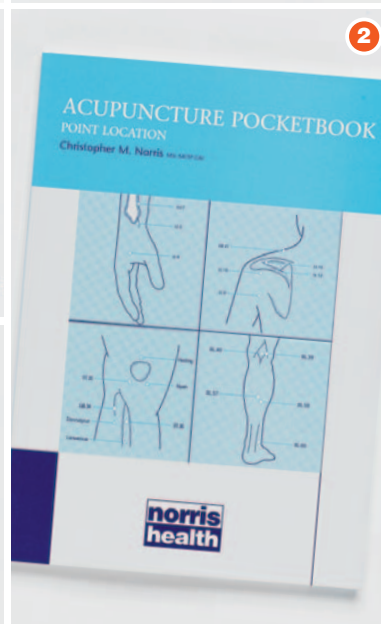

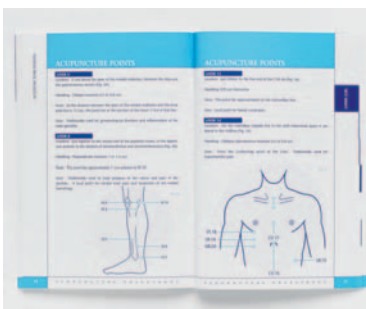

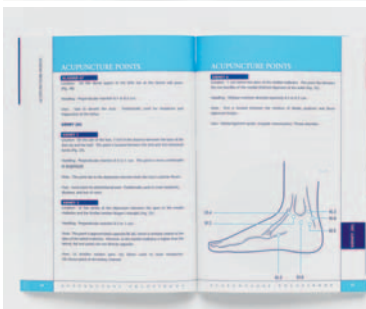

By Chris Norris MSc MCSP MBACc.

Shows the most commonly used acupuncture points, using clear colour line drawings throughout. Over 188 separate points are shown, with anatomical location, uses and needling methods. Important surface anatomy relations are clearly illustrated, and points are shown in regions for ease of selection. At the end of the book, tables list point categories. A general index is provided together with a separate points index. Tabs at the page edges make point finding easy, and the book comes in a high quality satin finish paper for durability. 2005, 104 pages.

This book covers the following subjects;

- Acupuncture points
- Extra points
- Point classification

221518

### 3 Acupuncture in Physiotherapy

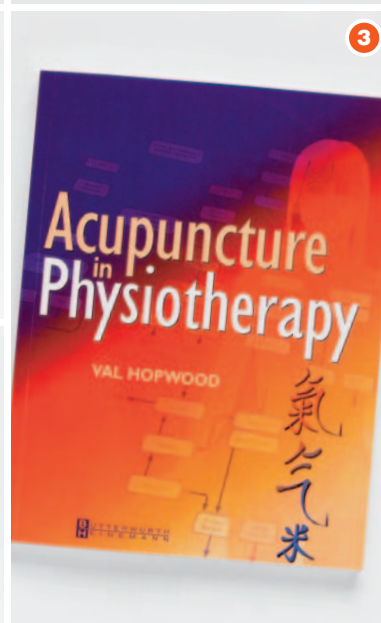

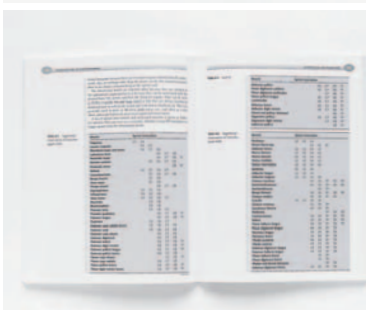

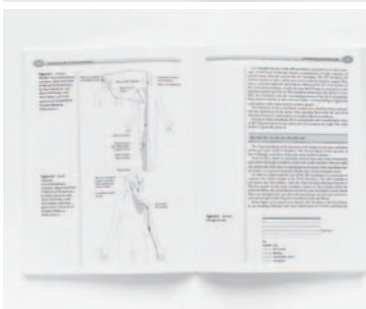

This book is written primarily for physiotherapists who use acupuncture. It moves beyond the basic theories taught by the Acupuncture Association of Chartered Physiotherapists. It is intended as both an intermediate text and an encouragement to look further than simplistic musculoskeletal pain applications.

This book covers the following subjects;

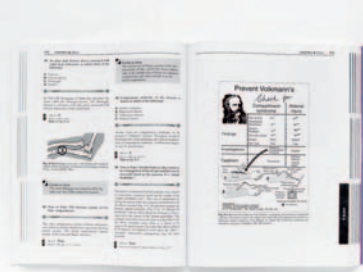

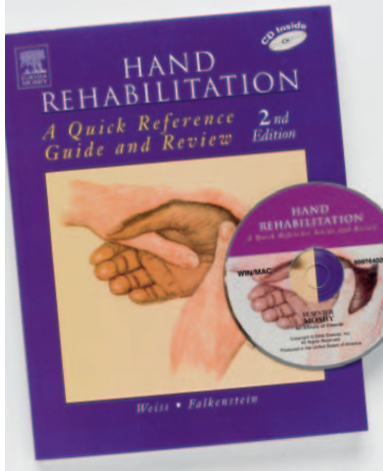

- Overview of the main TCM theories and their place in modern practise
- Qi, Blood and Body Fluids
- Zang Fu
- The extra meridians
- Meridian acupuncture
- Superficial acupuncture
- Acupuncture Microsystems
- Pulling it all together
- Possible acupuncture mechanisms
- Acupuncture trials and methodological considerations
- TCM theory in modern medicine
- Old age problems

This book consists of 268 pages. Paperback.

018721

1

**1 Hand Rehabilitation - A Quick Reference Guide and Review (2nd Edition)**

Includes the basic concepts and principles of splint design and splints acting on the elbow and shoulder. An expanded alphabetical index of 800 splints provides a photographic key to all splints mentioned in the book.

This book is presented in the form of questions, each question has several possible answers and the book explains what action should be taken in the event of each situation.

This book consists of 476 pages. Paperback.

554574

**2 Hand and Upper Extremity Rehabilitation (3rd Edition)**

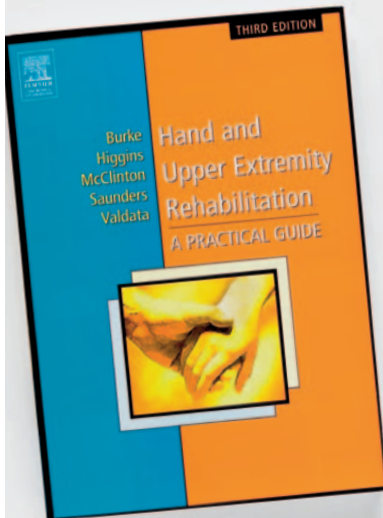

This book blends the technical and clinical skills and knowledge of hand surgery and hand therapy for the treatment of common medical conditions affecting the upper extremity. Written in an outline format, it covers non-surgical and surgical procedures, along with purpose and rationale. Conservative and postoperative rehabilitation are reviewed, as well as potential postoperative complications. 784 pages and 289 illustrations. 3rd edition ©2006. Paperback.

This book covers the following subjects;

- Wound management
- Nerve injuries and compression
- Tendon injuries
- Shoulder
- Elbow
- Wrist and distal radial ulnar joint
- Hand
- Special topics

09 117 9613

2

**3 Fundamentals of Hand Therapy**

Written for both non-specialists and specialists, this illustrated text and reference emphasises the fundamentals of hand therapy, provides tips and guidelines for hand therapy treatment, and helps you think critically about clients' individual needs.

The book is split into two sections, Fundamentals and Professionalism/Diagnosis. The fundamentals section covers;

- Hand anatomy
- The evaluation process
- Professional issues
- Diagnosis
- Professional issues – clients with functional somatic syndrome and challenging behaviour.
- Client-therapist rapport
- Roles of therapy assistants

The Professionalism/Diagnosis section covers a broad array of common diagnoses seen in hand therapy, including;

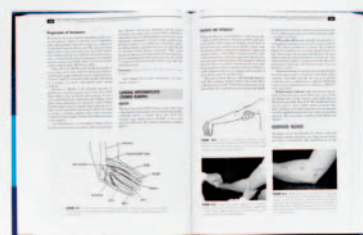

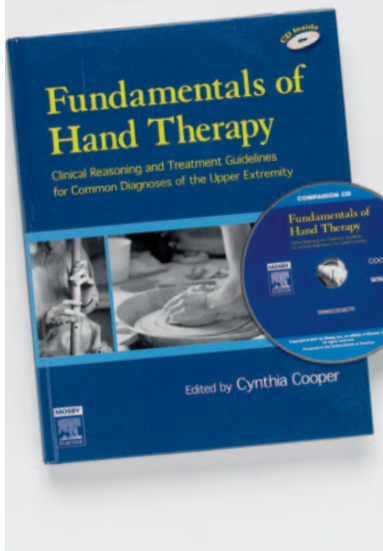

- Shoulder and elbow disorders
- Peripheral nerve problems
- Wrist and hand fractures
- Tendonitis and tendonosis
- Finger sprains
- Deformities

You will find diagnostic-specific information and treatment guidelines in a consistent, easily accessible format.

This book consists of 756 pages. Hardback.

3

**1 Introduction to Splinting 3rd edition**

This book integrates technical knowledge with hands-on learning through a unique combination textbook/workbook format. You'll gain essential knowledge and discover problem-solving techniques to design and fabricate splints for any situation.

Learn about...

- Splinting tools, processes, and techniques
- Current trends and the latest research
- Occupation-based splinting
- Splints for the elbow, shoulder, fingers etc.
- Considerations when splinting children and older adults

09 117 9639

**2 Measurement of Joint Motion 3rd edition**

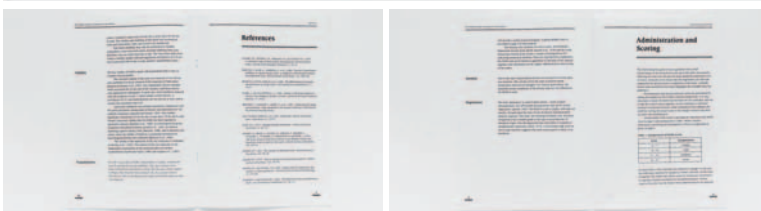

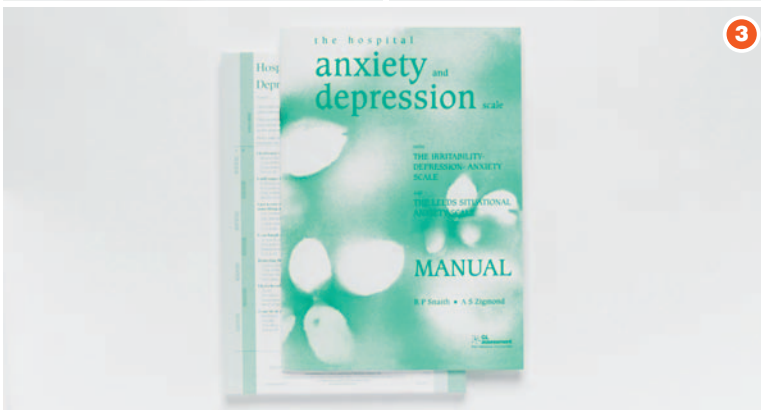

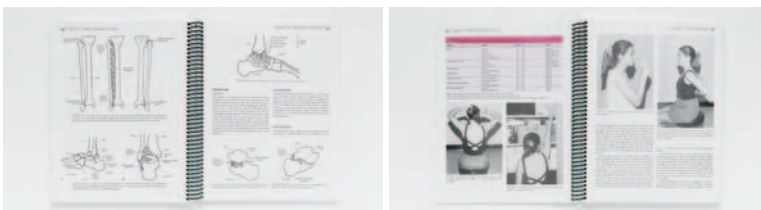

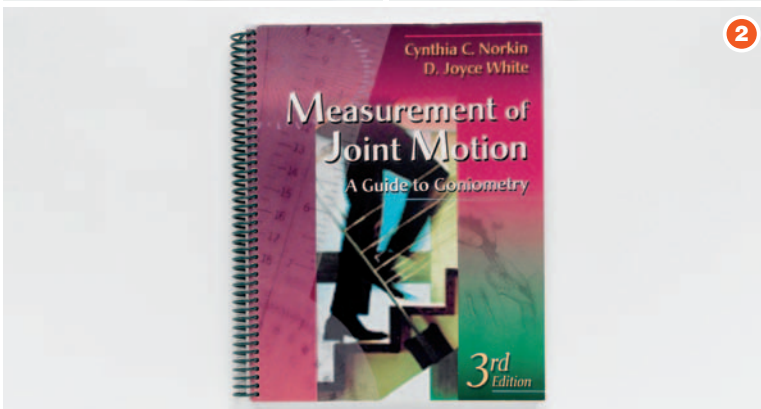

This highly respected, standard setting manual teaches how to perform goniometry properly as a clinical skill and contains scores of exercises that reinforce good technique. Every testing procedure is detailed in a two page spread for ease of reference, with colour added to enhance headings, charts and tables. This third edition, including an abundance of new photographs, has been updated to be consistent with the APTA's Guide to Physical Therapist Practice terminology.

AA9651

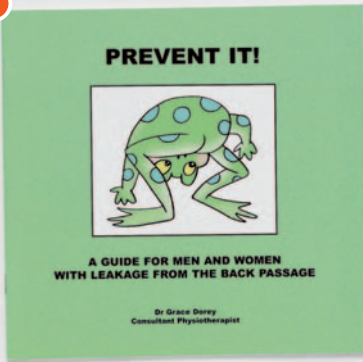

**3 The Hospital Anxiety and Depression Scale (HADS)**

This is a self administered questionnaire which detects, and distinguishes between anxiety and depression and measures the severity of emotional disorder. A fast, easy to use and valid measure that is equally useful in hospital, out patient and community settings, the HADS enables you to measure both anxiety and depression simultaneously whilst yielding a separate score for each.

1

**1 Prevent It!**

This book explains why leakage from the back passage happens, what can be done to stop it and includes tips on how to prevent recurrence. Explains how and when men and women should exercise pelvic floor muscles as part of a treatment programme. A useful adjunct to therapy.

012557

**2 Use It or Lose It**

This is written for those men who have problems with bladder control or erectile dysfunction and for their partners who wish to understand or help.

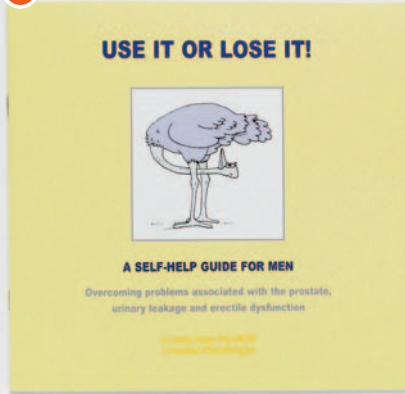

009905

**3 Bowel Control**

Loss of bowel control affects men and women of all ages. This book provides information about possible causes and treatments and give some ideals on practical self-help measures.

009903

2

**4 Constipation Lets Get Things Moving**

This self-help book for people with bowel problems aims to give you the understanding and courage to manage your bowel and your pain, and turn your life around. It takes you step by step through the likely causes of your problems and provides practical answers.

011842

**5 A Healthy Back for Life**

This self-help guide will introduce the patient to simple exercises that can be done to maintain the proper strength and flexibility necessary to live an active life free of back pain.

55466805

3

**6 Women's Waterworks Curing Incontinence**

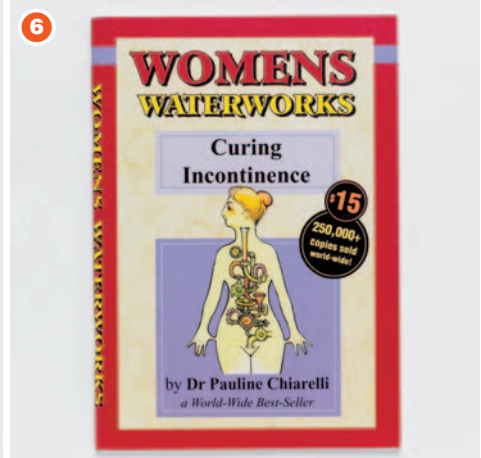

A comprehensive, clear and easy to understand book to help women who suffer from incontinence to take control and have a normal life, free from the worry and embarrassment that incontinence causes.

**3 A Day with McKenzie DVD**

This DVD features footage from the McKenzie Institute Conference in Queenstown, March 2007, as well as follow up interviews 4 months later. It shows Peter and Clare - both long-term Spinal Pain sufferers - undergoing mechanical diagnostic assessment and instruction in self-management. The remarkable transformation and recovery after 2 years of disability is clearly evidenced by the patients' own testimonies.

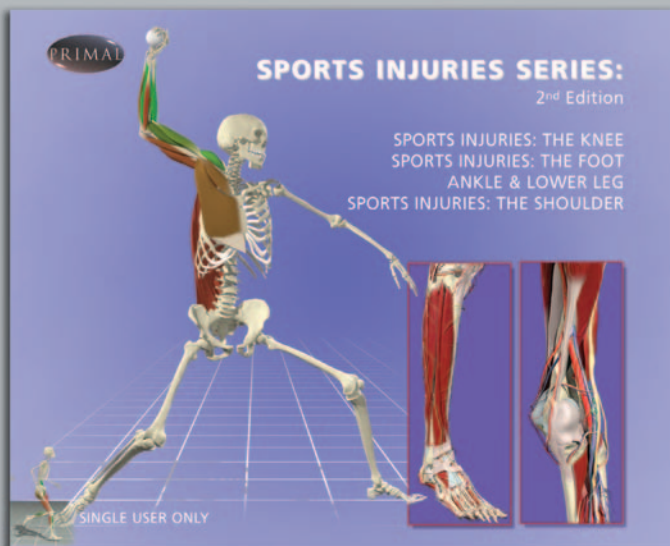

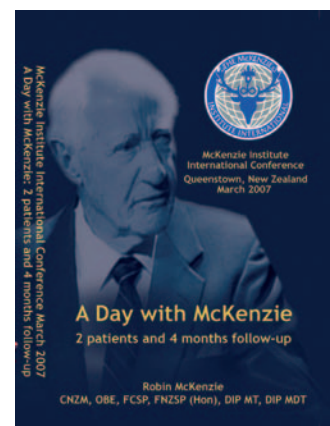

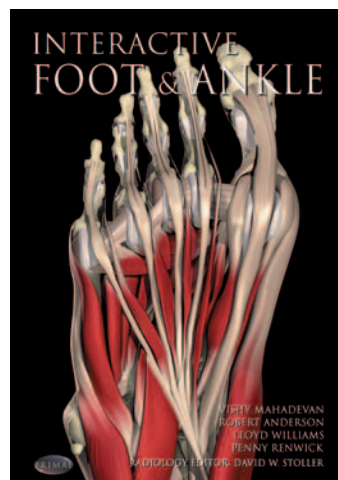

The DVD emphasizes the simplicity and self-management approach for chronic spinal conditions - the hallmark of the McKenzie Method. See what can be achieved simply by educating the patient to treat themselves.

**018933**

**4 Sports Injuries Series DVD-ROM - 2nd Edition**

This DVD-ROM features highly detailed, interactive 3D computer graphic models of the knee, shoulder and foot and ankle. Extensive Sports Injuries Section covers common acute and overuse injuries of each joint including pathology and diagnosis, ligament tests, principles of treatment, manual therapies and rehabilitation. Injury topics are linked to hundreds of supporting video clips, clinical slides, diagrams and references. PC and Mac compatible.

# Aquaflex®

Weighted Vaginal Cones

The simple and effective way to strengthen pelvic floor muscles to help improve general pelvic health, restore bladder control and also improve sexual response and satisfaction.

### Aquaflex® Weighted Vaginal Cones

#### How does Aquaflex work?

It is very important to exercise pelvic floor muscles correctly. The Aquaflex cone is inserted the same way as a tampon and causes the pelvic floor muscles to automatically contract around it in order to hold it in place. It is this reflex action that tones the muscles. As the muscles become stronger, more weights can be added and the length of time that the cones are in place can be increased, up to 20 minutes per day.

- Exercise system consists of two cones and a set of four weights (5g, 10g and 2 x 20g)
- Once inserted correctly, Aquaflex cones automatically isolate and contract the pelvic floor muscles
- Gradually add more weights as pelvic floor muscle strength increases
- Used daily for twenty minutes, improvements can be expected in just twelve weeks
- Clinically proven – 70% of cases of stress incontinence can be cured or improved by using weighted vaginal cones
- Safe natural solution allowing women to take control
- Single patient use

# Educator<sup>®</sup>

## Pelvic Floor Exercise Indicator

Developed from the award winning Periform<sup>®</sup> probe, the Educator<sup>®</sup> provides an extremely simple and effective solution to help improve pelvic floor muscle strength and eliminate incontinence problems.

### Educator<sup>®</sup> Pelvic Floor Exercise Indicator

#### How does Educator work?

The Educator<sup>®</sup> is a simple and easy to use device that shows if the pelvic floor muscles are being contracted correctly.

Strengthening these muscles can also help to reduce symptoms of stress incontinence.

Its unique form allows it to follow the movement of the internal walls of the vagina, which indicates how the pelvic floor muscles are being contracted. The external part of the Educator<sup>®</sup> amplifies this movement to show whether these muscles are being contracted correctly or not.

There is growing awareness of the significant contribution that the pelvic floor muscles (PFM) make to lumbo-pelvic stability. As such it is important that MSK therapists are confident that their patients are able to correctly contract the Pelvic floor muscles (PFM) so that they may be incorporated safely into core stability training.

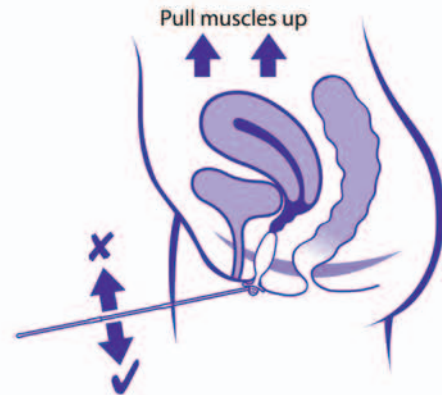

- Simple to use
- Visual aid to teach correct pelvic floor exercises
- Strengthens pelvic floor muscles
- Demonstrates benefit of bracing before cough etc.
- Allows improvement to be monitored
- Single patient use

#### Why is the Educator<sup>®</sup> important?

It is recognised by Continence Care Specialists that teaching pelvic floor contractions is extremely difficult. Studies have shown that even with first class one to one tuition, half of those instructed will not contract the correct muscles.

In fact half of those contracting incorrectly will get it so wrong that they are in danger of damaging their pelvic floor. Educator<sup>®</sup> is perfect for patients to use at home to ensure they are doing pelvic floor exercises correctly.

# Anuform®

*Intra-Anal and small Intra-Vaginal Probe*

The revolutionary contoured shape of the Anuform® provides a sound electrode/tissue interface which allows for comfortable muscle stimulation and accurate biofeedback. As Anuform always sits in the same position, comparable EMR readings can be taken over different sessions.

### Anuform® Intra-Anal and Small Intra-Vaginal Probe

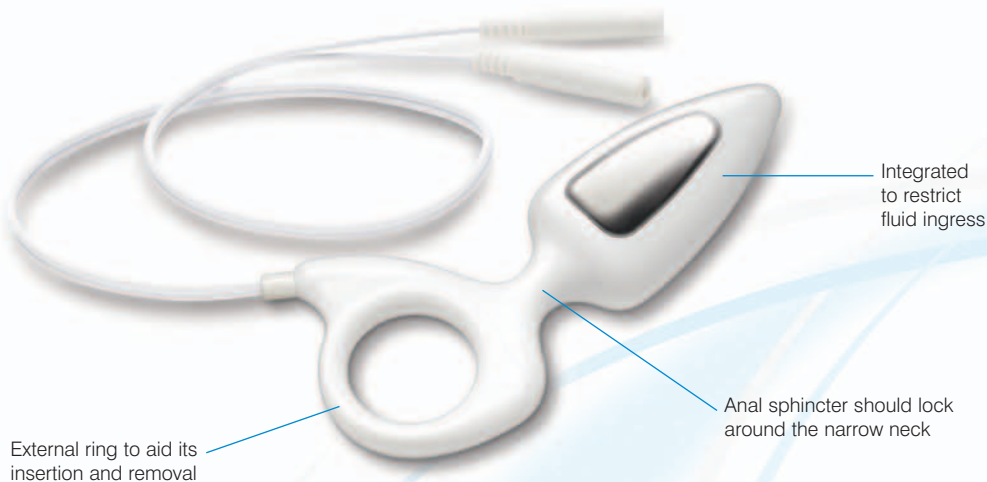

When the Anuform® is inserted, the probe allows the anal sphincter to close around the narrow neck of the probe. This secures the correct positioning without the need for holding the probe in place.

- Revolutionary shape for repeatable positioning and ambulatory use
- Can be used with most muscle stimulators and biofeedback equipment (refer to manufacturer's instructions before use)
- Single patient use
- Single orifice use
- Medical grade surgical stainless steel

011503

**INFORMATION**  
For our clinical range of Biofeedback and Stimulation Units, please see pages 566 to 567.

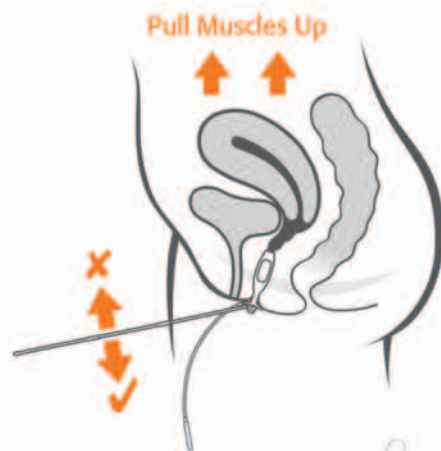

# Periform<sup>®</sup>+

## Intra-Vaginal Probe

The Periform<sup>®</sup> has been the probe of choice for pelvic floor muscle stimulation and biofeedback for many of the world's leading healthcare professionals for over thirteen years. After extensive user consultation it has been refined to improve its exceptional performance even further, whilst retaining its unique, patented and award winning form.

### Periform<sup>®</sup>+ Intra-Vaginal Probe

- Can be used with most muscle stimulators and biofeedback equipment (refer to manufacturer's instructions before use)
- Single patient use
- Medical grade surgical stainless steel
- Unique 'rectangular' section resists lateral movement
- Contoured electrode provides comfortable stimulation
- Smooth clean shape
- Long integrated cables
- Push fit indicator wand with extension pieces

021972

#### Unique Indicator Wand

- Visual aid to teach correct pelvic floor exercises
- Push fit
- Extension pieces provide greater amplification of pelvic floor movements to improve visual biofeedback
- Demonstrates benefit of bracing before cough etc.
- Provides vital information on the efficiency of muscle stimulation

**i INFORMATION**  
For our clinical range of Biofeedback and Stimulation Units, please see pages 566 to 567.

Longer cables (additional 12cm)

Integrated cables restrict ingress of fluid

New style neck to allow tissue to take on natural form

Patented hollow provides secure 'anchorage' and allows ambulatory use

Electrode backs smoothed over to make it easier to clean

# Peritone

## EMG Biofeedback Unit

The Peritone is a single channel EMG biofeedback device. It can be used to assess pelvic floor muscle activity and used as a continence diagnosis tool. Its simple design and ease of use make it excellent for both clinic and home treatments

### Peritone EMG Biofeedback Unit

#### Features

- Accurate and sensitive - measures activity down to as low as 0.2 v and as high as 2000 v
- LEDs display EMG level clearly and easily
- LCD displays numerical EMG reading and work/rest countdown
- After each session statistics can be reviewed (includes work and rest averages, average onset of muscle contraction and muscle release)
- Lock mode function for recording time in use, statistics and locking the units parameters
- Low cost, high quality and very accurate
- Used with Periform®+ or Anuform® and surface electrodes (not included)
- Optional software available

Unit supplied with patient cable and reference cable, battery, user manual, stand to hold unit upright during use and soft carry case.

#### Specification

<b>Range:</b>	0.2-2000
<b>Sensitivity:</b>	01 v RMS
<b>Work rest periods:</b>	2-99 seconds
<b>No of trials:</b>	1-99
<b>Unit dimensions:</b>	128.5 x 64 x 28.3mm
<b>Weight:</b>	0.15kg
<b>021848</b>	Peritone Unit

### Peritone Software

With the help of optional software Peritone produces and prints comprehensive patient progress reports for all key parameters, such as work/rest averages, onset contractions, muscle release times, peak values and work/rest average deviations.

- Microsoft Vista compatible
- New software receives EMG data via the new Fibre Optic to USB adapter

<b>021849</b>	Peritone Software
---------------	-------------------

# Pericalm™

## Pelvic Floor Stimulation Unit

Dual channel unit with digital display. Its simple design and ease of use make it excellent for both clinic and home treatments.

### Pericalm™ Pelvic Floor Stimulation Unit

- Features pre-set and customisable programs
- Lock feature ensures patient compliance for home use
- Used with Periform®+, Anuform® or surface electrodes (not included)

### Programs

- Pelvic floor workout
- Pre-set programs for use in the treatment of:
  - Stress incontinence
  - Urge incontinence or overactive bladder
  - Mixed incontinence
  - Pelvic pain
- 3 customisable programs to change parameters to suit the user

Unit comes supplied with 2 cables, battery, user manual and soft carry case.

### Specification

<b>Amplitude:</b>	0-90mA
<b>Type:</b>	Constant Current
<b>Waveform:</b>	Asymmetrical, rectangular bi-phasic with zero DC current
<b>Pulse Rate:</b>	2-100Hz
<b>Pulse width:</b>	50-450- v
<b>Time:</b>	5-60 minutes (Custom programs only)
<b>Ramp up time:</b>	0.2-9.9 seconds
<b>Unit dimensions:</b>	80 x 67 x 45mm
<b>Weight:</b>	90 grams
<b>012531</b>	Pericalm Unit
<b>013920</b>	Spare Cables

## 1 CombiStimXP® Biofeedback and Muscle Stimulation Unit

CombiStim XP® is the latest device for the treatment of incontinence. Easy to use, flexible and very effective, CombiStim XP® combines the benefits of EMS and EMG in one device. Depending on the patient's specific needs,

CombiStim XP® can be used as:

- a pure Biofeedback device
- a pure Muscle Stimulator
- a Combined Biofeedback/Muscle Stimulation device which automatically contracts the patient's pelvic floor muscles on achievement of a preset manual contraction target.

CombiStim XP® comes with 7 programs including an open EMS program where the clinician can choose and set desired stimulation parameters.

Program	Indication
1	ETS (EMG Triggered Stimulation)
2	EMG and EMS alternating
3	EMG Biofeedback
4	EMS - Stress Incontinence
5	EMS - Urge Incontinence
6	EMS - Mixed Incontinence
7	Open EMS Program

### Features

- Single Channel
- Clear LED display
- 3 treatment options, 7 programs
- Audio and visual biofeedback

### Software Features

- Patient Database
- ETS Assessment
- Patient Clinical Report
- EMG Work/Rest Assessment
- EMG template Assessment
- Patient's home Compliance Report

**022023** CombiStim XP® Software

## 2 IncoStress

IncoStress is an innovative Class IIa medical device that controls stress incontinence commonly experienced by women of all ages. IncoStress is worn inside the vagina. When inserted, IncoStress naturally puts gentle pressure against the urethra. This gentle pressure stops or reduces the involuntary loss of urine by closing the urethra and restoring the natural anatomical position of the bladder. Closed urethra and well positioned bladder stop urine leakages, thus preventing the symptoms of stress incontinence from occurring.

IncoStress is ergonomically shaped and encourages gentle squeezing of pelvic floor muscles, whilst inserted in the vagina. These gentle squeezes can contribute to stronger and more toned pelvic floor muscles. However, please note that IncoStress is not a pelvic floor exerciser and wearing IncoStress does not replace the need for a dedicated daily pelvic floor workout. IncoStress can be used during day or night continually for up to 8 hours. Remove and re-insert as many times as necessary (i.e. prior to passing urine).

### Features

- Easy to insert and comfortable in use
- Re-usable - wash in clean water after each use. (You should replace IncoStress after a month of use for good hygiene reasons)
- Made from a medical grade non-allergenic silicone
- Small and discreet. Weighs 28g. Dimensions: 25mm diameter x 65mm length
- Clinically trialled and medically approved

**Diamond Burs**

Grits for burs are specially selected to obtain maximum cutting speed and to minimise clogging. The shanks are of stainless steel making the bur autoclavable. Sharp diamond crystals are mechanically locked onto bur shank, permanently embedded in electroplated nickel. Diamond burs can operate in both rotational directions.

				
<b>1</b> Diamond DT50 005951	<b>2</b> Diamond HP369 005961	<b>3</b> Diamond Bud 1 005970	<b>4</b> Diamond Bud 2 005971	<b>5</b> Diamond Coarse Callous 005976

**PBS Burs**

PBS Diamond Burs have diamond crystals bonded directly to a one-piece hardened stainless steel shank through the unique PBS bonding process. This enables PBS burs to last longer and cut faster than other diamond instruments. The diamonds on the PBS burs will actually wear smooth before they pull out. That's why PBS burs outlast other diamond instruments.

# Mobilis Rolyan is proud to present a new and improved range of Single Use Podiatry Surgical Instruments

(pages 645-648)

Our new range of Single Use Instruments is manufactured to the highest standards, and the high quality products carry a free replacement guarantee for extra peace of mind. With this range, not one instrument will be wasted.

We are confident that you will be impressed, so we have made it easy for you to try them out: there is no minimum order quantity on any of the instruments, and the standard delivery time is 3-5 working days.

All instruments are supplied sterile in double peel pouches with full traceability and a tear off barcode to attach to patients' notes. All products carry the CE mark, and comply with ISO 13485.

A number of instrument packs are readily available, but custom made packs or instruments are available on request. Please contact Customer Services for more information.

Our Single Use Instruments are not available on our website, but you can phone, fax or email Customer Services to place your order.

## 1 Clip-on Discs & Mandrel

Garnet discs are a disposable disc for finishing skin and calluses. Clip-on discs have a square metal centre, which can be pushed onto the mandrel where it locates firmly. When used, the disc can be pulled off and replaced in seconds.

<b>006676</b>	Mandrel Clip-on

- 656 Accessories

## Enigma Autoclaves

There are 3 types of autoclaves:

### The 'N' Type Autoclave

The 'N' denotes non-vacuum, relying solely on the steam to push out the air and sterilise the instruments. It is only suitable for solid instruments that are not wrapped.

### The 'S' Type Autoclave

The 'S' denotes a single vacuum and this machine is suitable to sterilise solid and lumened instruments that are either wrapped or unwrapped, operating only on a clean water system.

### The 'B' Type Autoclave

The 'B' denotes a triple (or fractionated) vacuum phase and this machine is suitable for solid, lumened and porous loads.

Fully complies to BS EN ISO 13060, the European Harmonised Standards for Small Steam Sterilisers, as approved by the TUV. This ensures your unit meets all pending guidelines.

- Sterilises at 134°C
- Clean Water System
- Data Download Facility

**Wrapped load** - For a sealed pouch containing loose instruments use the [S] type autoclave to have all of the air drawn from it.

**Porous load** - If the instruments are within a cassette or tray (for ease of transport) and then placed within a pouch, use the [B] type autoclave as this uses a 'triple vacuum function' and would therefore guarantee sterilisation of all instruments, solid or lumened in the cassette within the pouch or wrap.

### 1 Enigma 8 Litre 'B' Type Autoclave

018746 8 Litre 'B' Type Printer included

Specifications	
Chamber Capacity	8 Litres
Overall Dimensions (DxWxH)	50 x 35 x 33cm

# Enigma Autoclaves

## Key Features

All Enigma Autoclaves benefit from the following features:

- Unique stop button to automatically shut down the machine after a cycle, to avoid waiting at the end of the day
- Clean water system separating the used and unused water supply reducing the risk of cross infection
- Automatic drying phase at the end of each cycle to eliminate bacteria that could breed in moisture
- Easy to read LCD front panel displaying time, temperature and pressure
- Sterilisation at 134°C to meet all guidelines
- Free printer included to keep concise records of each cycle
- USB outlet available (not on 8L) to download cycle information (optional at an additional cost)
- Free delivery for all Enigma Autoclaves
- One year manufacturer warranty

### 4 Enigma 17 Litre Autoclave

## Prestige Medical

### 1 Prestige 2100 Classic

The Prestige Classic offers a cost effective solution for sterilisation at 134°C.

- An interlock-system prevents the lid from being removed whilst pressure remains in the vessel
- A two-stage protection system prevents over-pressure
- Electronic detectors turn off power if there is insufficient water
- Thermal fuse and double pole fuses protect against overheating and electrical faults
- Specifically designed for unwrapped solid instruments and non porous loads (excluding lumen instruments and handpieces)

#### DELIVERY

Delivery is approximately 2 to 3 weeks. Please contact Customer Services for more information.

## 1 Eschmann SES 113 Autoclave

The New Little Sister Autoclave from Eschmann.

**Process Monitoring** - Dual, independent process monitoring systems check the performance of every autoclave cycle, and provide complete assurance that each cycle performs to its required specification.

**Advanced Water System** - High performance single use water system ensures the highest possible standards of validated, clean steam sterilisation.

**Superior Performance** - New innovative, advanced technology ensures superior levels of sterilisation performance, and rapid instrument turnaround: Up to 32\* non-vacuum cycles without drying for solid instruments and 16\* vacuum cycles without drying for unwrapped solid or hollow instruments.

(\*number of cycles based on an average 8 hour working day).

**Intuitive Operation** - One Touch/One Cycle Operation reduces the potential for user error and minimises the risk of using the wrong sterilisation cycle, whilst the Advanced User Option offers a multitude of cycle options.

**Direct Data Download** - USB connection allows direct data download to a PC or laptop, and saves up to 2 years of cycle data.

**019024** 11 Litres 'B' Type Vacuum without Printer

**019230** 11 Litres 'B' Type Vacuum with Printer

**019026** 11 Litres 'N' Type Non-Vacuum without Printer

**019025** 11 Litres 'N' Type Non-Vacuum with Printer

Specifications	
Chamber Capacity	11 Litres
Overall Dimensions (DxWxH)	52 x 58 x 43cm
Unpacked Weight	35.5kg
Chamber Diameter	20cm
No. of Cycles	8
Cycle Time	3 - 16mins

## 2 Eschmann SES 2010 Autoclave

Eschmann manufacture all Little Sister autoclaves in the UK, and the SES 2010 is microprocessor controlled, preventing operator error, whilst hygienic 'touch panel' controls activate a choice of cycles.

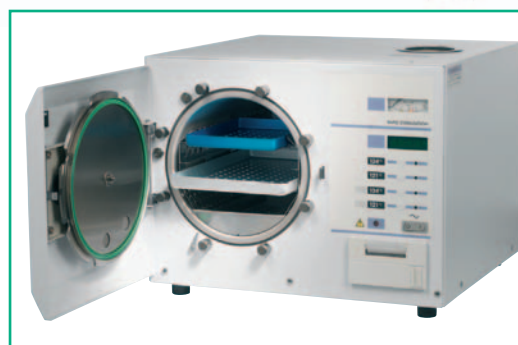

The SES 2010 autoclave comes with a printer as standard which enables a permanent record of each cycle to be kept, providing reassurance for both you and your patient.

The Little Sister SES 2010 autoclave is capable of sterilising six 'Examination' size trays (18 x 14cm), and will also accommodate two standard trays (28 x 18cm). Rapid 12 minute cycle - The 134°C without drying cycle takes only 12 minutes.

Fully compliant with NHS HTM2010 testing guidelines and protocols.

**005436** 11 Litres 'N' Type Non-Vacuum with Printer

Specifications	
Chamber Capacity	11 Litres
Overall Dimensions (DxWxH)	46 x 46 x 36cm
Unpacked Weight	32kg
Chamber Diameter	20cm
No. of Cycles	4
Cycle Time	3 - 15mins

**DELIVERY**  
Delivery is approximately 2 to 3 weeks. Please contact Customer Services for more information.

## 1 Water Distiller

Save on the cost of buying distilled water with this 4 litre water distiller

- Produces 1 litre distilled water per hour
- Easy to operate and clean
- 290 x 290 x 390mm

**09 126 6949**

## 2 Ultrasonic Cleaner 2.5 Litre

The ideal solution for initial instrument cleaning. There are 5 preset cycles that can be selected, or you can manually set your own. The time scale is from 1 to 45 minutes, and the temperature can be set up to 70°C.

Working capacity: 2.5 Litres

Tank dimensions: 245 x 145 x 85mm

Basket dimensions: 235 x 135 x 75mm

**018762**

## 3 PICO Washer Disinfector

Controlled automated cleaning and disinfection of soiled instruments is preferred over the unsafe 'washing by hand' method currently used in many practices. Publicity surrounding vCJD and other infectious conditions has prompted a renewed emphasis on the hazards and inefficiency of manual cleaning, and the Washer Disinfector addresses new decontamination legislation, and is fully compliant with HTM2030 and BS EN ISO 15883.

Installation is effortless with standard domestic fittings - a standard cold water supply, a drain close by, and a standard mains socket outlet are all that is needed. The one touch start button makes the Pico Washer Disinfector very easy to operate; simply load the instruments, touch start, and after the fast 15 minute cycle has completed, a beep informs the operator that the decontamination (soil residue removal and high level disinfection) has been satisfactorily achieved.

A printer (available at an additional cost) can be connected to enable the critical operation parameters and performance indicators to be permanently documented. The Washer Disinfector is supplied with a standard one year parts & labour warranty, and comes with:

- 3E Enzyme 5 Litres
- Descaling Solution
- Bur Basket

### Key Features:

- Fully automatic
- Monitored detergent dosing
- Handpiece connection
- Fast cycle time
- Reduces cross infection risk
- Double skin viewing window
- LCD auto prompt display
- Programme sequence indicator
- Automatic water treatment

### Specification:

- Chamber volume: 53760cm<sup>3</sup>
- Dimensions: 570 x 490 x 440mm
- Weight: 27kg

**018757**

**018869**

Optional Printer

2

3

**DELIVERY**

Please contact Customer Services for more information.

## 1 QS3

The QS3 is easily programmed to the operator's exact requirements, and the intelligent software memory stores these settings for the next usage. The operator can accurately programme cycle settings such as time, temperature, and ultrasonic power, which are then recorded via digital validation, providing complete traceability.

### Dimensions

- Tank: 240 x 140 x 100mm.
- Basket: 220 x 125 x 40mm.
- External: 285 x 184 x 267mm.
- Working Capacity: 2.5 Litres.

**018752**

## 2 Ultrawave U95 Ultrasonic Cleaner

An unheated ultrasonic bath with analogue controls, supplied with a stainless steel basket and ABS plastic lid, which can also be used as a drip tray to collect excess water when the basket is removed.

### Specifications

- Capacity: 1.95 Litres
- Controls: Analogue
- Temperature: Unheated
- Tank Dimensions: 200 x 150 x 75mm
- Overall Dimensions: 210 x 165 x 160mm
- Internal Basket Dimensions: 175 x 136 x 43mm

**007630**

## 3 Ultrawave U300H Heated Ultrasonic Cleaner

A heated, analogue controlled benchtop unit. Supplied complete with a stainless steel basket and ABS plastic lid, which can also be used as a drip tray to collect excess water when the basket is removed.

### Specifications

- Capacity: 2.5 Litres
- Controls: Analogue
- Temperature: 0 – 70°C
- Tank Dimensions: 240 x 140 x 100mm
- Overall Dimensions: 270 x 170 x 210mm
- Internal Basket Dimensions: 200 x 108 x 55mm

### Hadewe Heliuss range

The brand new Heliuss series features a newly developed labyrinth technique within the control unit to keep the sound within the drills, making it one of the most silent suction units on the market. The suction motor is located in a rubber protected zone to make it more shock proof.

The Heliuss is available in 2 different speeds, up to 22.000 rpm (Heliuss 22) and up to 40.000 rpm (Heliuss 40). The handpiece motors are constructed for long working hours.

#### 1 Hadewe Heliuss 22 Suction Drill

- Speed 4,000 – 22,000 rpm
- Extra silent control unit
- Powerful & shock protected suction motor
- W26 x H14 x D26cm, 4.5kg

09 131 7114

#### 2 Hadewe Heliuss 40 Suction Drill

- Speed 7,000 – 40,000 rpm
- Extra silent control unit
- Powerful & shock protected suction motor
- W26 x H14 x D26 cm, 4.5 kg
- Also available with Round, Autoclavable and Light hand pieces

09 131 7122

#### 3 Hadewe Paper Filter Bags

Regular paper filters for all Hadewe suction units (Heliuss, SB, Argos)  
09 125 3921

#### 4 Hadewe Micro Filter Bags

Special micro filters for all Hadewe suction units (Heliuss, SB, Argos)  
09 131 7155

#### 5 Hadewe Foot Switch

Works with SPR3, Hyperios 3, Argos and all Heliuss models  
09 127 6468

#### 6 Heliuss Carry Case

Designed for the Heliuss range, but fits other drills as well.  
Dimensions outside: W 45 x H 21 x D 39 cm  
Dimensions inside: W 43 x H 18 x D 37 cm, weight: 4kg  
09 142 8234

1

### 1 Hadewe Helius 40 Round Suction Drill

Part of the brand new Helius series. The Helius 40 Round features the same control unit as the Helius 40 but the handpiece comes with round suction.

- Speed 7,000 – 40,000 rpm
- Hand piece with round suction
- Extra silent control unit
- Powerful & shock protected suction motor
- W26 x H14 x D26cm, 4.5kg

09 131 7130

### 2 Hadewe Helius 40 Autoclavable Suction Drill

Part of the brand new Helius series. The Helius 40 Autoclavable features the same control unit as the Helius 40 but comes with a fully autoclavable handpiece..

- Speed 7,000 – 40,000 rpm
- Fully autoclavable handpiece
- Extra silent control unit
- Powerful & shock protected suction motor
- W26 x H14 x D26cm, 4.5kg

09 131 7148

### 3 Hadewe Helius 40 Light Suction Drill

The brand new Helius Light features all the latest high tech functions a suction unit could possibly offer. In addition to the features available on all Helius models, the Helius Light has an advanced high tech menu with memory settings and is equipped with an integrated powerful light source, which allows for a clear view during the operation even under less optimal light conditions. The light handpiece further has a function to control or switch on/off the speed and suction mechanisms by using a small button, which is directly located at the end of the handpiece. This could also be optionally controlled with the foot switch.

- Speed 7,000 – 40,000 rpm
- Powerful LED light on hand piece
- Additional information display
- 3 Memory settings
- Extra silent control unit
- Powerful & shock protected suction motor
- W26 x H14 x D26 cm, 4.5 kg

09 131 7106

### Hadewe SB range

The SB series is a long running reliable suction series, which has been a best seller in many countries for years. The units of this series are equipped with a powerful suction motor that is stored on rubber pads to protect it during transport. They further have a carry handle for the same domiciliary purpose.

Available with speeds of up to 12.000 (in a low cost and regular variant) and 22.000 rpm, the SB is perfect for long hours of continues work in hospital, stationary or domestic use. The unit itself is very small and therefore fits in almost all carry cases or cabinets.

#### 1 Hadewe SB-12 Suction Drill

- Speed 2,000 – 12,000 rpm
- User friendly operating panel
- Compact control unit with carry handle
- W26 x H14 x D19cm, 3.5kg

09 125 4143

#### 2 Hadewe SB-22 Suction Drill

- Speed 4,000 – 22,000 rpm
- User friendly operating panel
- Compact control unit with carry handle
- W26 x H14 x D19cm, 3.5kg

09 125 4150

#### 3 Berchtold S35 Suction Drill

The Berchtold S35 Dust Extraction Drill has a touch panel display and a variable speed micro motor hand-piece that can work up to 25,000 rpm.

This podiatry drill has a powerful suction vacuum with a large dust bag which ensures the airborne dust particles are kept to a minimum, increasing hygiene.

- Speed 5,000 – 25,000 rpm
- New touch panel display
- 3 Memory functions
- W28 x H11 x D25cm, 4kg

010156 Berchtold S35 Suction Drill

012067 S35 Carry Case

010219 S35 Dust Bags (10 pack)

### 1 Hadewe SPR 3 Water Spray

The new SPR3 unit stands out due to its modern design and advanced technology. The fine atomising technique allows working with spray liquids without alcohol additive (e.g. with distilled water or our AquaHy concentrate), which protects the patient and the user. It features a modern motor, which can be variably adjusted up to 40,000 rpm. There is also an optional foot switch available to control speed and spray amount. The SPR3 has a replaceable water filter in its tank, and an automatic cleaning function for the avoidance of blockage in the spray nozzle. It also has the new rinse and dry function. The rinsing part allows a larger amount of water to clean the patient's foot with higher pressure, while the drying part will blow the area dry with air.

- Speed 7,000 – 40,000 rpm
- Removable 200ml tank
- Allows spray liquid without alcohol
- New rinse & dry function
- Automatic cleaning function
- W25 x H14 x D19cm, 3.5kg

09 131 7189

### 2 Hadewe Hyperios 3 Water Spray

The new Hyperios 3 is very similar to the SPR 3 and includes the same features. In addition, it has a powerful light source at the top of the handpiece.

- Speed 7,000 – 40,000 rpm
- Powerful LED light on hand piece
- Removable 200ml tank
- Allows spray liquid without alcohol
- New rinse & dry function
- Automatic cleaning function
- W25 x H14 x D19cm, 3.5kg

09 131 7171

### 3 Berchtold S44 Water Spray

The Berchtold S44 Water Spray drill is a stylish water spray drill incorporating all the latest technology. The drill features an easy access spray reservoir and an infra-red remote foot control, which controls the intensity of the spray and motor.

- Speed 7,000 – 40,000 rpm
- Easy access 450ml reservoir
- W29 x H8 x D26 cm, 2.8kg

016411

2

3

1

2

3

### 1 Hadewe Argos Suction & Spray Combi Unit

The Argos drill combines two techniques in one device: spray and suction. When switching to the strong suction, the spray nozzle blows air out to prevent dirt from entering the system. At the heart of this combi unit is a microprocessor which steers all functions, including an automatic cleaning function to avoid blockage of the spray nozzle. The optional use of a foot switch further adds to the comfortable use of this unique combi unit. The fine atomising technique allows working with liquids without additional use of alcohol (e.g. distilled water, AquaHy).

- Speed 7,000 – 40,000 rpm
- Spray and suction in one hand piece
- Spray nozzle protected against dust entering the system
- Efficient turbine ensures dust free work
- Allows spray liquid without alcohol
- Automatic cleaning function
- W32 x H14 x D23cm, 5.6kg

09 131 7213

4

5

### 2 AquaHy Spray Liquid

100ml concentrate for 5L distilled water, non-alcoholic.

09 131 7163

### 3 Hadewe Foot Switch

Works with SPR3, Hyperios 3, Argos and all Helius models.

09 127 6468

6 7

### 4 Hadewe Paper Filter Bags

Regular paper filters for all Hadewe suction units (Helius, SB, Argos).

**Hadewe Xantos range**

The Xantos series is our new series of dry drills, which features a new design, and a digital display to show the speed. Our bestseller Xantos-22 has a slim handpiece with a diameter of 17 – 20.5 mm and a length of only 129 mm. Even with the low weight of 117g it has a powerful motor, which makes it the perfect choice for long and continuous work in podiatry, manicure, and nail design. The burs are easily exchanged by using the patented Hadewe Quick Chuck System. The Xantos unit is available in speeds of 12,000 and 22,000 rpm (Xantos-12 and Xantos-22).

**1 Hadewe Xantos-12**

- Speed 2,000 – 12,000 rpm
- Ideal for domiciliary use
- W12 x H9 x D19cm, 1kg

09 125 4119

**2 Hadewe Xantos-22**

- Speed 4,000 – 22,000 rpm
- Ideal for domiciliary use
- W12 x H9 x D19cm, 1kg

09 131 7197

**3 Xantos carry case**

Dimensions outside: W34 x H13 x D28cm  
 Dimensions inside: W32 x H11 x D22cm

### 2 Foot rest with bag

The foot rest is perfect for use during domestic work, and assists you in putting the patient's foot where you can best work on it. Height (46-92 mm) and multiple angles are separately adjustable. This latest model features an improved design to give it more stability with reinforced steel to prevent breaking under weight. Comes with a carry bag (W 690 x H 320 x D 240 mm).

**09 121 8288**

### 3 Magnifying lamp

The magnifying light Spectra can be used in every flexible way, since the included powerful clamp allows you to combine it with the Hadewe foot rest, carry case, or several kinds of furniture or cabinets. The extra long arm enables ultimate positioning of the light. Heat is not an issue with this product. In fact, you may transport it immediately after use.

Position the light close to the patient's feet and keep or move it to optimum position via the flexible arm and holder. For transport simply detach the light, and move the adapter under the foot rest. Choose your lamp design according to your other furniture style. The lid of the magnifying light can be changed to white, silver grey, or blue.

### 4 Catch Basin

Keep your working space clean by using the new flexible catch basin. Consisting of a desinfectable elastic material, it provides a soft basis to put your patient's leg on, and can easily be pressed down when working on the heel. Excess spray water will be collected in the basin. The Flex Catch Basin can be rolled together for mobile transport, and also fits into our carry cases, or the bag of the foot rest. Size: W 330 x H 100 x D 510 mm, Weight: 580g

**09 131 7247**

### 5 Tool Tray

This hard plastic tray allows you to keep all your tools and instruments within reach. You may hang it up the foot rest and it can be turned 360° in all directions. The tray consists of hard to break plastic, and is resistant against disinfection liquid. Size: W 260 x H 75 x D 360 mm, Weight: 400g

### 6 Podiatry Domiciliary Bag

This new Domiciliary Bag only weighs 2kg, making it an excellent option for domiciliary visits. It is manufactured from MicrAgard material which contains silver for anti-microbial protection. It is also anti microbial, fluid repellent, fire retardant, rot proof and waterproof!

Provides a safe environment to store your equipment, products, instruments and drill when moving from house to house, and comes with a detachable shoulder strap for comfort and easy carrying.

- Dimensions: H42cm. W52cm (incl. side pockets). D25cm.

**021867**

### 7 Domiciliary Bag with Wheels

Similar to the Podiatry Domiciliary Bag above but with wheels to reduce the stress of carrying.

- Weight when empty: 3kg
- Dimensions: H47cm (incl. wheels). W52cm (incl. side pockets). D28cm.
